 <p><i>Kenny Says...</i></p>	<p><i>An aerobics or dance instructor's dream. Comfortable, easily-positioned headband and adjustable boom allow for consistent placement and clear delivery under extremely mobile conditions. High output with clear, speech-oriented frequency tailoring. The best-sounding \$40 mic we've heard in a long time.</i></p>	<p><i>Good-sounding dynamic mic with a decent output and lots of value built into its design. The headband construction allows for intuitive placement and a secure fit in seconds. The excellent swiveling mechanism for the mic arm and the gooseneck boom allow for precise locked-in positioning that won't budge under duress. Also available in XLR-wired version. Physical instructors, singing dancers, and other mobile performers will appreciate this mic's performance.</i></p>	<p><i>Self-adjusting headband and foam padding on the sides provide a tight fit. Battery or phantom power supply features a set of roll-off switches and a robust metal construction. Adjustable gooseneck sports full-swivel positioning tilt. The mic sounds good, too – clean, loud, natural, and particularly gracious on the spoken voice. Clinicians, instructors, and lecturers can significantly improve their presentation sound with this mic.</i></p>
