

VX7c

7" 3G -SDI Monitor w/ Signal Conversion QUICKSTART GUIDE

What's included

- 1 x VX7c Monitor
 - 1 x AC Adapter
 - 1 x Camera Shoe Mount (SM-103)
 - 1 x DV Battery Plate (Check one)
- BP5-S Sony "L" Series
 - BP5-SU Sony "BP-U" Series
 - BP5-C Canon "900" Series
 - BP5-E6 Canon "E6" Series
 - BP5-P Panasonic "D54" Series
 - BP5-PG6 Panasonic "G6" Series
 - BP5-N Nikon "EN-EL15" Series

CONDITIONS OF WARRANTY SERVICE

- Free service for one year from the day of purchase if the problem is caused by manufacturing errors.
- The components and maintenance service fee will be charged if the warranty period has expired.

Free Service will not be Provided in the Following Situations: (* Even if the product is still within the warranty period.)

- Damage caused by abuse or misuse, dismantling, or changes to the product not made by the company.
- Damage caused by natural disaster, abnormal voltage, and environmental factors etc.

Menu Setup _____ User 1-5
 System Reset

The MANUAL function allows you to change the values of Red, Green, and Blue (RGB).

As an additional tool associated with the VX7c's False Color feature, ikan's exclusive Adjustable Under Exposure and Over Exposed Warning feature gives the operator full control of the VX7c False Color brightness values. By setting the preferred IRE exposure limits, the operator is warned when the image exposure is exceeding or falling under the preset IRE limit, providing customizable, full image exposure control.

This function displays a side by side comparison of the incoming video signal. Pushing the F1/4 button one time will enter the mode. Each time the F1/4 button is pushed it will freeze the current frame on the right hand side of the display while the left continues to display the live signal. Pressing the exit button will exit the window mode. Use Window 1 for 16:9 signals and Window 2 for 4:3 signals.

This function displays the blanking portion of the incoming signal.

Display a crosshair on the center of screen.

The VX7c is equipped with Monochrome Peaking features which highlight the desired focus area in a bright, red outline. The operator adjusts the focus control until the red indicator outlines on the desired area are razor sharp, indicating optimal focus. For the best results, be sure the subject is properly exposed.

The False Color feature utilizes a full spectrum of assigned color indicators, ensuring flawless shot exposure. As the camera Iris is adjusted, the subject of the image will change color based on specific brightness values indicating optimal exposure. See included chart for color assignments.

The VX7c offers adjustable upper Clip Guide levels to accurately display overexposed images in any shooting condition. The operator simply assigns the upper IRE to their preference and any exposure over the set IRE limit will flash in a vivid purple, indicating only the over exposed area.

The DSLR Scaling function will allow users to extend their DSLR camera's HDMI video output any option of four – Normal, 3:2, 16:9 or Full Screen – convenience made simple.

The LCD panel in this display has a native display of 1280 x 800 pixels. A signal of any other resolution is scaled to fit this native resolution. There may be time when it is desired to view the incoming signal without scaling. Enabling Pixel to Pixel mode turns off the scaling and displays a 1280 x 800 pixel window of the original image. Each pixel of the panel displays one pixel of the original image. The user may use the arrow buttons (buttons 3-6) on the monitor face to move the window left, right, up and down to see the desired portion of the image.

A graphical representation of the pixels exposed in your image. The left side of the graph represents the blacks or shadows, the right side represents the highlights or bright areas and the middle section is mid-tones. How high the peaks reach represent the number of pixels in that particular tone. This tool helps you get proper exposure.

A feature that allows you to see what parts of the image are over exposed. It does this by adding black stripes to the parts that are over exposed.

This function recalls user defined values settings .The user setting will remain in memory indefinitely and can be erased by using the reset option in the main menu.

7" 3G -SDI Monitor w/ Signal Conversion QUICKSTART GUIDE

FEATURES

- 1280 x 800 Resolution IPS Panel
- HDMI to SDI / SDI to HDMI Conversion
- Composite, Component, and HDMI Inputs & Outputs
- False Color – Adjustable Luminance & Over Luminance Warning
- Clip Guide – Adjustable Threshold
- Peaking
- Histogram
- Zebra
- Underscan
- Color Temperature Presets (9300K, 6500K, 5600K)
- RGB Adjust
- Guides
- Crosshair
- Guide Masks (Full / 16:9 / 15:9 / 4:3 / 1.5:1 / 1.85:1 / 2:1 / 2.35:1/ User)
- Check Field (Blue, Red, Green, Mono)
- Side-by-Side Freeze Frame
- H/V Delay
- Aspect Ratio (Full / 16:9 / 15:9 / 4:3 / 1.5:1 / 1.85:1 / 2:1 / 2.35:1/ User)
- 5 User Defined Groups
- Tally System (Front & Rear)
- DSLR Scaling
- Moveable Pixel-to-Pixel

SPECIFICATIONS

Diagonal (inch):	7-Inch
Aspect Ratio:	16:10
Resolution:	1280 x 800
Viewing angle:	170° horizontal/170° vertical
Display Technology:	IPS
