DIMENSIONS & WEIGHT CAPACITY

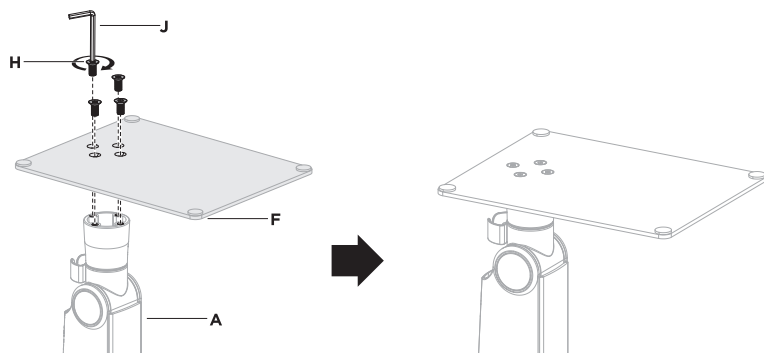

Rated weight capacity is 17.6lbs for each arm.
Caution: Ensure all mounting surfaces are capable of holding the weight of your mount. **DO NOT EXCEED MAXIMUM LISTED WEIGHT CAPACITY.** SERIOUS INJURY OR PROPERTY DAMAGE MAY OCCUR!

Step 1

Connect the Base and Arm

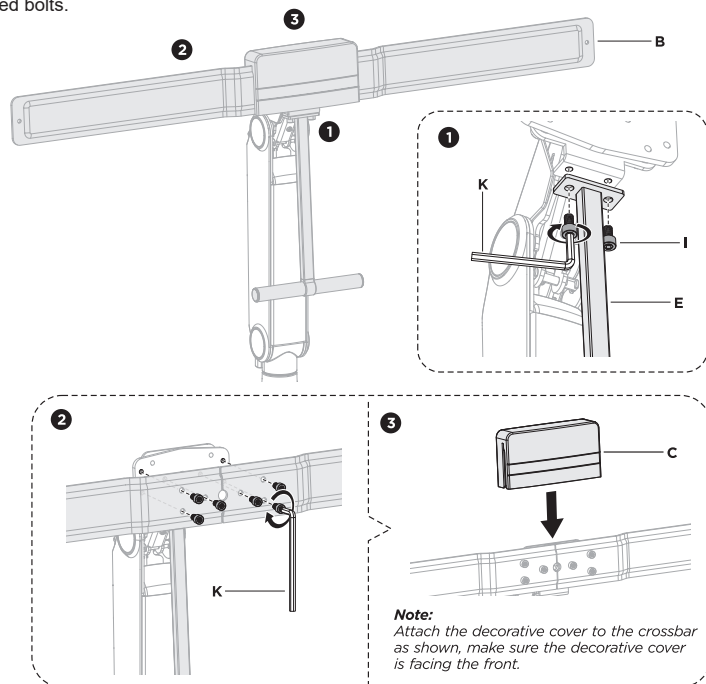

- Connect the Stand Base (#F) to the bottom of the Stand Arm (#A) using the Bolts (#H) and tighten until secure using the 4mm Hex Wrench (#J)

Step 2

Assemble the Monitor Arm

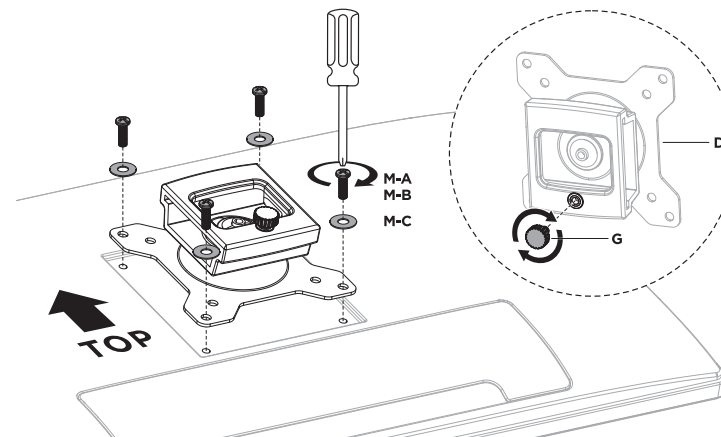

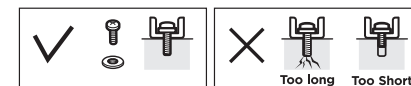

1. Attach the Handle (#E) to the lower bolt holes on the stand arm using Bolts (#I) and tighten using Hex Wrench (#K)
2. Attach the Horizontal Arm (#B) to the front of the stand arm using Bolts (#I) and tighten using Hex Wrench (#K)
3. Place the Decorative Cover (#C) over the middle of the horizontal arm so that it fully covers the installed bolts.

Step 3

Attach the VESA Plates to the Monitors

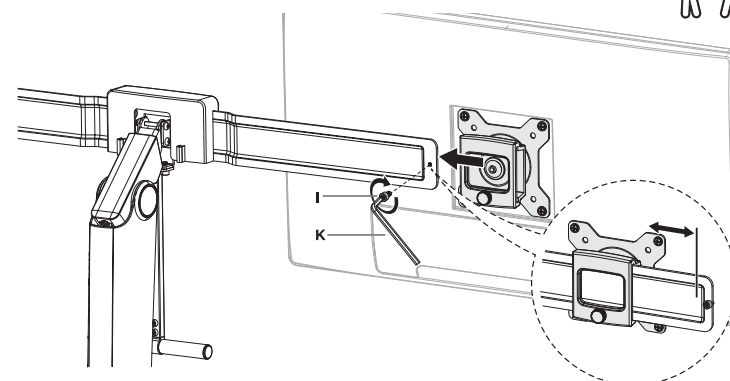

- Select the appropriate size mounting bolt (#M-A, M-B) and washer (#M-C) for your monitors mounting holes and verify the length of the VESA bolt is not too long. If you are unsure of the correct bolt size for your display refer to your monitor user manual or contact the monitor manufacturer for sizing information. Attach the VESA plate to the back of each monitor using the selected bolts and washers in the orientation shown here.
- Insert the Hand Knobs (#G) into the bolt holes on the back of the VESA Plates.

Step 4

Attach the Monitors to the Horizontal Arm

- Slide the brackets on the back of the VESA Plates onto the ends of the Horizontal Arm. Once the monitors are in the desired positions fix them in place by tightening the hand knob installed in the previous step 3.
- Once the VESA Plates are on the arm, install 1 each of the Bolts (#I) to the end of each arm to prevent the monitor from being accidentally removed.

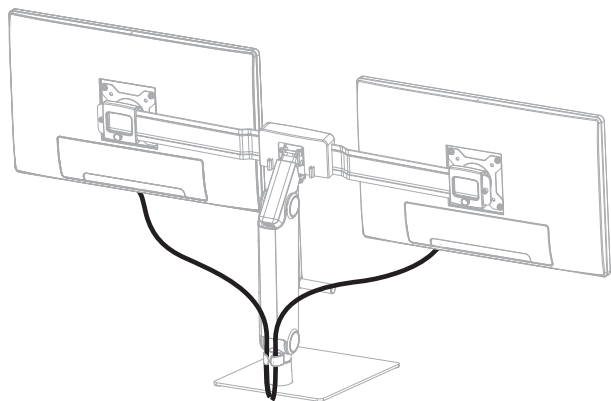

Caution: Keep a hand on the stand when mounting the monitors to prevent the stand from tipping. Identical monitors should be used to prevent balance issues.

Step 5

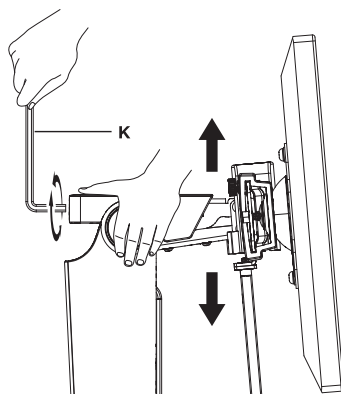

Cable Management

- Monitor cables can be routed through the cable clip on the back of the arm.

Step 6

Final Adjustments

To properly balance the arm with monitors mounted, adjust the spring tension using the supplied Allen Key as follows:

First, position and firmly hold the arm horizontally as shown. Ask for assistance should you require it.

CAUTION: To avoid damage to monitors or mount, always keep the arm in a horizontal position while making adjustments. Again, ask for assistance if required.

If the arm **drops**, turn the adjustment screw clockwise until it stays in a horizontal position.

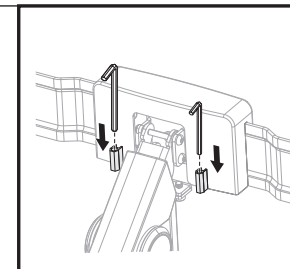

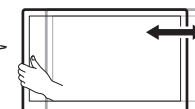

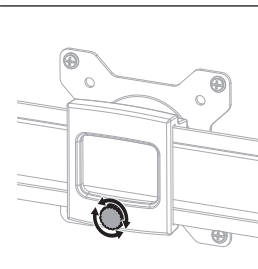

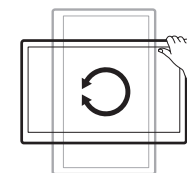

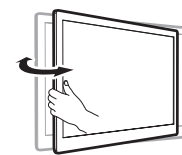

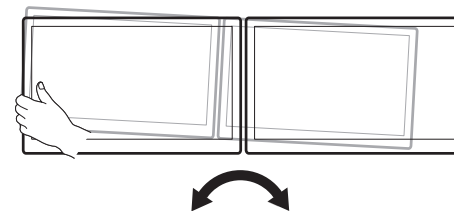

If the arm **rises**, turn the adjustment screw counter-clockwise until it stays in a horizontal position.

CAUTION: DO NOT over tighten the screws.

- The monitors can be turned left to right $\pm 25^\circ$, tilted forward or back $\pm 10^\circ$ and rotated 90° to alternate between landscape and portrait orientations.
- The monitors can be slid left to right on the horizontal arm by loosening the hand knob on the back of the VESA plate, adjusting to the desired location and then tightening the knob back down.
- Stow the Hex Wrenches on the back of the decorative cover for convenient access.
