At the heart of each Lightbank is the CHIMERA Speed Ring. Without the Dedicated Speed Rings (primarily for smaller, open-faced quartz instruments), the Circular Speed Rings (for Fresnels, HMI Pars and some open-faced lights), and the Adjustable Speed Rings (adaptable from 5 to 31.5 inches) we wouldn't have "the best portable Lightbanks for film and video." Thanks to those of you who have given us a try, we will continue to develop Lightbanks and accessories to complement your creativity.

Circular Speed Rings are designed to fit the barn door ears of your light. NOTE this diameter may differ from the standard scrim size used. Double check your Speed Ring selection by measuring the diameter between the barn door ears. Compare this with the figures in the Speed Ring Diameter column in the Circular Speed Ring chart on pages 20-21.

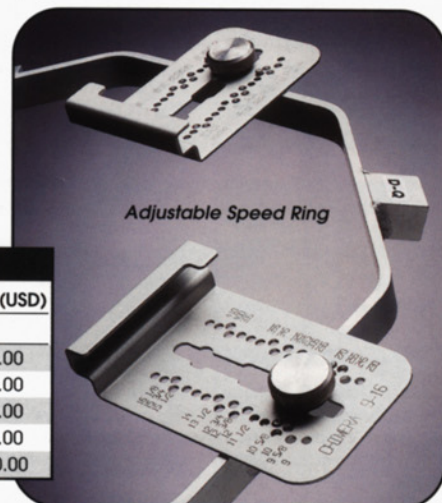

Adjustable Speed Rings are perfect examples of how far CHIMERA has gone to engineer versatile, lighting equipment for the demanding world of film and video production.

Able to fit a large variety of lighting instruments, Adjustable Speed Rings are a great solution when you have an eclectic collection of lights or an unusual lighting instrument.

ADJUSTABLE SPEED RINGS

Diameter		For Lightbanks	Item No	Retail (USD)
in	mm			
5 to 9	125 to 230	Video PRO	9901	325.00
5 to 9	125 to 230	Daylite Junior	9902	325.00
9 to 16-1/8	230 to 425	Quartz and Daylite	9905	750.00
12 to 21-1/2	425 to 545	Quartz and Daylite	9915	850.00
18-1/2 to 31	470 to 788	Daylight Senior	9925	1050.00
