# 1 For bolt through installations, drill hole in the work surface

## 1.1

Mark out hole position on the work surface. Use Clamp Plate as a template.

## 1.2

Drill the hole using a suitable drill bit. Ensure the hole is drilled perpendicular to the work surface and the edges of the clamp are positioned fully on the desk.

### TIP

When positioning the desk clamp, offset the clamp to the left or right of the seating position. The monitor will then be centred for the user.

# 2 Attach Arm Spigot to Clamp Plate

## HINT!

Hold Arm Spigot and Clamp Plate together, locating the dimple in the slot, before hand tightening the screw into the spigot.

## 2.1

Screw M8 Stud Bolt through Clamp Plate into Arm Spigot.

## 2.2

Tighten firmly with 4mm Hex Key supplied with Arm.

# 3 Attach plate assembly to desk

Place Clamp Bar over M8 Stud Bolt under the desk as illustrated and secure Flange Nut with spanner.

## TIP

Support plate while tightening to maintain the correct orientation on the work surface.
