Allen key

1

Assembling the Frame

- Loosen the two screws by using the Allen key.
- Adjust the frame length to suit the desktop.
- Retighten all screws.

- Attach the telescopic crossbar to the lifting columns as shown by using the screws identified in the illustration.

- Tighten all screws with a proper screwdriver.

2

Installing the Side Brackets

- Attach the two side brackets to both ends of the frame by using the four screws and tighten all screws with an Allen key.

Tools
Needed

- Drill mounting holes under the desktop, then remove the desktop.

Attention: the maximum depth of holes is 3mm.

3 Installing the Feet

- Place the feet on the lifting columns as shown.
- Insert the screws as shown and fix them under the lifting columns.

4 Installing the Sync Rod

- With the frame positioned upright, turn the knob as shown counterclockwise to loosen the sync rod.
- Adjust the sync rod to match the frame's width then.

- Notice: Match the red line on the sync rod with the right side of left leg. Match the right side of the right knob of the sync rod with the red line on the rod of the gearbox.
- Retighten the sync rod by using the knob.

5 Installing the Desktop

- Place the desktop on the frame and insert the desktop mounting screws.
- Tighten all screws.

- Insert the drive rod module into the upper part of the lifting column as shown.
- Fix the fixing plate onto the back of the desk by using the screws identified in the illustration.

- Each foot pad can be adjusted independently for fine tuning.
- Slightly turn the foot pad to lower or raise the base.
- Use a level to make sure the desktop is even.
