K60
RGB Light Stick

Product Functions

K60 is a kind of K60 RGB light tube lamp, the max. power of which is 20W. Featuring its high light effect, accurate color temperature, high rendering restoration, etc., the lamp is designed with high rendering colors and RGB beads. It's applicable to supplementarily lighting in such scenarios as live streaming, product shooting, creative shooting, etc.

Product Features

- 21 scenario effects
- Four operation modes: CLT/RGB/Scene/Scene
- 100% full color, meeting your color requirements for light
- 0.1s high-speed response
- Wide range of color temperatures: 2,000K-8,000K
- 100% full color, high brightness
- A total of 266 high-quality lamp beads, which emit light evenly
- High-quality anti-tube surface, easy to attach soft light effect
- Multiple control methods: control panel, mobile APP, remote control (user needs to purchase it separately)

Precautions

- Do not use this device to harm eyes or close ranges
- Do not subject this device to strong vibrations, otherwise, its components may be damaged
- Do not disassemble or repair the device by yourself, otherwise, the device may malfunction
- Do not expose this device to high temperatures; otherwise, the device may be damaged
- Do not cover any items that affect heat dissipation on the lamp body
- High temperature will cause a safety hazard. When the device is used at high temperature, it is normal for the lamp to have a high temperature (about 50°C)
- Do not immerse the device in water or expose it to rain. This device is not waterproof
- The battery of this device is used when leaving the factory. Charge it before using it. The battery capacity will change to more than 80% for storage. If this device is used for a long time, charge it every six months. The power depletion duration is 100 hours.

Thanks for choosing VILTROX fill light!

Please read the operating instructions carefully so that you can know about and use all the functions of the fill light.

取扱説明書

K60

RGB ステックランプ

※ 追加の機能

LEDの明るさを1段階から9段階まで、最大出力は30Wです。緑・黄・赤の3色LEDと白LEDを併用して、暖白色から青白色、色温度が正確で、発光色と電圧との相違がほとんどない、高品質な、高輝度な照明を実現することができます。

製品の特長

- ・LEDの明るさのシーティングが非常に優れている。
- ・他の多くのモデルで2段階、3段階の明るさ。
- ・約360°の明るさで、光の色が非常に正確です。
- ・約1000lmの明るさ。
- ・色温度調整範囲：2500K - 8500K。
- ・LEDの色温度を正確に調整できる。
- ・100に達する明るさの製品品質です。
- ・高品質のアルミ合金とガラスで、最もよく知られた高品質な製品です。
- ・さまざまな調整方法（コントロールボタン、リモコン、携帯電話とBluetoothの両方）。

△ 注意事項

1. 上記の安全の目印について本装置を修理しないでください。
2. 本装置は、火災、感電を発生する可能性があります。故障が原因で火災や感電が起きる可能性があります。
3. 本装置を修理する前に電源を切り、電源の切断が必ずあります。
4. 本装置を修理する前に、電源の切断が必ずあります。
5. ランプは、熱気体を含むものを使用してはならず、ガラスが破損する可能性があるためです。本装置を修理する前に電源を切断する必要があります。
6. 本装置は、火災、感電を発生する可能性があります。
7. 本装置は、火災、感電を発生する可能性があります。
8. 本装置は、火災、感電を発生する可能性があります。
9. 本装置は、火災、感電を発生する可能性があります。
10. 本装置は、火災、感電を発生する可能性があります。

Parts Identification

Operation Instructions

Battery Instruction

1. Press the power button.
2. Set battery switches between modes.
3. Switch key: switch between functions.
4. "++" means: adjust the parameter value; (Long press to quickly increase/decrease the parameter value; and Short press to increase/decrease one parameter value).
5. Type-C interface: power interface.
6. Switch button: stop press the switch.
7. The hot button interface accessories can be installed.
8. (X) = 0 is a long-press function in case of exceptions such as shutdown failure, press the button to restore.

Power Supply Mode

If the <X>=0 icon appears, the built-in battery supplies power.

If the <X>=1 icon appears, the power source is power supply; when the <X>=0 icon appears, the <X>=1 power source is power supply.

Shutdown status:

- dynamic icon <X>=0 icon appears, the power source is charging; if the <X>=1 icon appears, the power source is fully charged.
- dynamic icon <X>=0 icon appears, the battery is fully charged.

Note: Using the charging during the charging process will increase the charging time to about 1.5 times the normal charging time. When the device is over a state of charge with a current greater than 2A, it is preferred to choose the fast charge with PQC protocol for protection for the battery. (PQC can only be used for charging, and power supply will stop for the APP).

Channel/Group settings

CHAN mode

GRP mode

When press <SET> to enter the channel/group setting page, press <+> to increase the channel number, and press <-> to reduce the channel number. When press <SET> to enter the channel/group setting page, press <+> to increase the group number, and press <-> to reduce the group number (consistent with the APP).

A) Mobile App Dimmen

Apple-Systeme: Scannen Sie "Weatlyth" in "Wallet" App. Laden Sie die App herunter und installieren Sie sie auf Ihr Mobiltelefon, oder scannen Sie den QR-Code zum Herunterladen.

Android-Systeme: Scannen Sie den QR-Code, um die App herunterzuladen.

App Store herunterladen Google Play herunterladen

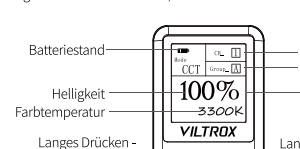

Scannen zum Herunterladen Scannen zum Herunterladen

Verbinden:

1. Laden Sie Bluetooth ein und gehen Sie zu "Handy App "Weatlyth".
2. Stellen Sie die Kanal- und Gruppennummer der App ein, die Sie mit der Kanal- und Gruppennummer der Anlage verbinden möchten.
3. Auf der App wird die Kanal- und Gruppennummer der Anlage aufgeführt. Auf die Gruppennummer auf eingestellt ist, sollte der Kanal der Handy-App mit der Gruppennummer auf eingestellt werden. Wenn die Parameter nicht übereinstimmen, kann es nicht gestartet werden.

B) Dimmen mit Fernbedienung (appart erhältlich)

Dieses Gerät unterstützt die Fernbedienung "RC-112" zum Dimmen. Für die Verwendung müssen Sie die Kanalnummer und die Gruppennummer eingestellt werden. Die Kanalnummer und die Gruppennummer der Lampe und der Fernbedienung müssen übereinstimmen.

Operating Instructions of Remote Control		Specification
1. Long press RC-1 "Power" switch for 2s and RC-1 power supply and display screen will be on.		Color temperature range 2500K-6500K(adjustable)
2. Set the name "channel No." for 2s and RC-1 power supply, by referring to "the controlled device" and "channel No." LED indicator light cannot be controlled if the "channel No." and "group No." are different.		Color temperature range 2500K-6500K(adjustable)
3. Press "Channel No." setting button for 2s and choose the channel required by + buttons, then press "MODE" button for confirmation.		Range of color phase 0°-360°(adjustable)
4. Press "setting" button for 2s and choose the group required by + buttons, then press "MODE" button to switch among 4 groups, including CH1/CH2/RGBW/RGB.		Maximum luminous flux 1500lm
5. Short Press "MODE" to switch among groups. Press + or - to set the value of groups.		Maximum luminous flux 1800lx (1000lx/5000lx/50lx)
6. The power supply will switch automatically if RC-1 is not operated for 30 min after power on.		Power 20W
		The number of lamp beads 10x10PCS/4mm diameter 4016PCS/squarely
		Built-in lithium battery 1.4x12200mAh
		APF remote control distance 100meters (without obstacles, it will be affected by the environment and the distance will be adjusted in the use)
		Color-rendering index Ra>90, TLCI >90
		Power interface Type: interface, 5V/3A/9V/12A/12V/24V
		Battery life About 1.5h (100% power)
		Charging time About 2-4h (determined by charger power)
		Product size 48mm x 48mm x 38 mm
		Weight About 56G (56g ± 2g)

Tip: If several lights are used for shooting, do not change the channels between them at all while shooting. They set different lights into groups, such as including light A into group A, light B into group B, light C into group C, and so on. When the shooting is over, the lights should be set back to the original state, so as to avoid the groups and easily lead to group A, group B, group C, and so on, which will also occupy the channels of others and easily lead to group A, group B, group C, and so on.

Warning: Please do not use the remote control for a long time, because the battery will be consumed too fast.
