Deciphering Display Terminology

by Richard Risitano, II

Display technology can be a confusing realm for some; there are acronyms, ratios, and tons of marketing terms that don't always carry over from one brand to the next. To help clarify this field, I've compiled a list of terms you may encounter when looking at various types of display specs, starting with the most basic and building on that foundation, bringing you one step closer to becoming a tech guru with each explanation.

TV/Television

A display device with a built-in tuner and speakers. The tuner allows you to watch free over-the-air (OTA) programming, commonly referred to as "network" TV. By far, TVs are the most common type of display.

Home Theater Display

Essentially a TV with speakers, but no tuner. Some consumers don't need a tuner, either because they only use a cable/satellite box for live programming, or maybe they simply don't watch live programming.

Monitor

A display typically used for computer or professional use with no tuner or speakers built in. These displays would be useful for consumers who don't need a tuner or speakers, likely due to having some form of home theater system to provide audio. This is the least common type of display found in home theaters.

Projector

A device with a light source and an imaging chip that projects onto a wall, screen, or other surface. Projectors are generally preferred over other display technologies

when an image larger than 60" or so is desired, where installing a traditional display may not be possible, or when the user prefers a discreet look, since projectors and screens can be recessed into the ceiling and lowered into place with motorized mounts. In the context of home theater, projectors are most commonly found in dedicated theater rooms, where the consumer has direct control over the amount of ambient light, larger amounts of which can have a negative impact on image quality.

Lamp

A light source for a projector, typically consisting of a halogen-based bulb or LED encased within a housing proprietary to a particular brand, series of projectors, or occasionally one specific model.

LED

An acronym for Light-Emitting Diode. These are used in projectors and TVs as a source of light, because without light, there is no image.

Laser

An intense, narrow-focused, long-lasting light source used for projectors; these are

typically not user-replaceable, but can last much longer than LED light sources.

DLP

An acronym for Digital Light Processing, this technology sees the light source pass through a rotating color wheel and reflected around inside the projector, undergoing a few color alterations before passing through the lens to the screen.

LCD

An acronym for Liquid Crystal Display. An LCD projector will send light from its lamp through a prism or a series of filters to the three internal LCD panels (one for each primary color of light: red, green, and blue), each with its own set of pixels, to create the projected image.

LCoS

An acronym for Liquid Crystal on Silicon, this technology has seen a resurgence in certain pico projector brands. Sony refers to its LCoS chips as SXRD, for Silicon X-tal (crystal) Reflective Display, while JVC called its chips D-ILA, for Digital Direct Drive Image Light Amplifier.

Backlight

Refers to the light source of an LCD TV. Traditional LCD TVs have an array of lights behind the LCD panel that illuminate the screen. Some newer models that use LEDs rather than CCFL lights can be mounted along the edges of the screen, rather than across the back; these are referred to as edge-lit panels, but is still categorized as a type of backlight, for simplicity.

LCD TV

A TV that uses an LCD panel with a backlight, commonly CCFL (cold-cathode fluorescent lamp), to create the image.

LED TV

A specific type of LCD TV that uses an LED (light-emitting diode) as a backlight, which can be either a true backlight or an edge-lit panel, instead of a CCFL array. LED TVs have grown in popularity over CCFL LCD TVs because they can be made slimmer and more energy efficient.

QLED TV

A display that uses small (just several nanometers) semiconductor particles, called "quantum dots," to enhance the color of an otherwise traditional LED TV.

OLED TV

Organic LED technology that doesn't require a backlight because each pixel illuminates itself, typically with increased contrast ratios and brightness with lower power consumption than LED TVs; also typically slimmer, more lightweight, and more energy-efficient than LCD/LED TVs, due to their lack of a backlight.

Refresh Rate

The rate, expressed in Hz (Hertz) or fps (frames per second), at which the screen refreshes itself; this is directly related to the display's power supply. In countries that use 100-120V for AC power, this will be either 24, 30, or a multiple of 60; where 200-240V is used, this will instead be 25 or a multiple of 50. A higher refresh rate will display a smoother image (with corresponding content) because of the additional video frames displayed.

Aspect Ratio

The ratio of the width of a display or screen to its height. For standard definition, 4:3 is most common, whereas 16:9 is most common in HD displays. 16:10, 17:9, and 2.35:1 aspect ratios are also commonly found in projectors, and all represent additional HD formats.

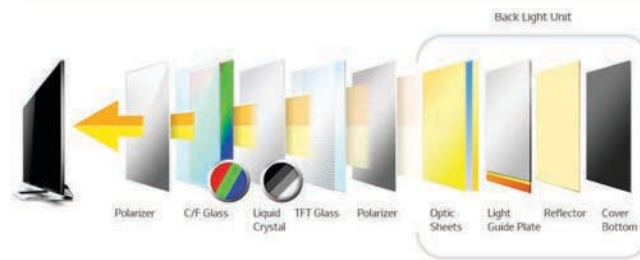

3D

A simulated three-dimensional effect that some displays and projectors can produce, usually in conjunction with 3D glasses. The technology of the glasses must match that of the display or projector. You want to use active glasses with active 3D displays and passive glasses with passive 3D displays.

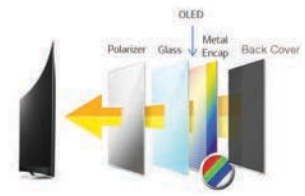

Resolution

Describes the amount of detail a display can

CONVENTIONAL LCD DISPLAY

OLED DISPLAY

produce, based on the number of pixels on the panel, often described with a graph-like value representing the number of vertical and horizontal lines, i.e. 1920 x 1080. Like refresh rate, the higher the resolution, the clearer the image will be, with compatible content.

SD / Standard Definition

Resolutions up to and including 640 x 480, typically associated with non-progressive DVD players, VHS, and analog TV/cable/satellite reception, and similar sources. SD video is in the process of being phased out of broadcast TV.

HD / High Definition / 720p

Typically describes the video resolution of 1366 x 768, or sometimes the XGA resolution of 1024 x 768.

Full HD / 1080p

1920 x 1080 resolution.

UHD / 4K

3840 x 2160 resolution; sometimes referred to as 2160p.

Contrast Ratio

The ratio between the brightest white level a display can achieve compared to the darkest black level at a given setting.

Dynamic Contrast Ratio

Similar to contrast ratio, but in order to measure the brightest white level, the display is first set to the brightest setting, then measured, and to determine the darkest black level, it is then set to the darkest setting, then measured.

Color Gamut

Refers to the number of unique colors a display can produce; a display that can

display more colors is said to have a "wider" color gamut.

HDR

An acronym for High Dynamic Range. Per the Ultra HD Alliance, to achieve HDR certification, a display must either have a peak brightness over 1000 cd/m² with black levels less than 0.05 cd/m², or a peak brightness over 540 cd/m² with black levels lower than 0.0005 cd/m². These brightness levels enable the possibility for a wider color gamut compared to non-HDR (SDR – Standard Dynamic Range) displays.

HDR10

HDR technology that uses the Rec.2020 color space with a 10-bit color depth. It uses static metadata from the video source (i.e. a streaming media player) for color calibration of the display. As an open standard, HDR10 is the most common HDR technology.

Dolby Vision

An HDR format from Dolby Laboratories that supports a 12-bit color depth within the Rec.2020 color space. It uses dynamic metadata from the source, optimizing the dynamic range frame by frame. Unlike HDR10, Dolby Vision requires pre-installed onboard hardware to function.

HLG

An acronym for Hybrid Log-Gamma, HLG is an HDR format that is backward-compatible with SDR displays and is used in broadcast and some streaming services.

Smart TV

Refers to a display that will typically have an onboard OS (operating system) similar to that of a computer, with the ability to download and access apps and stream content.

SONY LSPX-P1

HD SXRD Portable Home Theater Projector

- » Brightness Up to 100 Lumens
- » HD (1366 x 768) Native Resolution
- » 1x HDMI Input via Wireless Module
- » 2x 2W Mono Bass Reflex Speakers Built In
- » IR Blaster Controls Connected Devices
- » Controllable via Dedicated App
- » Sony's xLOUD Technology

(SOLSPXP1K) **998.00**

SONY VPL-HW45ES

Full HD Home Theater Projector

- » Brightness of 1800 Lumens
- » Full HD (1920 x 1080) Native Resolution
- » 1.6x Zoom
- » Two HDMI Inputs
- » Supports 3D
- » Support for RF-Based 3D Glasses
- » IR Remote Control Included

(SOVPLHW45ES) **1,998.00**

LG PF1000UW

Ultra-Short Throw Full HD DLP Home Theater Projector

- » Brightness of 1000 Lumens
- » Full HD (1920 x 1080) Native Resolution
- » Ultra-Short Throw Ratio
- » Two HDMI Inputs
- » Supports Multiple File Formats via USB
- » Analog Audio Output
- » Built-in 6W Stereo Speakers
- » IR Remote

(LGPF1000UW) **1,196.99**

EPSON Home Cinema 3700

Full HD 3LCD Home Theater Projector

- » Brightness of 3000 Lumens
- » Full HD (1920 x 1080) Native Resolution
- » 1.6x Zoom and 1.32 to 2.15:1 Throw Ratio
- » Supports Multi 3D Formats
- » 2 HDMI, Component, VGA Inputs
- » Built-in 10-Watt Speaker

(EPPLHC3700) **1,499.99**

EPSON PowerLite Home Cinema 5040UB

Full HD 3LCD Projector

- » Color & White Brightness of 2500 Lumens
- » Full HD (1920 x 1080) Native Resolution
- » 2.1x Zoom
- » Two HDMI Inputs, One with HDCP 2.2
- » Locking HDMI Ports

(EPPLHC5040UB) **2,699.99**

EPSON Home Cinema 4000

HDR Full HD 3LCD Home Theater Projector

- » Color & White Brightness of 2200 Lumens
- » HDR10 Compatible
- » Full HD (1920 x 1080) Native Resolution
- » 1 to 2.1x Zoom
- » 1.35 to 2.84:1 Throw Ratio
- » Two HDMI Inputs

(EPPLHC4000) **2,199.99**

BENQ HT3050

Full HD 3D DLP Home Theater Projector

- » Short 1.15 to 1.5:1 Throw Ratio
- » 1.3x Zoom Ratio
- » Brightness of 2000 ANSI Lumens
- » 1920 x 1080 Native Resolution
- » Dual HDMI Inputs + MHL Support
- » Project up to 300" Images

(BEHT3050) **977.70**

BENQ HT1070

Full HD DLP Home Theater Projector

- » Brightness of 2000 ANSI Lumens
- » 1920 x 1080 Native Resolution
- » 1.3x Zoom and 1.15 to 1.5:1 Throw Ratio
- » Two HDMI Inputs, One with MHL Support
- » IR Remote Included

(BEHT1070) **649.00**

BENQ HT2150ST

Full HD DLP Home Theater Projector

- » Brightness of 2200 ANSI Lumens
- » Full HD (1920 x 1080) Native Res.
- » 11.2x Zoom & 0.69 to 0.83:1 Throw Ratio
- » 2 HDMI, 1 with MHL input
- » Supports Multi 3D Formats
- » Dual Built-In 10-Watt Speakers

(BEHT2150ST) **999.00**

Optoma HD29Darbee

Full HD DLP Home Theater Projector

- » Brightness of 3200 Lumens
- » Full HD (1920 x 1080) Native Resolution
- » 0.8 to 2x Digital, 1.1x Optical Zoom
- » 1.48 to 1.62:1 Throw Ratio
- » 2 x HDMI Inputs
- » Supports Multiple 3D Formats

(OPHD29D) **Call or Log-On**

Optoma HD142X

Full HD DLP Home Theater Projector

- » Brightness of 3000 Lumens
- » Full HD (1920 x 1080) Native Resolution
- » 1.1x Zoom and 1.48 to 1.62:1 Throw Ratio
- » Two HDMI 1.4a In, One with MHL Support
- » Backlit IR Remote

(OPHD142X) **549.00**

Optoma GT1080Darbee

Full HD DLP Home Theater Projector

- » Brightness of 3000 Lumens
- » 1920 x 1080 Native Resolution
- » 0.8 to 2x Zoom, Short 0.49:1 Throw Ratio
- » 2 x HDMI Inputs
- » Supports Multiple 3D Formats
- » Sync Port for RF-Based 3D Glasses

(OPGT1080D) **749.00**

USB and iPod Digital Interface

- » CD to USB Recording » Charges Your iPod/iPhone
- » Analog & Digital Audio Out » 1/4" Headphone Out
- » MP3 Playback from USB Memory
- » 24-bit/192kHz D/A Converter

(TECDP650)..... **139.99****ONKYO DXC390**

6-Disc CD Carousel Changer

- » High Precision D/A Converter
- » Optical/Coaxial Digital Audio Outputs
- » Plays CD-R/W, MP3
- » Compatible with Red Book Audio CD

(ONDXC390)..... **149.00****YAMAHA CD-S300BL**

Compact Disc Player

- » CD Player with USB & iPod Compatibility
- » High-Performance 192 kHz / 24-bit DAC
- » Intelligent Digital Servo & Pure Direct
- » Supports MP3 & WMA Audio File Formats

(YACDS300BL)..... **299.95****marantz® PMD-300CP**

Dual Cassette Deck with USB

- » Convert Tapes to MP3
- » Normal and High-Speed Dubbing
- » Dynamic Noise Reduction
- » Supports Normal and CrO2 Tapes

(MAPMD300CP)..... **149.00**

**SONOS PLAYBAR**

Wireless Soundbar

- » 3.0-Channel System
- » Nine Class-D Digital Amplifiers
- » Supports SonosNet Wireless Connectivity
- » Six Midrange Speakers & Three Tweeters
- » Stream Music from a Variety of Sources
- » Two Ethernet Jacks & Optical Audio Input

(SOPBAR1US1B)..... **699.00****SAMSUNG HW-MS650**

Sound Soundbar

- » 3 Wide Range Tweeters
- » 9 Speakers with Dedicated Amps
- » High-Res Audio (96kHz/24bit) » 4K Pass-Through
- » Distortion Cancelling » Wi-Fi & Bluetooth Connectivity

SAHWM650)..... **479.99****YAMAHA YAS-107**

120W 2-Channel Soundbar

- » 2-Channel Configuration » Up to 120W of Total Power
- » Bluetooth Audio Streaming
- » 1x HDMI-In / 1x Optical-In / 1x 1/8"-In; 1x HDMI-Out
- » Output for Optional Subwoofer » Wall Mountable via Keyholes

(YAYAS107BL)..... **199.95****W Studio**

320W Soundbar System

- » Virtual Surround Sound
- » Up to 320W of Total Power
- » Wi-Fi Audio Streaming via Play-Fi
- » External Wireless Subwoofer
- » 3x HDMI-In / 1x Optical-In
- » 1x HDMI-Out

(DEVFBC)..... **1,299.00****VIZIO SB2821-D6**

2.1-Channel Soundbar System

- » Bluetooth Audio Streaming » External Wireless Subwoofer
- » Dolby and DTS Compatibility
- » Optical, Digital Coaxial, RCA, USB In
- » 1/8" Aux In » 28" Wide » Includes Wall Mounts

(VISB2821D6)..... **128.00****VIZIO SB2820N-E0**

28" 2-Channel Soundbar

- » 2-Channel Configuration
- » Bluetooth Audio Streaming
- » Subwoofer Output
- » DTS Studio Sound, TruSurround, TruVolume
- » Optical, USB, 1/8"-In » Includes Wall Mount Bracket

(VISB2820NE0)..... **78.00****BOSE® SoundTouch 300**

Soundbar

- » ADAPTiQ Audio Room Calibration
- » Bluetooth Audio Streaming
- » 1x HDMI-In / 1x Optical-In » 1x HDMI-Out
- » Expandable Design

(BOST300B)..... **699.00****SAMSUNG HW-M360**

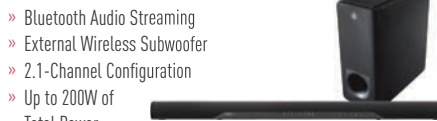

200W 2.1-Channel Soundbar System

- » 2.1-Channel Configuration
- » Up to 200W of Total Power
- » Bluetooth Audio Streaming
- » External Wireless Subwoofer

(SASWAR8500S)..... **127.99****YAMAHA YAS-207 200W**

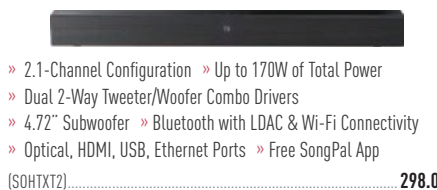

2.1-Channel Soundbar System

- » Bluetooth Audio Streaming
- » External Wireless Subwoofer

- » Can Pair with Other OD-11 Speakers

(TE007AS001AU)..... **999.00**

Wall Mounts

Fixed Wall Mounts

Slim fixed wall mounts enable flush mounting of your flat panel display. While other mount types offer greater viewing flexibility, fixed mounts are a great choice for those who wish to maintain a clean and tidy appearance.

Tilting Wall Mounts

Tilting wall mounts offer a slim form factor that rivals fixed mounts, while allowing a slight adjustment for customized viewing. Especially useful when your TV is elevated, allowing you to point the screen downward.

Full-Motion Wall Mounts

For enhanced viewing flexibility and easy access to your TV's connectors, full-motion wall mounts may be your solution. While not as slim as other mounts, they offer superior adjustment, with some offering tilt, pan, and rotating capabilities.

HDMI Cables

HDMI allows you to transfer high-quality audio and video streams simultaneously over a single cable. Since its inception, HDMI has evolved, incorporating a number of feature additions along the way. Furthermore, each version is backward compatible with previous generations. While some features require that both components support the version in which the feature was introduced, you can still connect devices easily and enjoy high-definition video and audio. Furthermore, if you have high-speed HDMI cables, you can continue to use them across HDMI versions. You will, however, need a cable that specifically supports HDMI Ethernet Channel connectivity to enjoy this functionality. Mini-HDMI cables and adapters are also available to accommodate connectivity from compatible mobile devices, such as smartphones and tablets.
