

# W.I.E.M.S. WIRELESS IN-EAR MONITOR SYSTEM

## CONGRATULATIONS!

On your purchase of the new ProCo W.I.E.M.S.

*The Music Industry's most compact and lightweight "wireless" in-ear monitoring system on the market today.*

### Features:

- Crystal clear 24 bit/48KHz digital transmission
- Operates at 5.8GHz (free from competing wi-fi traffic)
- Compact, lightweight, aluminum belt-pack
- No external antennas
- Simple "Plug-N-Pair" system
- Low Latency (<5.6ms)
- 20 to 30 meter range (l.o.s)\*
- Uses an internal rechargeable battery
- 6-8 hour battery life per charge
- Four selectable channels
- Accepts a line-level signal
- Up to 4 Systems can be used simultaneously

\*Actual range can be affected by environmental conditions. "Line of Sight" is highly recommended for best performance

Package contents:

- Hardshell case with accessory pouch
- Receiver
- Transmitter
- AC/DC charger adapter
- Charging "Y-cable"
- Instruction manual
- Registration/Warranty card

\*ear-buds are not included

### FCC Compliance and Certifications:

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

This symbol indicates that your product must be disposed of properly according to local laws and regulations. When your product reaches its end of life, contact the retailer where the product was purchased or your local authorities to learn about recycling options. This product should not be mixed with other commercial waste for disposal.

### W.I.E.M.S. RECEIVER: (Belt-Pack)

**1.Power** – Press and Hold Power Button for 2 seconds to turn on, then release. To turn off, hold Power Button down for 3 seconds.

**2.Volume** – Rotate the knob on top of the receiver "clock-wise" to adjust the volume.\*

**3.Power LED and Pairing LED** – Solid green LED indicates power on. A flashing blue LED indicates "Pairing Mode" while a solid blue LED indicates unit is "Paired".

**4.Headphone Jack** – 1/8" (3.5mm) TRS Stereo.

**NOTE:** Normally the Receiver will automatically pair to the transmitter, but if pairing is necessary, simply press and hold the "Pair-Button" for 5 seconds, then release. The blue LED will start blinking (Pairing Mode). A solid blue LED will indicate "Paired".

**\*CAUTION!** Using this item at high volume levels can cause hearing damage

### Additional Operating Instructions:

Although your new W.I.E.M.S. was paired & fully charged at the factory before shipping, we recommend you charge both units for approximately 2 hours before use.

**Battery** – When either unit is on, an alternating flashing red and green LED indicates the battery is low and in need of charging. The green LED will flash once per second when charging. When the green LED goes out while charging, and the unit is off, it is fully charged. You should get 6-8 hours of continuous use from a single charge. The Transmitter can be used while charging.

**Selecting channels** – With the system on, quickly press and release the transmitter "Pair" button , the blue LED will flash representing the desired channel is obtained.

**Pairing** – With the receiver off, power on the transmitter. Hold down the transmitter's "Pair" button for 5 seconds and release. The blue LED will blink slowly (about once per second). Power on the receiver, the blue LED will start blinking fast and par to the transmitter automatically (solid blue LED). On occasion, it may be necessary to put both units in pair mode.

**Powering off** – Press and hold power button for 3 seconds to power units off.

### W.I.E.M.S. TRANSMITTER:

**1.Power** – Press and hold for 2 seconds to turn on, then release. Press and hold for 3 seconds to turn off.

**2.Pair Button/Channel Select** – (see Additional Operating Instructions on next page).

**3.Charging Port** – Plug micro-USB cable here to charge.

**4.Status LEDs** – Solid green LED indicates "Power On". A flashing blue LED indicates "Pairing Mode" and a solid blue LED indicates "Paired". The blue LED will also indicate channel selection. (See Additional Operating Instructions).
