# AMPERO MINI

## Display Screen:

Displays Ampero Mini's current status. Use the touchscreen to select effects, edit patches, and make tone adjustments.

## EXP/CTRL (FS 3/4):

1/4" TRS input, for connecting an external expression pedal/footswitch controller. Perfect for Hotone Ampero Press or Ampero Switch.

## INPUT:

1/4" mono input connection for both electric/acoustic instruments.

## OUTPUT:

Unbalanced 1/4" TRS stereo output connection to amplifiers or other equipment. For stereo connection, a Y cable is needed to split L/R output channels (Tip=Left channel, Ring=Right channel).

8. GLOBAL opens the global settings page
9. EDIT allows you to edit the current patch
10. Output level meter
11. Input level meter
12. Hold to lock the device
13. Indicates the current patch tempo

## Getting Started

### 1. Connecting your device

Plug your guitar in to the Ampero Mini input jack and run a 1/4" mono cable from OUTPUT to your amp. Please remember:

- (1) Keep your amp volume down.
  - (2) Connect your cable to the amp's FX Loop Return if it has one.
  - (3) When connecting to stereo sound system, use a Y cable to split L/R channels.
2. Turn the Ampero Mini volume knob all the way down, then connect the power supply to turn Ampero Mini on.
3. Calibrate the strings. Press footswitch 1 and 2 together to turn on the tuner. Pluck each string and tune until the pitch reaches the middle of the screen and turns green. When finished, tap any footswitch to exit the tuner.
4. Select a patch: Tap footswitch 1 to move back through the patches, tap footswitch 2 to move forward through the patches.
