Rigorously tested

All Lexar products undergo extensive testing in the Lexar Quality Labs, facilities with thousands of different cameras and digital devices to ensure performance, quality, compatibility, and reliability.

All Lexar memory cards have been tested under a variety of tough conditions. These cards are proved to be waterproof, temperature-proof and shockproof.

More tips to choose the right card:

- **A useful tip for the CFexpress and SD dual-slot cameras:** Each application or file format requires different memory card. Suggest choosing the memory card based on the camera manufacturers' user manual. For instance, [Canon R5](#), [Sony FX3](#), [FX6](#), [Alpha 1](#), [Alpha 7S III](#), and [Alpha 7 IV](#).
- Lexar® Professional 1066x SD and High-Performance 800x SD only support UHS-I interface.
