DIMENSIONS & WEIGHT CAPACITY

Rated weight capacity is 4.4lbs for the mount.

Caution:

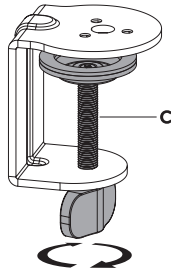

Ensure all mounting surfaces are capable of holding the weight of your mount.
DO NOT EXCEED MAXIMUM LISTED WEIGHT CAPACITY.
SERIOUS INJURY OR PROPERTY DAMAGE MAY OCCUR!

Step 1

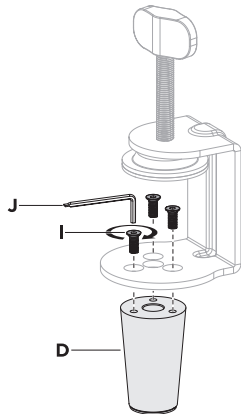

Step 1a

Clamp Mounting Option

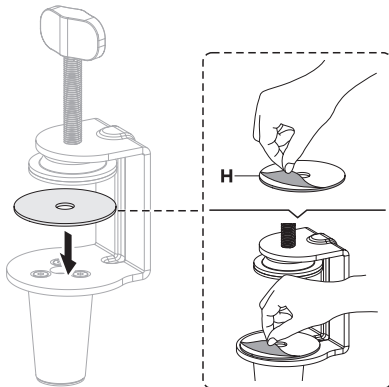

- Open the Clamp Base (#C) until it is at the maximum width by rotating the hand knob counterclockwise.

- Attach the Mount Base (#D) to the Clamp (#C) using Bolts (#I).

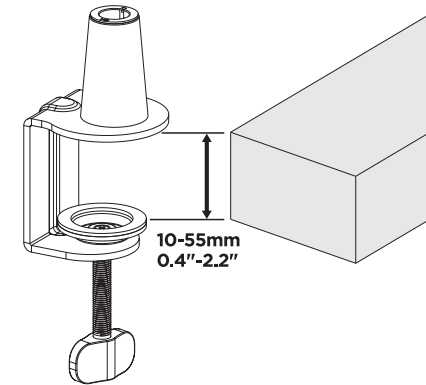

- Peel the backing off from the Adhesive Pad (#H) and adhere it to the inside top of the clamp as shown here.

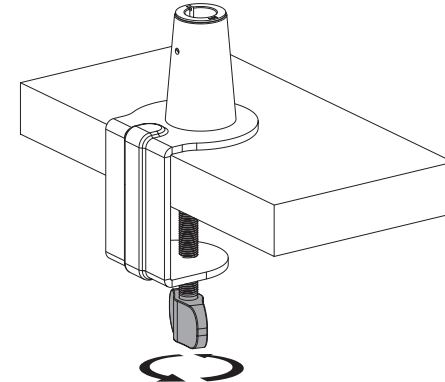

- Slide the clamp over the edge of the desk and position it in the desired location.

Note: The clamp is only compatible with desks with a thickness between 0.4"-2.1" (10-55mm)

- Turn the hand knob clockwise to tighten the clamp until it is fully tightened on the desk.

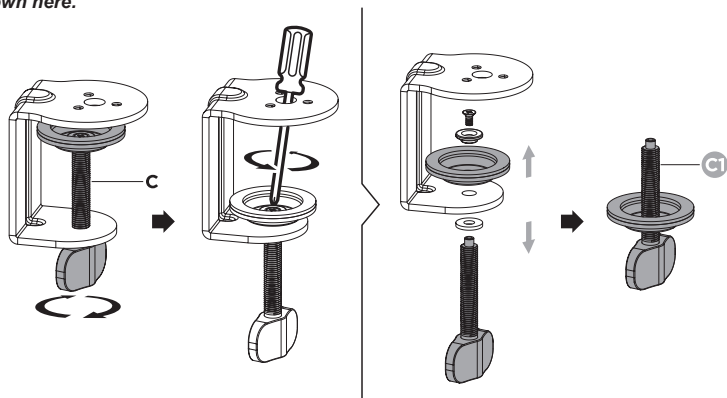

Step 1b

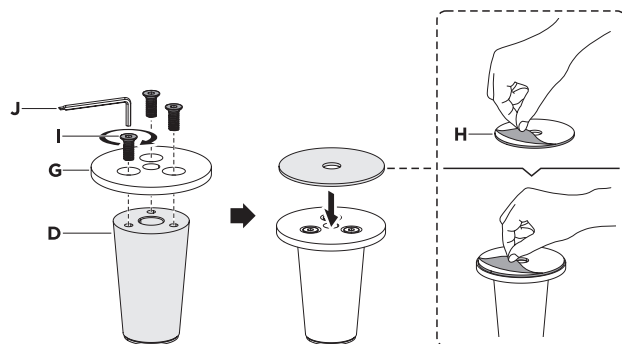

Grommet Mounting Option

- Open the Clamp Base (#C) until it is at the maximum width by rotating the hand knob counterclockwise.
- Remove the bolt from the middle of the circular plate on the clamp and detach the hand knob with the bolt from the plate and clamp.

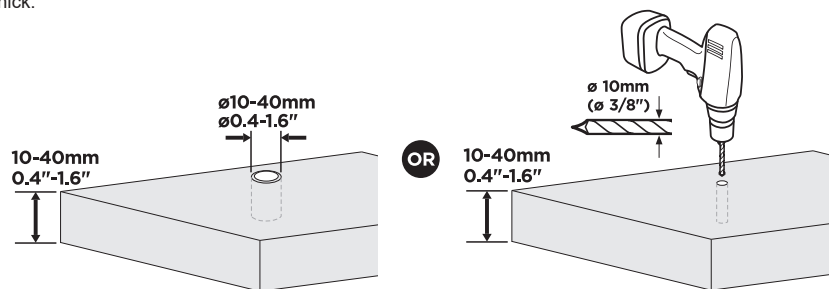

Note: it may be easier to remove the bolt by putting a screwdriver through the hole in the clamp as shown here.

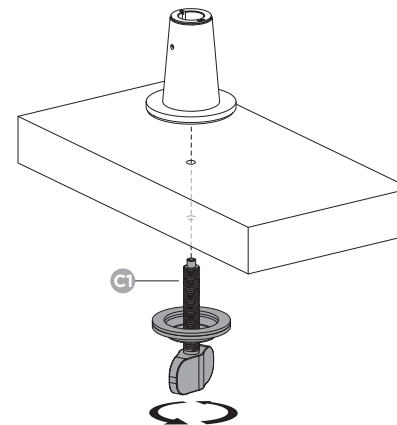

- Attach the Grommet Base (#G) to the Mount Base (#D) using Bolts (#I). Peel the backing off from the Adhesive Pad (#H) and adhere it to the inside top of the clamp as shown here.

- If your desktop has an existing grommet hole between 0.4"-1.6" in diameter, with a desk thickness of 0.4"-1.6" then it is ready for installation.
- If no grommet hole exists in the desktop or not in the required location, then one will need to be drilled. Use a 3/8" (10mm) drill bit to drill a hole through your desktop. The desktop must be between 0.4"-1.6" thick.

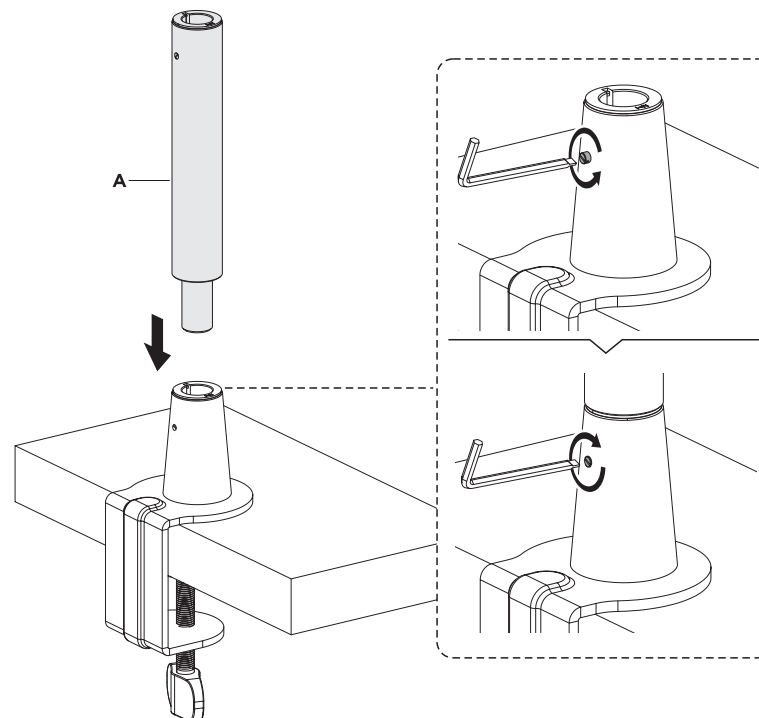

- Place the mounting base over the grommet hole and secure from underneath using the long hand knob bolt through the circular plate. Insert the end of the bolt through the desk into the mount base and tighten until secure.

Step 2

Install the Boom Arm

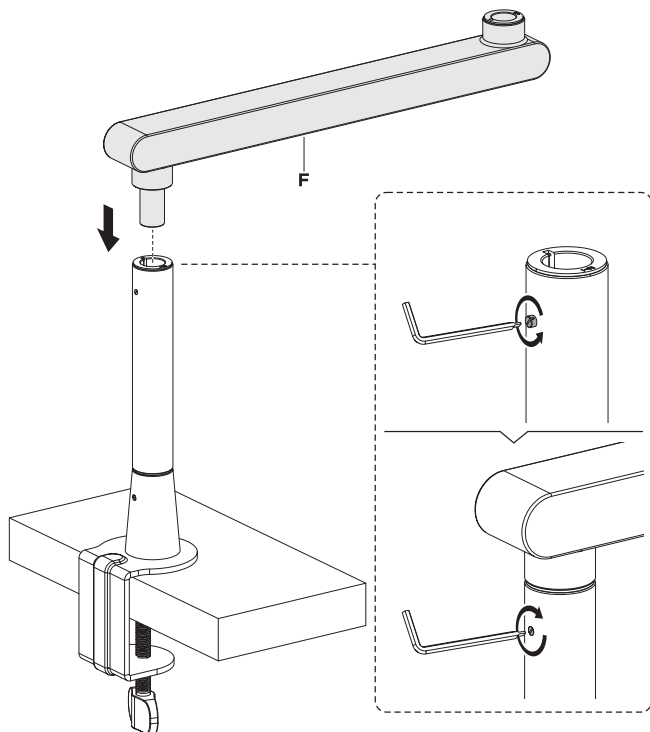

- Loosen the bolt on the back of the mount base until the end of the bolt is not protruding on the inside, then insert the Vertical Arm (#A) fully into the top of the clamp or grommet base. Tighten the bolt back down again to prevent the arm from being removed.

Step 3

Install the First Arm Segment

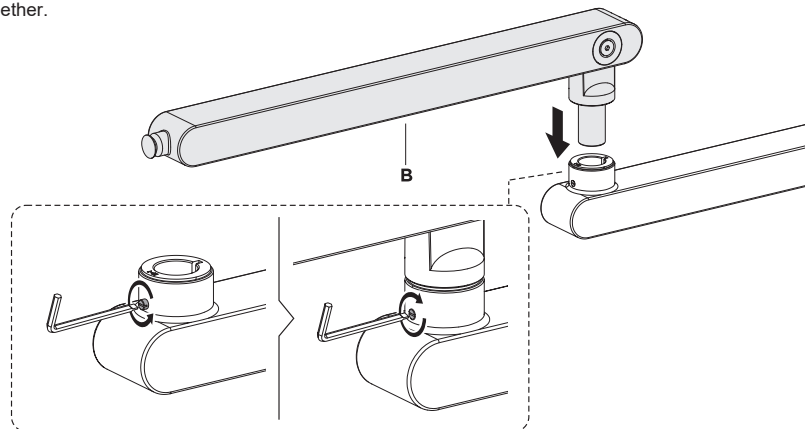

- Install Arm Segment 1 (#F) using the same method to secure the first Arm Segment to the Vertical Pole.
- Note:** This segment can be left out of the assembly if a shorter use range is required, and you may attach Arm Segment 2 (#B) directly to the Vertical Pole instead.

Step 4

Install the Second Arm Segment

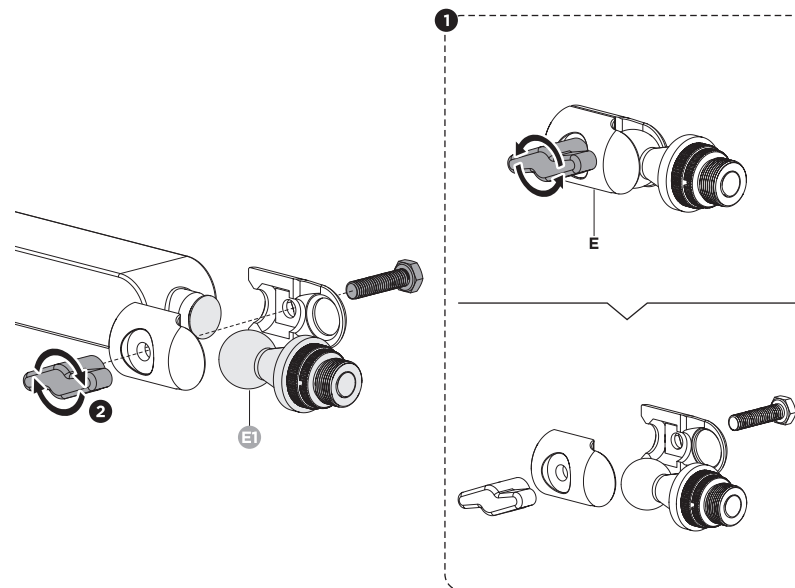

- Install Arm Segment 2 (#B) using the same method to secure the first and second arm segments together.

Step 5

Attach the Microphone Mount

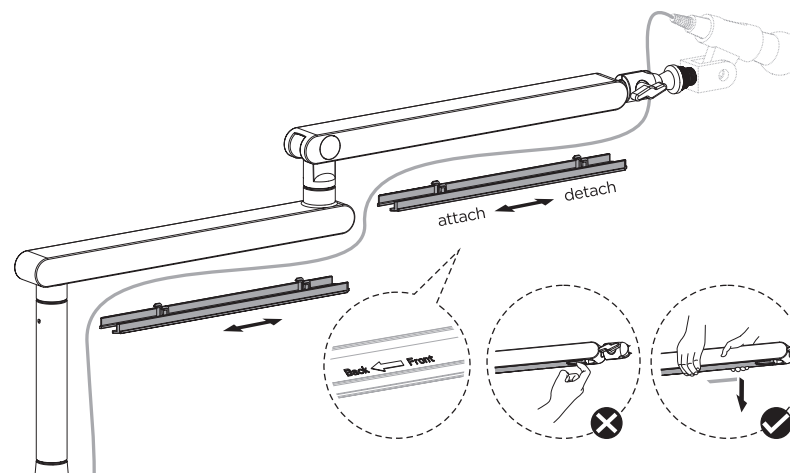

- Remove the hand knob from the Microphone Mount (#E) and remove the bolt to disassemble the joint.
- Reassemble the microphone mount back in the same configuration over the end of the boom arm as shown here.

Step 6

Cable Management

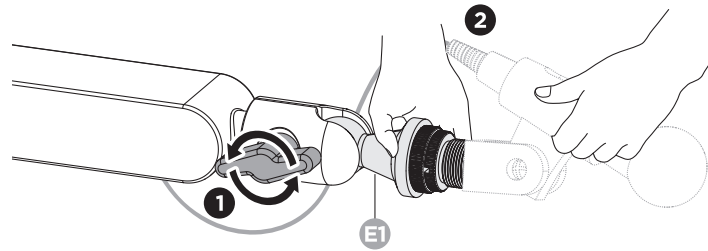

- Remove the cable management covers from the bottom of the boom arms by sliding them back toward the rear of the arm as shown in the diagram. Run the cables through the channel then replace the cable covers.

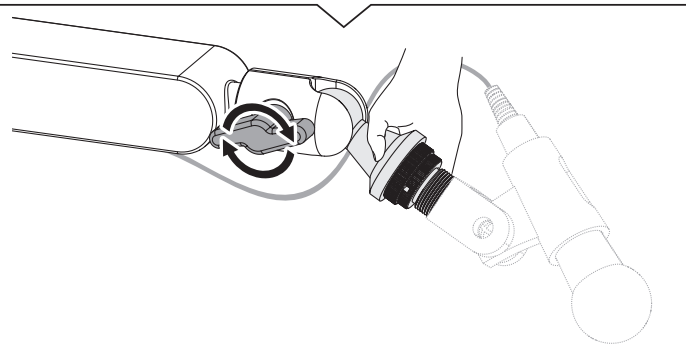

Step 7

Attach the Microphone

- Attach the microphone to the Microphone Mount (#E) on the end of the arm. The Microphone Mount has a dual threaded mount and is compatible with most 3/8" and 5/8" threaded microphone adapters.

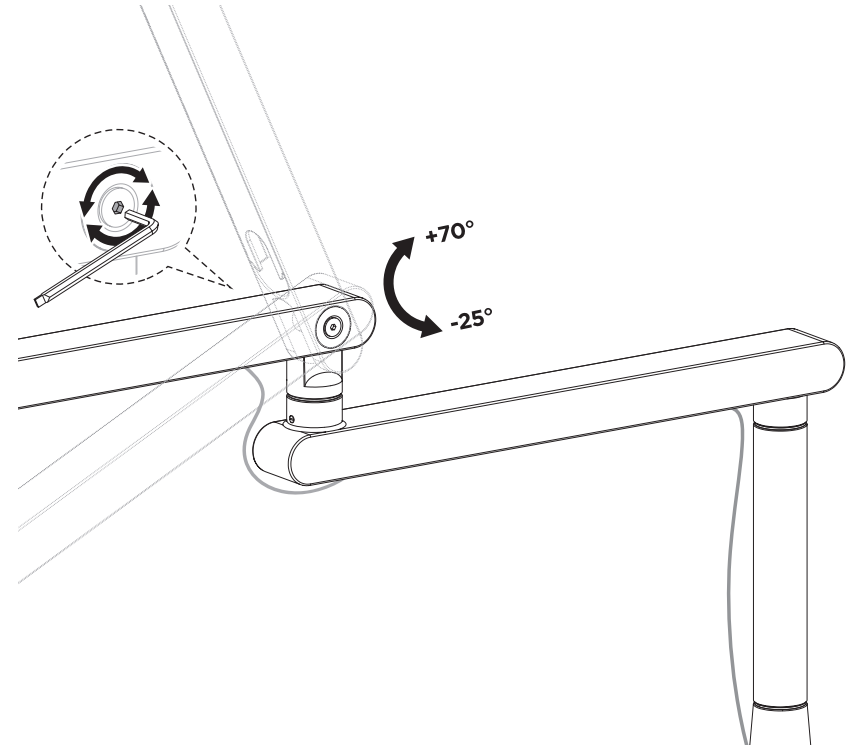

Hold the Head Joint(E1) and loosen the knob, adjust the microphone to the desired position, then tighten the knob.

Step 8

Balance the Arm

- The boom arm can be adjusted down by 25 degrees and upward by 70 degrees. Loosen or tighten the bolt on the side of the joint to loosen or tighten the arm as needed.
