

Thank you for choosing Bolt

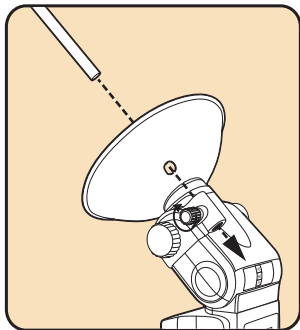

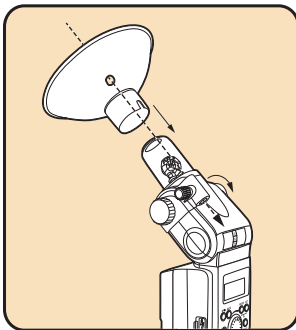

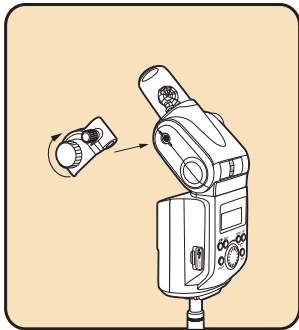

One-year limited warranty

Congratulations on the purchase of your Bolt Umbrella Mounting Kit for the VB-Series Bare-Bulb Flashes. The included wide angle reflector and umbrella bracket enable you to project full and even lighting onto an umbrella, providing ideal direction, quantity, and quality of light. **To install the umbrella mounting kit, please follow these steps:**

Install the bracket into the VB-Series Bare-Bulb Flash's umbrella bracket mounting hole, and tighten the knob securely.

Slide the wide-angle reflector over the bulb and into the accessory mount, aligning the hole with the umbrella mounting bracket. Tighten the accessory mount knob to secure the reflector.

Slide the umbrella shaft through the hole in the reflector and into the umbrella mount. Use the thumb screw to tighten the umbrella into place.

NOTE: The umbrella bracket supports umbrellas up to 45 inches and shafts up to 8 mm.
