The BD-F7500 is an aesthetic study in black and silver, simultaneously modern, yet classic. Its minimalist high-gloss black finish contrasts with the unit's aluminum trim, and complements the same design qualities found on many high-end flat-panel displays that feature black lacquered finishes set off by silver bezels. The BD-F7500's video processor improves the visual quality of block-based low bit-rate coded images and reduces blocking artifacts. This is especially important for maximizing the visual quality of content streamed from the Internet, as well as improving the quality of picture sharpness.

DIGITAL LIVING

There's no doubt we live in the digital era. Music, photography, video — it is all digital, and it is at our fingertips. Digital technology has transformed the way we work, play and communicate. From the pictures we take with our digital cameras, to the music we listen to on our digital music players, and all the information stored on our computers, PDAs, and mobile phones, everything is based on some type of digital file format.

Whether we are traveling by train, plane, automobile, or boat; while studying, jogging, working out—and even swimming—we obviously want our videos, music, movies, TV programs, and podcasts with us. The industry overall has made great progress toward developing innovative products and services that are helping make digital living a reality for consumers.

iPad (4th Gen) with Retina Display

More powerful than ever. The Retina display contains 4x more pixels than the iPad 2 for outstanding clarity and sharpness with both text and images. Dual-core A6X chip with quad-core graphics provides a great deal of processing power and speed to compensate for the increase in resolution and delivers the same responsive feeling of the former models. This increase in power and resolution doesn't come at the expense of battery life—the iPad still features up to 10 hours of power between charging.
The rear-facing iSight camera (iPad includes a a FaceTime HD camera as well), incorporates a 5MP backside illuminated sensor for increased lowlight sensitivity as well as great performance in bright situations. Auto focus, tap-to-focus, and tap to set exposure settings allow you to achieve the best exposure possible in a quick and intuitive manner. Face detection is also supported and recognizes up to 10 different faces for improved exposure and focus settings when photographing people. iSight camera also supports full HD 1080p video recording with automatic image stabilization. The camera utilizes a 5-element f/2.4 lens for sharpness and integrates a hybrid infrared filter for greater color fidelity. And for even greater functionality with your iOS devices, dictation is now supported allowing you to simply talk in order to type. You can speak your emails, texts, notes, or web searches and have the written words automatically appear.

Apricorn Padlock

USB 2.0 Encrypted Hard Drive with PIN Access

Stores up to 10 secure PIN passkeys with 256-bit military grade AES hardware encryption for ultimate security. Administrator function allows IT departments to secure its mobile users by assigning admin access to the drive before being distributed. The drive also self destructs after a predetermined number of failed PIN entries.
It assumes it's being attacked and destroys the encryption key and locks itself, rendering the data useless and requiring a total reset to redeploy the Padlock. Variable Time Circuit technology prevents against timing attacks aimed at accessing the drive by studying its behavior and infiltrating the Padlock's electronics.
Additional features include weather resistant key pad, 16-point omni-directional shock mounting system and super tough, epoxy compound protecting the circuitry and encryption chip.

Leica Ultravid HD Series

They offer unparalleled image brightness and contrast, thanks to Leica's Fluorite-Ion lenses. These highly developed lenses further reduce chromatic aberrations, and produce high color fidelity. Specially coated prisms increase light transmission, allowing them to discern fine details in any low light situation. Die-cast, magnesium, rubber-armored body has industry's highest rating for shock resistance. They are nitrogen filled and watertight to 16.5 feet. Finally, painstaking attention to ergonomic detail results in a beautifully contoured binocular that fits perfectly in your hands.

FinePix X100S

The FinePix X100S is a high precision digital compact camera that combines modern technology with a traditional camera design to deliver the ultimate in image quality. Featuring a 16MP X-Trans CMOS II Sensor, Fujinon 23mm f/2 lens, a 2.8" 460K LCD, expandable ISO 100-25600, and the world's first Hybrid Viewfinder, the FinePix X100S captures exceptionally high quality images.

- When shooting HD movies, the large f/2.0 aperture lets users create a soft out-of-focus image
- Hybrid Viewfinder combines the window-type "bright frame" optical viewfinder with the electronic viewfinder system. Can show both the shooting frame and a variety of electronic shooting data.
- Instantly switch between optical and electronic viewfinder modes
- Motion Panorama function makes it easy to capture 180° and 120° panoramic photos.
- Four types of bracketing functions: AE, ISO, Dynamic Range and Film Simulation. One click of the shutter captures 3 bracketed images of the scene so you know you've captured the moment.

FUJIFILM X-Pro1

Interchangeable Lens Digital Camera System

Featuring a 16MP X-Trans CMOS sensor, proprietary EXR Processor technology, original X-Mount and Hybrid Multi Viewfinder, the X-Pro1 delivers outstanding image quality that rivals high-end DSLR cameras. The camera is designed with a die-cast aluminum top and base, and a leather like finish on the main body for grip and the look and feel of authentic leather. For convience, a natural fitting eyepiece provides excellent shielding from light leakage. Also offers 100-25600 ISO capabilty and 1080p HD video with stereo sound.

- Hybrid Viewfinder can instantly switch between an optical and electronic Viewfinder. When attaching an XF-series lens, both the viewfinder magnification and bright frame size automatically switch to support the lens focal length.
- Incorporating a special anti-reflective coating, the 3" LCD (1,230,000 dots) features high water repellency, a stain-resistant acrylic film and superb anti-glare performance.
- Film Simulation - just like choosing the ideal photo film
  - "Studio Ready" professional color negative film modes for perfect portraits
  - Reproduce photo film expression with film simulation mode
  - Enhance monochrome expression with color filters
- Select from four powerful auto bracketing functions (AE, ISO sensitivity, Dynamic Range and film simulation)

EOS 60Da Astrophotography Camera

Perfect for long exposures while gazing up into the sky, the EOS 60Da is tailor made just for astrophotography. It incorporates a modified IR blocking filter that allows the light normally blocked by a typical DSLR's filter to be captured by the camera's sensor. This means that the reddish hydrogen-alpha (Hα) light (656nm) gasses unseen by a normal DSLR are captured brightly and clearly on the EOS 60Da. Otherwise the same as the EOS 60D, it also includes the RA-E3 Remote Controller Adapter which allows compatibility with the optional TC-80N3 Timer Remote Controller for accurate control of long exposures and automatic shooting of repetitive shots with the interval timer.

50mm f/1.2L USM

Ideal for low-light photography, the high-performance EF 50mm f/1.2L USM is a standard focal length optic featuring an ultra-large aperture for a narrow depth of field that produces a soft background blur. Its weather-resistant with lens coating and construction that are designed to minimize the ghosting and flare that frequently occur with DSLRs, to deliver superb image resolution and contrast.

CA5012LEF.....**1619.00**

100mm f/2.8L Macro IS USM

Held to a higher level of resolving power and overall construction, this lens eatures Optical Image Stabilization with up to 4-stops of shake control, and a refined Ultrasonic Motor (USM) for quicker and quieter auto-focusing with full-time manual override. It allows for a comfortable, shadow-free shooting distance between the front of the lens barrel and the subject with life-size (1:1) magnification. Optional extension tubes increase this magnification for exceptional close-up detail.

CA10028LMIS.....**1049.00**

8-15mm f/4.0 L USM Fisheye

Delivers 180° diagonal angle of view images for all EOS SLRs. When used with full-frame cameras you can choose between a circular fisheye image or full-frame image by using the zoom. When used with EOS bodies featuring APS-C or APS-H sensors, the lens produces a more traditional, full frame fisheye view. A zoom-lock mechanism on the lens body allows the range to be limited to the focal length that ensures the best possible full-frame view without unsightly vignetting around the edge. *(CA8154L)*.....**1499.00**

17-40mm f/4L USM

Delivers optical performance equal to similar fixed focal length lenses, with silent, high-speed focusing. High-precision molded glass aspherical lens and two replica aspherical lenses achieve the extended zoom range, while also correcting for aberrations that arise during zooming. Super UD (ultra-low dispersion) glass element help eliminate color bleed along the edges of the subject and achieve high image contrast and resolution.

CA17404LEF.....**839.00**

24-70mm f/2.8L II USM

Super UD and two UD lens elements minimize chromatic aberration in the periphery at wide-angle, as well as reducing color blurring around the edges of the subject. Dust sealed and water resistantant, while fluorine coatings on the front and rear lens reduce fingerprints and smearing. A circular 9-blade diaphragm gives beautiful, soft backgrounds. A zoom lock lever locks the zoom position at the wide end for safe transporting while attached to an EOS DSLR camera over the shoulder.

CA247028LII.....**2299.00**

70-200mm f/2.8L IS II USM

Incorporating Canon's second generation two-stage Image Stabilization technology, this telephoto zoom responds in as little as 0.5 seconds, while providing up to three stops of correction for camera shake. Its AF system has been refined for better response time and tracking speed. And even the new 8-blade circular aperture offers a more pleasing out-of-focus image. Constructed to pro standards, this fast zoom is also highly resistant to dust and moisture.

CA7020028LIQ.....**2499.00**

100-400mm f/4.5-5.6L IS USM

Fast and silent autofocus with Canon's ring USM. Fluorite and Super UD glass eliminate secondary spectrum for superb color rendition. Equipped with a dual-mode Image Stabilizer suitable for panning as well as stationary subjects. Also offers full-time manual focus, one-touch zooming with a wide grip, and a special ring that permits adjustment of zooming friction

DSC-RX1 Full-Frame 24MP CMOS Camera

The DSC-RX1 is the world's first fixed lens 35mm full-frame digital camera which offers an uncompromising design with intuitive, user-friendly operation. The camera fits in the palm of your hand and and can be carried nearly everywhere to capture any shooting opportunity that arises. Featuring a 24.3 MP 35mm full-frame sensor, sensitivity up to ISO 25600, and a sophisticated balance of high resolving power, gradation and low noise, the DSC-RX1 will help you shoot a whole new world of high-quality images. Newly developed large-diameter F2.0 Zeiss Sonnar T* lens delivers refined background defocusing – bokeh, and macro capabilities. A premium multi-layered T* coating also dramatically reduces ghost and flare caused by light reflection.

- BIONZ image processor enables up to 5 fps continuous shooting and 14-bit RAW image data recording.
- While shooting movies and stills, users can use Program Auto, Aperture- and Shutter-Priority or manual (P/A/S/M) mode. Enjoy clear sound recording and playback via built-in stereo mic and speaker. Or connect an optional microphone into the camera.
- Sensitivity is selectable up to ISO 25600, plus the camera can capture six images in a fraction of a second. It then combines the data from all six, creating single image with a reduction in noise equivalent to two additional steps of ISO sensitivity.
- 3" (1,229k dots) Xtra Fine LCD with WhiteMagic technology to increase visibility in bright daylight.
- Nine aperture blades form a nearly perfect circle throughout the normally used aperture range of F2.0 to F22, resulting in background defocusing that is smooth and genuinely beautiful.
- MR (memory recall) mode can memorize up to three groups of preferred settings. Settings include zoom white balance, exposure compensation, shutter speed, drive and metering modes.
- Fast, DSLR-like focusing speeds even in low light. Focus as fast as 0.13 seconds with high speed AF.
- 13 picture effects and 15 finishing styles
- Auto HDR mode; Sweep Panorama mode; Auto portrait framing
- Face detection/registration technology
- Built in pop-up flash
- Capture JPEG files, RAW files, or both
- Four focusing modes; MF assist and peaking
- Digital level gauge to allow easier leveling of the camera
- Multi interface shoe allows connection with optional accessories including a external flash unit, electronic viewfinder, optical viewfinder, thumb grip, clip-on LCD monitor, etc.

DP1 • DP2 • DP3 MERRILL

46-Megapixel Compact Digital Cameras

The Foveon X3 Direct Image Sensor uniquely captures all red, green, and blue (RGB) color information in each pixel location, with three layers. This provides accurately colored and incredibly detailed imagery, with greater three-dimensional depth. Manual Focus is available and nine diaphragm blades provide excellent blurring effects to out-of-focus areas (bokeh) in photographs for a very pleasing aesthetic and style. 3.0" LCD lets you quickly change menu options, or review photos after they're taken.

Otherwise the same, the DP1 offers a 28mm equivalent lens on a 35mm camera, the DP2 a 45mm lens, the DP3 a 75mm lens.

SLT-A58

Incorporating Translucent Mirror Technology, the 20.1-megapixel SLT-A58 achieves the highest-level of auto focus speed for both still image and movie shooting. Unlike ordinary DSLR cameras, SLT cameras by Sony use Translucent Mirror technology that directs light onto the main image sensor as well as a separate autofocus sensor. This means that subjects stay sharply focused at all times as you compose scenes with the tilt-angle LCD or through the high-resolution, high-contrast OLED Tru-Finder. And with no moving mirror to slow you down, you'll enjoy non-stop live image preview during speedy burst shooting or while you're recording Full HD video.
The SLT-A58 features a 20.1-megapixel APS-C-sized Exmor HD APS CMOS sensor that combines with the BIONZ image processor to produce clear, exceptionally detailed, low-noise stills and Full HD video, plus an extra-wide sensitivity range of ISO 100 to 16000.

- Tele-zoom Continuous Advance Priority AE mode with a high-speed burst of 8 fps.
- 15-point AF system features Lock-on Autofocus for speedy and accurate subject tracking. It also works continuously even while recording video and photographing in a continuous shooting mode.
- SteadyShot INSIDE is in-camera, so any compatible A-mount lens can be used in conjunction with the A58 to receive image stabilization benefits.
- Record Full HD 1920 x 1080 at 60i and 24p frame rates in the high-quality AVCHD version 2.0 format or at 1080/30p in the MP4 format for uploading to the web.
- Multi Frame NR and Hand-held Twilight
- Pick from a palette of 15 artistic 'in-camera' treatments, like Toy Camera, Mono and Partial Color.
- SVGA Tru-Finder OLED EVF (1,440k-dot resolution) permits crisp live view monitoring and also allows you to preview the effects of camera settings while using an eye-level viewfinder.
- Auto Object Framing judges what's in the scene – one person, two people, even moving objects or macro subjects – tracking, framing and cropping the shot to create powerful, professionally-framed compositions.
- Rear 2.7" 460k-dot Clear Photo LCD monitor features a tilting design to greatly benefit working from both high and low angles.

SLT-A65V

Steps up from the SLT-A58 with a 24.3MP APS-C sensor, giving you the ability to make huge prints and to experience detail that's absolutely outstanding. It also features an OLED viewfinder, can shoot at 10 fps and records HD movies with full manual control. Built-in flash allows for spur of the moment or snapshot capture, while the integrated hot shoe lets you add on flashes or other flash accessories. Dual media slots help you to shoot longer and provide you with the option of storing two different cards at once. Fill one with Memory Stick media perhaps and the other with SD/SDHC/SDXC cards if you feel like it.

Steps up from the SLT-A65V with built-in GPS, dual control dials (provides direct, hands-on access to two settings at a time), and a 3-way tilt-swivel LCD screen. Tilt it up or down to frame high- and low-angle shots, or tilt and swivel over the camera for self-portraits. You can even tilt it up and down when you hold the camera in vertical mode. The monitor folds flush to the camera with the LCD exposed for shooting or protected for travel. In addition to status displays on the LCD monitor and electronic viewfinder, the camera offers a top-mounted LCD with exposure information.

SLT-A99 Full-Frame 24.3MP Camera

35mm full frame digital camera equipped with Sony's translucent mirror technology, the SLT-A99 can shoot without the delay of a reflex mirror, plus its Dual Autofocus System continuously monitors and altera its focus in real time. 24.3MP full-frame Exmor CMOS sensor lets you capture high quality images in low-light. ISO range of 100 to 25600 with area-specific noise reduction lets you shoot at the higher end of that sensitivity range. 3.0" TruBlack LCD (1,228,000-dots) features Shot Result Preview, for previewing the effects of your camera's settings before the exposure is even captured. It is also able to tilt up to 180° vertically and can rotate up to 270° horizontally. Tru-Finder Electronic Viewfinder features a 1,440K-dot resolution, 100% field of view, and a wide 31.9° viewing angle.
Using sensor-shift image stabilization, Sony's SteadyShot technology takes place inside the camera rather than in the lenses you attach. Achieve shake reduction of up to 2.5 to 4.5 stops, so your shutter speed will not need to be set as low as it would without the stabilization. Full HD 1080p video is supported with this camera and makes use of the high-speed Translucent Mirror technology for continuous autofocus, even while using Live View to monitor your shooting. The 24p frame rate allows you to create movies with a more cinematic feel, and for even greater control ISO sensitivity, P/A/S/M manual shooting modes, and Picture Effects are available.

DG Models ***Optimized for Digital SLR's***

These are large aperture, wide angle lenses with short minimum focusing distances and an abundance of peripheral illumination. While they are ideal lenses for digital SLR cameras, they are also suitable for traditional 35mm SLR's.

DC Models ***For Digital SLR's Only***

These lenses feature an image circle matched to the small sensor found in digital SLR cameras. This method results in a lens ideally suited to digital reproduction with the added bonus of reduced weight.

LensCoat Lens Covers

Manufactured from 100% closed-cell neoprene, offering protection from bumps, jars, and nicks, with a camouflage-pattern fabric cover. Lens Covers also provide a thermal barrier, protecting your hands from cold lenses in lower temperatures. They are easy to install and remove, leaving no residue on the lens. Moving a big white (or black) lens near skittish wildlife is like waving your arms – a sure way to flush your subject and ruin what could be a once-in-a-lifetime photo opportunity. LensCoat™ Lens Covers mask your large lens, giving you a better chance at getting the shot.

M-E Digital Rangefinder Camera

The M-E is a full frame, interchangeable lens camera that embodies the notion that less is more. The camera houses an 18MP full frame (36 x 24 mm) CCD sensor but retains a compact, durable and well-designed form. The sensor matches well with the compact M-system and M-series lenses, giving uniform exposure across the entire sensor. Fast and accurate manual focusing is achieved via the optical viewfinder/rangefinder and the smooth, exact focusing ring of a Leica lens. A 2.5" LCD screen offers clear image playback and menu control. The camera body itself is an all-metal casing made of die-cast magnesium with an attractive anthracite-gray finish and a real leather wrap which provides a good grip as well as good looks. A hot shoe mount is available for optional flash attachment. *(LEME)*.....**5450.00**

M Monochrom Digital Camera

A black-and-white version of its M9 full-frame rangefinder, the M-Monochrom has no color filter array in front of the sensor, meaning it captures more of the available light but cannot perceive color. It also means there is no need for demosaicing (the process of combining color information from adjacent pixels), so higher levels of detail are retained. In most other respects, the M-Monochrom is similar to the M9.The camera can add three toning colors to its monchrome output or its uncompressed DNG files can be edited using the included copy of Photoshop Lightroom. A full version of the mono processing software Silver Efex 2 is also included. *(LEMM)*.....**7950.00**

M7 Series 35mm Rangefinder Camera

Classics are works that clash with the present. They are never modified – instead they are re-interpreted on the basis of a changed world. With the M7, a classic camera has been infused with modern electronic advantages that results in a camera that is faster than ever while still having the soul of a Leica.

- Choose between three viewfinder magnifications: the standard 0.72x, an 0.85x viewfinder

X2 Digital Compact Camera with Elmarit 24mm f/2.8 ASPH. Lens

Lightweight (only 10 oz.) and compact, the X2 is equipped with a 16.1MP CMOS sensor similar to those used in semi-professional DSLR cameras. Combined with the all-purpose Leica Elmarit 1:2.8/24mm lens, the X2 offers outstanding picture quality that need not fear comparisons with professional cameras. It also features automatic and manual controls, low noise and high dynamic range, sensitivity up to ISO 12500, Live View with 2.7" display, and of course, legendary Leica precision engineering.

HASSELBLAD

H5D-40 40-Megapixel Medium Format DSLR Camera

Delivers unsurpassed image quality via powerful features and precision optics. True Focus technology with Absolute Position Lock (APL) allows you to capture close distance shots with a unique yaw sensor to measure angular velocity. The low noise color filter of the H5D-40's sensor provides for increased clarity and increased depth of field. The Natural Color Solution (HNCS) achieves consistent color reproduction using a single color profile, and digital lens correction perfects each image captured through HC/HCD lenses by removing any trace of distortion, vignetting, or chromatic aberrations.

Voigtländer

35mm Rangefinder Cameras

Voigtlander Bessa cameras are light, unobtrusive cameras that are ideal for handheld lowlight conditions. These rangefinder cameras have a smaller distance between the film and the lens mount than SLRs, which makes for inherently sharper lenses.

B+W

The industry-standard for demanding professionals and amateur photographers for creative imaging with optimal quality. Choose from correction and effect filters for color and B&W photography; Käsemann polarizing filters; close-up lenses; special-effect- and trick lenses; filters with SLIM mounts for vignette-free exposures with wide-angle zoom- and fixed focal length lenses.

B+W uses the very best glass and filter mounts, and machines them with CNC-controlled fabrication machines to make sure that the filters perform their functions optimally without jeopardizing image quality.

Most other filter manufacturers start with ordinary window glass that has been poured in thin sheets and cooled quickly, introducing internal flaws. B+W starts with a cylinder of Schott German optical glass from which the filters are diamond cut, precision ground, and then polished to ensure flatness on both surfaces and uniform thickness throughout. Every B+W filter is interferometrically tested for plane parallelism. This process is used routinely by the world's leading lens makers, but only rarely by filter manufacturers.

HOYA

Wouldn't you rather spend your time attaching the right filter than retouching every photo? Attaching the right filter can replace the need to retouch each digital photo you take. Using filters allows you to spend more time taking photos and less time in front of the computer!

Don't risk your valuable photos by using bare-glass filters. Now try a HOYA Digital Multi-Coated filter and see how the benefit of substantially reduced reflections can improve your image. Reduced internal reflections mean a clearer image with greater contrast

Oben

Oben aluminum and carbon fiber monopods are lightweight, sturdy one-legged camera supports that enable you to capture steady shots without needing to carry or set up a full tripod. These monopods allow you to mount any DSLR camera with most lenses, a point & shoot model, or even a compact camcorder. For fine control over camera orientation, you can also attach a head to the monopod's reversible 3/8"-16 & 1/4"-20 mounting screw.

PIXMA PRO-10 • PIXMA PRO-100

13 x 19" Professional Inkjet Photo Printers

They produce brilliant, gallery-quality prints up to 13 x 19" on a variety of specialty media and fine art papers. They use long-lasting pigment-based or dye-based inks, bringing all the benefits of the commercial print studio to your workspace. Optimum Image Generating System (OIG) analyzes each area of the print and chooses the best ink mixture so you see the colors they way you envisioned. Print Studio Pro2 plug-in software makes it easy to get amazing results from your favorite photo applications. Connections include Wi-Fi, Ethernet, USB. PictBridge and AirPrint. For media support, they feature two paper trays. A rear tray for a variety of fine art and glossy photo papers, and a manual slot for thicker media to meet your printing needs. Last, they can also print onto your printable CD, DVD or Blu-ray Discs and jackets.

Pro-10 (10-Color)

Utilizes a 10-ink tank system with LUCIA pigment-based inks to produce a wide color gamut and exceptional print longevity on fine art and glossy paper. The printer employs three monochrome inks, including Matte Black, to generate deep, dark blacks when using fine art paper. The addition of Chroma Optimizer to the ink system further improves print quality by enhancing the black density when printing on glossy media types.

#CAPP10..... **699.00**

Pro-100 (8-Color)

The eight-color, PIXMA PRO-100 utilizes the ChromaLife 100+ dye-based ink system to produce vibrant, saturated colors on fine art and glossy papers. Eight separate ink channels offer a level of color fidelity rivaling that of positive filme. Subtle areas– particularly in areas of low chromaticity– are reproduced with proof-standard accuracy. Three monochrome inks are included to enhance black density and produce accurate prints with smooth tonal gradations.

Achieve new levels of skin tone reproduction, accuracy and quality, so your prints exhibit stunning detail. Chroma Optimizer brings uniform ink height over the printed image and regulates surface reflection. Hahnemühle
FINEART

The Hahnemuhle paper mill has been producing quality mould made artists papers for over 400 years. Since its founding they have developed a tradition of excellence in art materials that have now been brought to the digital age. The result is the Hahnemuhle collection of Digital Fine Art papers. Designed for discerning users, these grades of Digital Fine Art paper can be used to create limited editions, giclees, original digital art, traditional output, photographic and historic photographs on a choice of paper textures, multiple colors and a huge variety of sheet sizes and weights. These are available in cut sheet sizes of A4, A3, A2 and are compatible with all inkjet printers up to a printed resolution of 1440 dpi, while printers that feed flat from the bottom and bending the paper up round only being recommended up to 210 gsm. The Hahnemuhle papers work equally well with both dye and pigmented based inks on a wide variety of printers providing a color intensity and crispness not possible with non-coated art papers. The Hahnemuhle collection is manufactured in the traditional mould-made and fourdrinier techniques that artists value for its unique rich look, feel and texture. No longer does the digital artist have to compromise on paper quality when producing or reproducing their work digitally. Surface coating in combination with the traditional paper base and the right inks will produce sharp, high resolution output with the warmth and quality of the hand generated artwork. In many cases it is difficult to identify the original with the copy.

PICTORICO
Inkjet Media

A division of Mitsubishi Paper Mills, Pictorico Inkjet Media was established in 1998 with a single goal: to offer a wide variety of the highest quality output media to the broadest range of inkjet printer users. Today, Pictorico (derived from the Spanish word for "picturesque") serves professionals and enthusiasts with inkjet media of unrivaled performance. Whether for industrial and commercial output or the needs of the digital imaging arts, Pictorico is the choice.

Pro Hi-Gloss White Film

The best choice for any application where output quality is paramount. The film substrate provides a luminous gloss even in areas of the image where there is heavy ink coverage. In addition to its gloss, a high brightness level ensures that your colors will jump off the page. For convenience, it drys very quickly.

PAL Camcorders

In the U.S., the TV system is known as NTSC, which uses 525 scan lines at 30 fps (frames per second). However, PAL uses 625 scan lines at 25 fps. So while camcorders can record video anywhere in the world, its where the video is played back that makes a difference. PAL camcorders are designed to play back in Europe, China, the Middle East, and South Africa. This means that these camcorders don't play back on American televisions.

Canon EOS-1D C

Cinema EOS Camera

Designed specifically for the unique demands of the motion picture industry, the EOS-1D C is a breakthrough in hybrid HDSLR technology – able to record stills, 4K and Full HD video, to either two on-board CF memory cards or time code stamped, uncompressed Full HD to outboard recorders.

With its rugged, ultra-compact form factor and compatibility with over 70 EF-mount lenses, the EOS-1D C is designed to go where other 4K cameras can't go – into hostile environments, cramped spaces, mounted on the end of extended jib arms, or embedded on-set. Cinematographers can shoot feature films from inside cars and planes, or documentaries using underwater housings – allowing a whole new perspective to be captured for the big screen.

- 18.1-megapixel full frame CMOS image sensor lets you capture 4K (4096 x 2160), HD (1920 x 1080); or 18-megapixel (5184 x 3456) still images. 4K is recorded as M-JPEG; HD is recorded as H.264; and still images are recorded as RAW or JPEG. All of the selected motion imaging formats can be recorded as normal gamma-corrected video or with Canon Log.
- With onboard 4K recording at 24p or HD recording at a range of frame rates up to 60p; and HD via HDMI, the EOS-1D C offers additional capabilities for film and TV production. Using the optional WFT-E6A Wi-Fi transmitter users can control the EOS-1D C using web-enabled devices such as laptops, smartphones, and tablet PC's. Adjust shooting parameters, start and stop the camera, monitor a remote feed and input metadata.
- Incredible low-light performance (ISO 100-51,200), ensures optimum image quality in extreme low light—essential for natural-looking image capture when shooting in challenging environments. For capturing stills, the EOS-1D C offers top-of-the-range focusing, exposure, and burst mode.
- Records audio using either the built-in mic or via an external micc and a standard stereo mic jack. Automatically, or manually control sound levels over a 64-step, user-adjusted range. Offers silent adjustment of audio (or exposure) settings with its touch-sensitive Quick Control Dial. Also has a built-in headphone jack.

The XF300 and XF305 step up with three 1920 x 1080 CMOS sensors and Canon 18x HD (29.3-527.4mm equivalent) L-series lens and a full manual focus mode with mechanical "hard" end stops and distance markers for repeatable manual focus. HI-UD (high-index, ultra low dispersion), UD and aspherical lens elements minimize chromatic aberrations and provide a compact size and weight to the lens – while also delivering a resolution of 1000 TV lines. The lens incorporates SuperRange Optical Image Stabilizer (OIS) system with Dynamic and Powered modes for optimal performance in any situation. Otherwise the same, XF305 adds HD-SDI output, genlock, and SMPTE time code (I/O) terminals for multi-camera or 3-D productions.

C300 Digital Cinema Camera
EOS C500 4K Digital Cinema Camera

Canon's Cinema EOS System cameras are engineered to provide exceptional image creation capabilities for professionals in the motion picture, television, and other high-resolution digital production industries. They each feature a Super 35mm-equivalent 8.29-megapixel CMOS sensor, use MPEG-2 Full HD compression, employ 4:2:2 color sampling, and have a maximum recording rate of 50 Mbps. Compact bodies offers exceptional maneuverability, enabling shooting from vantage points all but inaccessible to large cinema cameras.

- Ideal for beginning filmmakers working on a budget, the C100 delivers full 1920 x 1080 HD video in the AVCHD format for compatibility with laptop and desktop editing systems. It has an EF mount making it compatible with over 70 zoom and prime lenses in Canon's EF, EF-S and EF Cinema lens lineups. Designed for extensive operational versatility, the EOS C100 features a mobile core configuration that allows users to add accessory parts according to their production needs.
- Stepping up, the EOS C300 is available in EF- and PL-mount versions and are equipped with four start/stop buttons positioned at various locations to satisfy any preferred camera-holding style, and can be outfitted with a host of accessories, including matte boxes, follow focuses and external video and audio recorders. EF Cinema Lenses

Engineered to meet or exceed the exacting standards of working professionals, every Canon EF Cinema lens is designed to fulfill contemporary 4K production standards, surpassing the performance requirements of any HD imaging system. Zoom lenses feature large aspherical lens elements to achieve sharp, consistent images in virtually every shooting situation. Geared inner focusing minimizes focus-induced changes in the angle of view, reducing focus breathing virtually to zero. 11-blade aperture diaphragms ensure beautiful bokeh – and innovative glass construction counteracts barrel expansion and contraction to avoid temperature-induced marking discrepancies. Each EF Cinema zoom lens or EF Cinema prime lens shares uniform gear position, diameter and rotation angle as well as front lens diameters, enabling the film crew to quickly change lenses without adjustment of the rig setup.

NEX-VG30 • NEX-VG900

Interchangeable Lens Camcorders

Stepping up from the NEX-VG20 (p. 287), the NEX-VG30 features the same 16.1MP Exmor CMOS sensor, BIONZ image processor, Quad Capsule Spatial Array mic, and the Sony E-mount. Plus, it adds XGA OLED Tru-Finder EVF (2,359,000 dots) with eye-sensor, Multi Interface shoe, Picture Effects, can record in 24p or 60p and offers an optional external XLR adapter. For added creative control, a seesaw lever allows slow, smooth zoom capability that is almost impossible to achieve when zooming manually. Extensive manual settings also give videographers greater control and comfort.

For supreme imaging quality, the NEX-VG900 steps-up with a 24.3MP Exmor CMOS full-frame 35mm sensor to fully exploit the artistic potential of interchangeable lenses. Capture full-frame, 24MP still photos with RAW format support for all the post-processing flexibility. PMW-F5 • PMW-F55

CineAlta 4K Digital Cinema Camera

Featuring a modular and compact design for easy configuration, the PMW-F5 and PMW-F55 deliver unprecedented creative options for HD, 2K QFHD and 4K production. Both offer multi-codec support: Sony's XAVC MPEG-4AVC/H.264 format, SR codec (MPEG4 SStP), and XDCAM 50Mbps 4:2:2 codec. In-camera recording is to Sony's new SxS PRO+ memory card media (for the F55, 4K 60p:422 10-bit XAVC and HD 422 10-bit XAVC High Frame Rate); and for the F5, HD XAVC and HD high frame rate). They can dual record in a number of different configurations: Record in parallel to a SxSPro+ card, to both SxS slots with the same or different codecs, and to SxS at the same time as to the AXS-R5 in RAW.

The cameras are further distinguished by wide (14 stops) exposure latitude, high sensitivity, and low noise. The F55 adds a global shutter to eliminate rolling shutter skew and flash band, delivering the same color filter with ultra wide color gamut as the F65 for true color reproduction. .

- Each features a 4K Super 35mm image sensor with a 4096 x 2160 resolution (11.6M total pixels).
- AXS-R5 RAW recorder allows shooters to capture super slow-motion imagery in up to 60p 4K RAW on AXS memory – for 2K RAW, up to 240fps with the F55; and up to 120 fps with the F5 – all without crop factor or loss of angle of view.
- PL-mount prime cine lens technology lets users choose cine optics from Angenieux, Canon, Zeiss, Cooke, FUJIFILM, Leica, Schneider Optics and others. Shooters can use still lenses by removing the supplied PL-mount adaptor. This makes it easy to accept adapters for Canon EF, Canon FD, Nikon DX, Nikon G, Leica M and even 2/3-inch broadcast B4 lenses.

Pro-Light
12v/30v/120v, 50-250w AC/DC Focusing Light

Looks like the i-Light, but adds 30v DC and 120v AC capability. Small and focusable, the Pro-Light is more efficient than a mini-fresnel of equal wattage, yet it gives an exquisite even light, with fresnel like shadow quality, evenly dispersed flood, and a uniform spot with significant barndoor cut. To use as an on-camera light, simply add a DC adapter cable and swapthe bulb.

Blender 120-240V/12VDC LED Light

Makes it possible to fine-tune your lights to match (or contrast with) whatever light you're grappling with. With twin arrays of daylight and tungsten LEDs in one fixture, two simple dials make it possible to dial in the light to exactly the color you choose (from 2800°K to 6000°K). This tiny unit (1.2 lbs and small enough to hold with a pistol grip) puts out a solid 56W of light, and is dimmable from 100% to 10%. Runs on included AC adapter, or an optional camcorder battery sled (Panasonic, Sony or Canon). Also includes front safety plastic and three front diffusers. *(LOBLN10)*.....**494.00**

Manfrotto ML360H
Midi-36 Hybrid LED Panel

As a Hybrid LED light, the ML360H has a flash setting, triggered by a sync cable, that emits a pulse of light 4x brighter than the maximum continuous light it can produce. When used as a continuous light source, 36 LEDs emit a constant 5600°K (daylight), with an illuminance of 420 LUX at a distance of 1m. Its infinitely variable dimmer allows precise control over light output and exposure. Can be hand-held, fitted to supports via ¼" thread or mounted on a flash shoe—horizontally or vertically thanks to its two shoe attachments.

Manfrotto **SYMPLA**

Flexible Mattebox

Unconventional design features an accordion-like rubber hood that serves many purposes very effectively. It allows universal compatibility with lenses from wide to long; it can be pressed up against glass – when you need to shoot through glass – to just about completely block out reflections; it protects the lens against knocks and scrapes; it packs flat for transportability. Mounts and moves along two 15mm rods and vertically adjusts 50mm to align with any lens. Has two 4 x 4" filter holders (one of which rotates). *(MAMVA512W)*.....**607.10**

SYMPLA Mattebox System

This system adds a Variable Plate and 12" rods to the SYMPLA flexible mattebox. The Variable Plate is a quick-release camera plate that adjusts at a lateral axis to offset the camera from the plate's center, at a vertical axis to align the plate higher and lower, and that adjusts back and forth along the rods, exactly the way the Universal Mount does and in conjunction with the Universal Mount.

#MAMVA512WK.....**849.90**

MOVCAM **Mattebox MM1**

SYMPLA
Fig Rig Version

Walk around and make quick and wide movements, holding the rig as a steering wheel with a camera mounted near its lower center.
Universal Mount is attached to that center and can take on 15mm rods (and anything else attached to them). Or, you can remove the mount and attach a camera plate in its stead. The crossbar adds two more 3/8" screw-holes and one 1/4"-20 screw-hole for mounting compatible accessories. *(MAMVA522W)* **329.99**

Manfrotto
SYMPLA
Highly Adjustable DSLR Shoulder Rig

With 3 axis you can slide the camera up and down the rods, offset the camera from the plate's center, and align the plate higher and lower.
This allows the camera to be set up for different types of shots and the viewfinder to be positioned right in front of your eye.
Swivel-joint adjustable handles can be set in almost any position — vertical, horizontal, up-side down, and every other in between. They can be set closer together, wider apart, and rotated 360°, allowing comfort and precision. Once you find the right position, just lock it in place — each handle has its own locking dial (and each handle can be positioned differently). The Handles also help incorporate optional remote controls to the rig. SYMPLA offers two different remote control units for adjusting focus on DSLRs.
Every component of the rig is easily detachable thereby giving you the flexibility to reconfigure your rig with other optional components should you ever want to.

MAGNUS™ VT-4000 Fluid Head Tripod System

Weighing 8 lbs., the VT-4000 is a sturdy video tripod made from anodized aluminum that can support loads up to 8.8 lb. The two-way fluid head provides smooth operation, and features a 65mm half-ball mount with left and right pan bar mounts. The head's tilt angle is adjustable from +90° to -60°. and the head controls are positioned on the left side, which leaves your right hand free for the panning handle. 2-stage leg design allows you to adjust the height of the tripod from 27.6" to 59". The VT-4000 also has separate pan and tilt locks, bubble level for precision leveling and mid-level spreader.

Atlas 10 LTS 35" DSLR Slider Kit

Designed with a ball bearing system that very smoothly slides a DSLR rig up to 10 lbs. in any possible direction – sideways, forward, backward, up, down, panoramically, and at angles. It can also be used as a crane when attached to a tripod, and can optionally be transformed into a counter-balanced vertical pulley system. Included all-terrain legs can adjust to stand firm on all surfaces and to then level off and compensate for any unevenness.

Simultalk 24G Full-Duplex Wireless Intercom with Slimline Headsets

Ideal for production work or houses of worship, the Simultalk 24G is a wireless intercom system that enables two people to communicate freely in real-time, without having to push a button to talk, and without having to wait for the other person to stop talking before they respond. Supplied single-sided Slimline headsets are preferred by video camera operators (dual-sided headsets tend to get in the way when the video camera is mounted on the operator's shoulder). More people can be added to the Simultalk 24G system with the purchase of additional belt-packs and Eartec headsets.
