INSTALLATION INSTRUCTIONS

ATTACH TO OTHER DST TOOLS

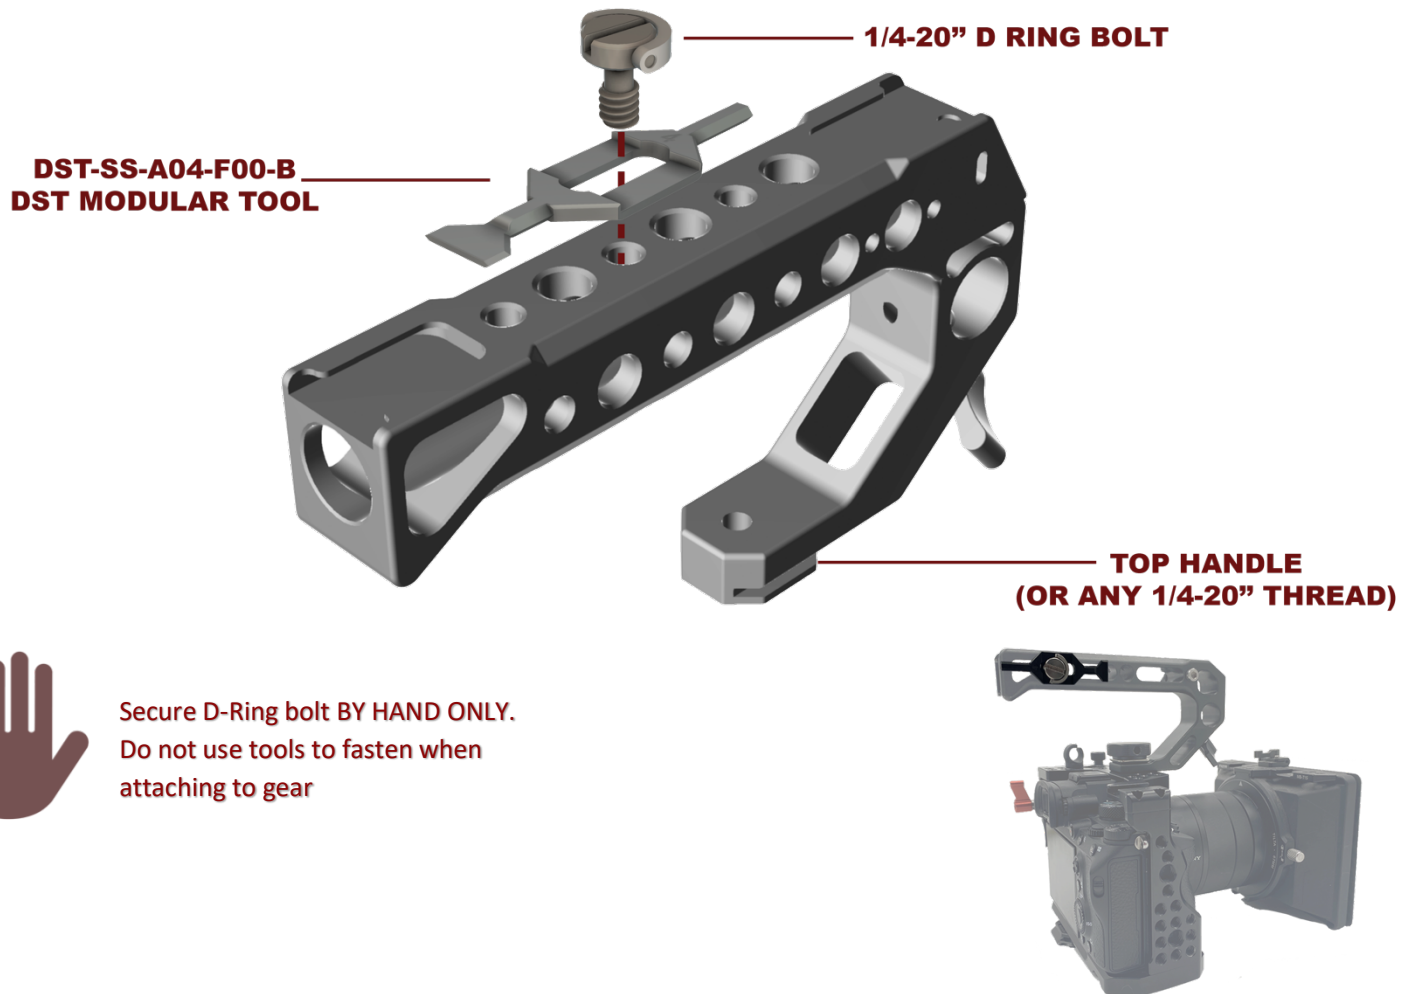

Attach the provided key ring to the "D RING LOOP" on the D-Ring 1/4-20" bolt. Align the notches of both tools, then put the D Ring bolt through the oval holes and secure with the provided Nylon locking nut. Torque down until the tool is securely fastened and is not lose. (Adjustable wrench and #2 flat head required). This assembly can provide additional torque for any stuck fasteners.

After installation the 4 tool assemblby can be attached to your keys or camera bag.

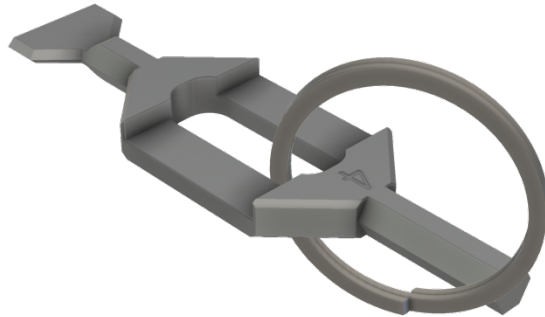

ATTACH TO GEAR WITH 1/4-20" THREAD

The tool can be attached to any 1/4-20" thread using the provided D-Ring Bolt. As in the above example of the top handle place the tool onto the handle, then thread the provided 1/4-20" D-Ring bolt in BY HAND ONLY. To remove simply flip the D-Ring up and twist to remove.

ATTACH TO KEYRING

The tool can also just be used with the provided key ring, simply loop the key ring into the middle oval shaped hole, then attached to your keys.

USING THE TOOL

The tripod flat side doubles as a TSA safe box opener

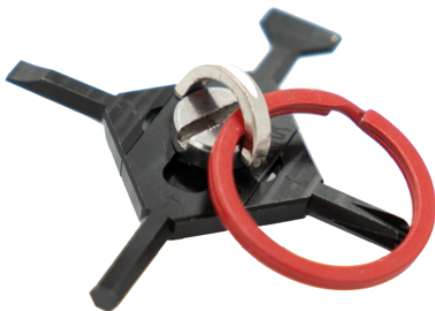

Use the Phillips / Flat head combo for any common fasteners on set

Use the tripod head for any tripod fastener

Use the #4 allen head for any #4 allen key fastener

Assemble in the 4 tool configuration for added torque if needed. Great configuration for stuck fasteners and everyday use
