IV. Battery Use

Battery Using Tips:

- Re-charge the battery within 24h after each use.
- Re-charge the battery every 6 months when not in use.
- Remove the battery from Trident for storage.
- For battery storage, keep the battery partially discharged in cool, dry place, where out of the reach of children and away from heat and ignition sources.
- Use the specified adaptor only.
- The battery contains safety and protection devices inside, which if damaged or removed, may case battery to fail or risky of over-heat and explosion.

Caution of Maintenance:

- Do not leave the battery discharged for too long.
- Do not place the battery in water or get wet if not attached to the socket; if the connector is wet, clean and dry it as soon as possible.
- Do not disassemble, damage, short-circuit or expose the battery to fire/heat.
- Do not leave battery to direct sunlight, near fire, stoves or use in very high temperature condition, .
- Do not subject the battery to strong shocks or impact.
- Do not piece the battery with sharp objects, nails, or strike with heavy object; do not step on the battery or damage the outer casing.
- In case of serious corrosion of copper core of the battery connector, please contact the official after-sales service of Geneinno company or authorized dealers for professional technical services.

Please note that improper use and maintenance not following tips above would reduce the battery life and power, and affect the battery performance.

V. Appendix

Product Specifications

Underwater scooter	
Weight	8.2 lbs (3.7kg)
Dimension	19.68×8.2×8.89 inch
	500*209*226mm
Max. Depth	164ft (50m)
Low speed	3.6km/h
High speed	6.5km/h
Operating temperature	0~40℃
External device support	Gopro/Lights etc
Safe Lock	Children safety lock
Gear speed	Low/high speed
Power	
Total thrust	12kg
Total power	Low speed: 180W; high speed: 480W
Battery	
Type	Rechargeable lithium battery
Capacity	6300mAh / 140Wh
Voltage	22.2V
Charge Time	1.5h~2h
