## GY-HMZ1U ProHD 3D Camcorder

Affordable professional stereoscopic 3D image capture is here. The dual-lens, dual-imager GY-HMZ1U offers 3D video, 3D still image, and 3D time-lapse recording, and can playback 3D video on its 3.5" LCD screen without any special glasses. The camera also records high-definition 2D video as AVCHD, so you can incorporate with any of your traditional HD-capable video equipment and workflows. Twin bright HD lenses (f/1.2 at the wide end) zoom up to 5x in 3D mode and 10x in 2D mode. The imagers are likewise twinned; at 3.3 M/p each, the 1/4.1-type CMOS chips capture dual video signals at Full HD 1920 x 1080 that can be recorded as a single file that's encoded as MVC. This is a variant of AVCHD's MPEG-4 compression that, with its left-eye and right-eye information, contains double the usual information of a comparable two-dimensional HD file.

Along with traditional 2D capture of AVCHD at several selectable bit rates, there are also modes for recording 3D as two half-sized images side-by-side, producing bit-efficient AVCHD files. Falconbird LSI processing enables the recording of 3D video as both 60i, for smooth motion in fast-action shots, and as 24p, for a film-like effect.

Built-in "3D" stereo microphones and dual XLRs for high-quality stereo audio capture from a shotgun mic or wireless audio receiver. (Includes a shotgun mic holder, but microphone is optional.) Audio is recorded in 3D modes as dual-channel AAC for biphonic 3D sound, and in 2D modes its recorded as two-channel Dolby Digital.

### 3-CMOS Handheld and Shoulder-Mount Interchangeable Lens HDV Camcorders

The handheld HVR-Z7U and shoulder-mounted HVR-S270U step up from the HVR-Z5U with a 1/3" bayonet interchangeable lens system. This allows the use of a wide range of lenses from Canon and Fujinon. Both come standard with a 12x Zeiss lens for HD video. These lenses give them the same functionality as Sony's professional fixed-lens camcorders with built-in features such as optical stabilizer, and automatic back-focus adjustment. Using an adapter, users can also attach Sony's Alpha (digital still camera) lenses. The HVR-Z7U uses InfoLithium batteries and has an HDMI output. The HVR-S270U uses BP-GL65 or BP-GL95 batteries, has four-channel audio input, HD/SD-SDI output, and also supports standard-size cassettes for extended recording times (up to 4.5 hours).

### Cine Follow Focus One

The CFF-1 has a modular design that eliminates the need to juggle separate bridge plates. A single snap-on bridge clamps onto either 15mm or 19mm studio rod systems. Numerous mounting options for specialty setups are possible as the main bridge slides independent of the support bridge dovetail. (OCCFF).....**3399.99**
