

AIRWAVE TECHNOLOGIES

AT-5200

Wireless Microphone System User Guide

AIRWAVE TECHNOLOGIES

Thank you for purchasing the Airwave Technologies AT-5200 wireless systems. The AT-5200 Series can be used in a variety of ways including live performances, public speaking, entertainment venues, and the recording arts requiring systems of 16 channels or less.

Warranty Information & Technical Support

At Airwave Technologies, we believe in and stand behind all of our quality products. Any reasonable warranty claim will be honored within a one year period. If anything is defective, simply call 305-891-7399 for an RA#, write it on the out side of a shipping box, and send us the defective piece or system, and we will gladly repair or replace it for you. Please contact an Airwave Technologies dealer near you for parts and accessories for your wireless system.

Service Phone Number - 305-891-7399
Service email - Service@AirwaveTechnologies.com

FCC Statement

FCC ID: 2AINTU-51, 2AINTU-52 - This equipment has been tested and found to comply with the limits for a class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures

- Reorient or relocate the receiving antenna
- Increase the separation between the equipment and receiver
- Connect the equipment into an outlet on a different circuit
- Consult the dealer or an experienced radio/TV technician for help

This equipment has been verified to comply with the limits for a class B computing device, pursuant to FCC Rules. In order to maintain compliance with FCC regulations, shielded cables must be used with this equipment. Operation with non-approved equipment or unshielded cables is likely to result in interference to radio and TV reception. The user is cautioned that changes and modifications made to the equipment without the approval of manufacturer could void the user's authority to operate this equipment.

System Components

AT-5200 UHF PLL Diversity Wireless Receiver
Transmitters (Depending on Configuration)
2 Antennas
Combo Rack Mount / Antenna Front Mount Kit
with Mounting Screws, Cables, BNC Connectors
Power Adapter
Four 1.5V "AA Batteries
User Guide

AT-U51
Handheld Transmitter

AT-U52
Bodypack Transmitter

AT-LAV2
Lavalier Transmitter

AT-5200 Receiver Front Panel Features

- 1 Power Button - Press for 2 seconds to turn on, hold longer to turn off.
- 2 “ASC” Infrared Frequency Button - Press this button to establish infrared connection between the receiver and the transmitter.
- 3 Infrared Frequency “IR” Window
- 4 LED Display
- 5 Auto Button for Fast Frequency Sweep
- 6 Set Button - To set all functions showing on the screen.
- 7 8 Quick Up and Down Channel Setting Buttons

AT-5200 Receiver Rear Panel Features

- 1 Antenna Jack B 50 ohm
- 2 Antenna Jack A 50 OHM
- 3 1/4" Mix Output Socket
- 4 XLR Mix Output Socket
- 5 XLR Output Socket Channel 2
- 6 XLR Output Socket Channel 1
- 7 DC Power Adapter Socket

U-51 Handheld Transmitter Features

Changing Batteries

Two Alkaline batteries should provide power for approximately 10 hours. When the power indicator on the display is flashing, batteries should be replaced immediately as shown below.

Icon	Function
	Transmitter Intensity Indicator
	Battery Power Indicator
GR CH 470.000 MHz	Frequency Setting
	Mute Icon
	Microphone Gain Value

Mute: Tap the power button to mute handheld transmitter, the icon will be displayed. Tap the power button again to clear mute.

(1) Microphone Gain Adjustment Display

(2) Transmitting Power Level Display

(3) Frequency Setting Display 470.000

(4) Low Power Tip: If the battery icon shows less than 30%, replace batteries immediately. Battery icon will Flash prior to shutting off.

U-52 Bodypack Transmitter Features

- ① Antenna
- ② Power Indicator Light
- ③ LED Screen
- ④ Infrared Frequency (IR) Window
- ⑤ SET Button
- ⑥ UP Button
- ⑦ Power / Mute Button
- ⑧ 3-Pin Microphone Input

Wearing the Bodypack Transmitter

- 1 - Transmitter Clamped to a Belt
- 2 - Transmitter Clamped to Guitar Strap

Changing Batteries

Two Alkaline batteries should provide power for approximately 10 hours. When the power indicator on the display is flashing, batteries should be replaced immediately as shown below.

Frequency Selection Guide

Radio frequencies used for wireless communication in most countries including the United States are under strict control and regulations. These regulations specify which devices can be used at what frequency and tend to limit interference within the frequency bands.

To ensure consistent reliable frequency availability and to minimize the interference that might occur the user can choose frequency bands between 470 and 489 MHz or 514 and 542 MHz.

For the user's convenience, preset frequency groups have been created to minimize intermodulation distortion. When using multiple receivers and transmitters each system must use a separate and different channel. Grouping the receivers and then using separate channels on the transmitters will provide the best frequency use and distribution.

When using up to 3 units (max of 6 channels) in the same frequency range, the wireless microphone system does not require an antenna combiner under normal conditions. If using 4 to 7 units (8 to 14 channels) the use of an approved antenna combiner is highly recommended.

For assistance in selecting the best operating frequency range in your zipcode, you may call Airwave Support at 305-891-7399

Navigating The Menu On The Receiver (AT-5200)

1. Hold **SET** button for 3 seconds to unlock display.
2. Press **SET** button again and you will scroll through the different settings on the display. Volume (default), **GR** Group, **CH** Channel, **SQL** Squelch, **RF** (Radio Frequency) Range, & **Gain**.
3. Selected setting will flash.
4. Press up and down buttons to change selection values.
5. System saves settings and auto locks when idle for 10 seconds.

Syncing Transmitters (U-51 Handheld or U-52 Body Pack)

1. Turn **ON** transmitter and lower or remove its battery cover. Locate its IR transmission window.
2. Press the **ASC** button on receiver to sync its setting to the transmitter. Receiver will transmit selected group, channel, and gain adjustments for approximately 25 seconds.
3. Hold up the IR window of the transmitter to the IR window of the receiver about 3-6" apart during the 25 second IR transmission cycle. NOTE*** On units manufactured after 2021, the ASC button acts as an ON / OFF toggle. Long pressing the button will not activate the syncing sequence. Lightly press the ASC button and the IR Window Icon will flash during IR transmission.
4. Verify matching channels and settings between the transmitter and receiver. The RF meter of the receiver should have full bars across the screen with matching frequency. The AF meter should display bars when you speak into the transmitter.

Syncing Transmitters

U-51 Handheld & U-52 Bodypack Transmitter: Turn ON transmitter and lower or remove the battery cover to locate the IR transmission window.

Press the **ASC** button on the receiver to sync its setting to the transmitter. The receiver will transmit selected group, channel, and gain adjustments for approximately 25 seconds.

Hold up the IR window of the transmitter to the IR window of the receiver at a distance of 3" to 6" apart during the 25 second transmission cycle.

Verify matching channels and settings between the transmitter and receiver. The RF meter of the receiver should have full bars across the screen with a matching frequency. The AF Meter should display bars when you speak into the transmitter.

When more than one system is used, only IR window of one transmitter should be pointed to the receiver for each infrared connection.

5 Antenna Combiner & Amplifier
(Optional Accessory)

Important Safety Instructions

Transmitter and antenna should remain in line of sight for best signal reception.

Do not place the receiver in close proximity to a metal surface or near any digital device.

Receiver should be placed 3' off the ground and have space surrounding to ventilate.

Ventilation holes should not be covered.

Two-way radios can interfere with any audio transmission. Insure the transmitter and receiver are far from these devices to eliminate potential sources of interference.

Receiver should not be placed in direct sunlight and should be kept away from any water sources or open flame.

Nominal operating temperature is 23° F ~ 122° F

Troubleshooting Guide

Problem	Indicator (lamp) state	solution
No sound or faint sound	Transmitter Power Light Off	Confirm main power is on Confirm batteries are inserted correctly +/- Confirm batteries in transmitter are charged
	Receiver Power Indicator Off	Confirm AC power is connected to receiver via power jack. Confirm AC power supply is normal Confirm Voltage on power supply is normal
	Receiver RF Indicator illuminated	Adjust high receiver volume control Adjust high transmitter gain switch setting Check receiver / amplifier / mixer connections
	Receiver Power Indicator Off Receiver RF Indicator illuminated	Ensure receiver is away from metal surfaces. Ensure space between transmitter and receiver is free of obstacles. Verify transmitter and receiver are using the same frequency.
	Low-voltage light on transmitter	Replace Batteries in Transmitter
Distortion or excess noise	RF Signal illuminated on receiver	Ensure that no potential sources of interference are nearby. (CD players, computers, digital devices, ear monitoring systems). Set receiver and receiver to a different frequency. Reduce the transmitter. signal Replace batteries. If using multiple systems - increase frequency interval between the systems.
Distortion level gradually increased	Low Battery Indicator flashing	Replace Batteries in Transmitter
Output has feedback and / or distortion.		Adjust the transmitter and receiver volume to appropriate levels.

AT-5200 DUAL CHANNEL WIRELESS RECEIVER SPECIFICATIONS

Frequency Range: 470~489MHz / 514~542 MHz
Infrared Data Synchronization
Band Width: 19MH / 28MHz
Working Range: 328'
Receiving Sensitivity: < -92dBm for 30dB S/N Ra
Frequency Response: 50Hz~15KHz (± 3 dB)
Maximum Frequency Offset: >+/-50KHz
Signal to Noise Ratio: >100dB (A)
THD: <1% to 1KHz
Gain Control Range: 0 to 63dB per 1dB Step
Dynamic Range: >102dB
Audio Output Level: XLR: +8dBV / 1/4-inch connector: +8dBV
Audio Output Connectors: XLR Each Channel / XLR Mix / 1/4-inch connector
Impedance: XLR: 3K Ω / 1/4-inch connector: 3K Ω
Antenna Connectors: 2 BNC 50 Ω
Display: LCD
Power Requirements: 12V/0.5A DC
Operating Temperature Range: 28°F - 122°F
Dimensions: 6.299" (W) x 16.142" (L) x 1.732" (H)
Weight: 3.86 lb.

AT-U51 HANDHELD MICROPHONE TRANSMITTER SPECIFICATIONS

Frequency Range: 470~489MHz / 514~542 MHz
Replaceable Capsule
Infrared Data Synchronization
Capsule Frequency Response: 50Hz~15KHz (± 3 db)
Capsule Sensitivity: -50dB \pm 2dB V/PA@1KHz
Capsule Directivity: Single Point
Signal to Noise Ratio: >100dB (A)
Gain Adjustment Range: 0 / -3/ -6 / -9 dB
Input Impedance: 5K Ω \pm 30% @ 1KHz
Output Impedance: 400 Ω \pm 30% @ 1KHz
Maximum Modulation Depth: >+/- 50KHz
3-Stage RF Power Adjustment: 2mW / 10mW / 30mW
Display: LCD
Power Requirements: 2 x 1.5V (AA)
Battery Life: >8H/1300mAH
Dimensions: 9.84" x 1.97"
Weight: 12.7oz

AT-U52 BODYPACK TRANSMITTER SPECIFICATIONS

Frequency Range: 470~489MHz / 514~542 MHz
Infrared Data Synchronization
Frequency Response: 50Hz~15KHz (± 3 db)
Gain Adjustment Range: 0 / -3/ -6 / -9 dB
Input Impedance: 5K Ω
Maximum Modulation Depth: >+/- 50KHz
3-Stage RF Power Adjustment: 2mW / 10mW / 30mW
Harmonic Rejection: > 50dB
Pilot Tone: 32.768KHz
Display: LCD
Power Requirements: 1.5V x 2(AA)
Battery Life: >10H/1300mAH
Dimensions: 6.5" x 2.56" x .91"
Weight: 4.59oz
