BEFORE YOU BEGIN

Congratulations on your purchase! Before proceeding, take a moment to familiarize yourself with the SRC!

The **Antelope Audio SRC** is a compact desktop controller designed to give Orion Studio Synergy Core users hands-on control of their monitoring. Powered entirely by USB-C, it delivers precise volume adjustment through a solid rotary encoder with a clear color display, while offering quick access to functions like mute, dim, mono, talkback, and a customizable shortcut. The SRC also makes it easy to calibrate stereo or 2.1 setups with per-channel gain, delay, and a 16-band EQ, letting you seamlessly integrate a subwoofer or correct room response. Five user-assignable buttons allow instant recall of complete monitoring presets, from output levels and routing to EQ profiles, so you can move effortlessly between sessions. With its sturdy metal build and plug-and-play simplicity, the SRC transforms complex monitoring tasks into an intuitive, tactile experience that keeps you focused on your mix instead of your mouse.

The unit is compatible with Orion Studio Synergy Core and its Stereo Calibration feature can be activated as a code from the Orion's Manage Device panel in the Antelope Launcher, right after the SRC is activated.

Enjoy working with the SRC.

Best wishes,
Team Antelope

SYSTEM REQUIREMENTS

Mac:

- Apple Mac 2013 or newer.
- Minimum: Mac OS 10.14 Mojave.
- Available storage space (Minimum 10 GB).
- Memory (RAM): 8 GB minimum (16 GB or more recommended).
- Supported OSX: 10.14 Mojave, 10.15 Catalina, 11 Big Sur, 12 Monterey, 13 Ventura, 14 Sonoma, 15 Sequoia.

Windows:

- PC computer with a USB Port.
- Windows 10/11 (64-bit) with the latest Microsoft Updates.
- Available storage space (Minimum 10 GB).
- Memory (RAM): 8 GB minimum (16 GB or more recommended).
- CPU: Intel Core i5™ or AMD Ryzen (Higher recommended).

Additional Information:

- A stable Internet connection is required to download and update your Antelope Audio hardware and software.

PRODUCT ACTIVATION

The SRC product activation is a mandatory process required to be completed on the first run of the hardware remote. It is needed to validate your product warranty and to ensure correct operation.

Please note that the mandatory device activation procedure requires an active Internet connection on your computer. Activating an Antelope Audio device offline is not possible.

1. Connect the SRC to your Windows or Mac computer using a USB C cable.

Notes:

- The USB connection is required to have the SRC always recognized by the Antelope Launcher and the Orion Studio Synergy Core interface.
- For use with macOS, update your Orion Studio Synergy Core's bundle to version 2.2.85 or later which includes Unified Driver 4.6. It is required for SRC to work.

2. Open your internet browser and navigate to <https://antelopeaudio.com/login/>

3. Log in to the Antelope Audio user area with your e-mail and password. If you don't have an account, visit <https://antelopeaudio.com/sign-up/> to create one.

4. Click on the 'Activate New Device' button.

6. Click on SRC from the device list.

7. Download and install the Antelope Launcher application for Windows or macOS.

8. Open the Antelope Launcher application and click on the 'Login' button.  Enter the e-mail and password you used to login into the Antelope Audio user area and click 'Login'.

Please Login

Login

If you don't have an account visit our website to [Register](#)
Forgot password? [Reset here](#)

9. Click on 'Activate' to open the Device Management Wizard.

10. Upon successful activation, the final window will read 'You have successfully activated your device. Software is required to be installed and up to date for the device to be used.' Click 'Software Installation' to go through the rest of the setup process to make sure the device is up to date.

FRONT PANEL EXPLAINED

The SRC front panel features the following items (left to right):

1. Access Settings menu.
2. Line Output control.
3. Headphones 1 output control.
4. Monitor A output control.
5. Software / Hardware preset buttons.
6. Volume level control / Mute button.
7. Dim Toggle button (-20 dB).

REAR PANEL EXPLAINED – check picture and power consumption

1. USB-C port.

Use it to connect SRC to your Windows or Mac computer.

USB Specs:

Computer connection:	USB (Type-C) Port, I/O
Bus powered:	Yes
Maximum power consumption:	500 mA

ROOM CALIBRATION FEATURE

The Stereo Calibration System (SCS) is designed to give you precise control over your monitoring environment, allowing you to tailor your speakers and subwoofer to the unique acoustics of your room. Whether you are working in stereo or a 2.1 setup, SCS ensures your monitoring chain remains accurate, consistent, and reliable.

By having the SRC remote controller, you gain access to the “Surround tab” where per-channel gain, delay alignment, and a powerful 16-band parametric equalizer are available. These tools enable you to compensate for speaker placement, correct timing discrepancies, and smooth out frequency response anomalies introduced by your room. The result is a calibrated listening environment that lets you make confident mix decisions.

With the ability to save and recall up to five user presets, you can switch effortlessly between different calibration profiles or listening modes—such as “flat reference,” “bass-enhanced,” or “client playback” at the press of a button. Calibration settings can be applied independently to the left, right, and subwoofer channels, giving you full control over every part of your monitoring system.

Notes:

- Once your Orion Studio Synergy Core and SRC are both registered, activated and updated to their latest bundles, activating the Stereo Calibration System feature from the Orion’s Features & Ownership menu in the Antelope Launcher is all it takes to get started!
- Take note that the Surround tab in the Orion’s Control Panel will be grayed out, and inaccessible, without the Stereo Calibration System feature enabled.

SRC APPLICATION

SRC gives you hardware control over key features of the Antelope Audio Orion Studio Synergy Core monitoring system. Following is an overview of the specific functionality controllable via the hardware remote. More detailed information on the relevant functionality can be found in the respective interface's user manual.

Session presets A-E

Presets A-E buttons allow for fast Software Preset recall buttons for all of the interfaces' settings, including signal routing, audio format switching, output levels, and speaker calibration. They can be configured in the Session tab of your interface's control panel, as follows. To load a **Software preset** - push the corresponding A-E button.

To load a **Hardware preset** - hold down the A-E button to load the corresponding preset (ex. A button triggers Preset 1)

Project Sessions

Project Sessions are found on the left side. Use them to store snapshots of Control Panel configurations. This way, you can easily recall specific gain and routing adjustments, device settings, and so on. Sessions are stored on your computer in *.as file format. You can easily backup and share these files between devices of the same model (fully updated software and firmware is recommended).

The field to the left of the 'Save' and 'Load' buttons shows the currently loaded Session file. Click the 'Save' and 'Load' buttons to save and load Antelope Session files (*.as).

In the Save Session window, you can choose the exact components you want stored and export Session files (*.as) from the 'Save As' button. When your Session is already saved in *.as file format, click the 'Save' button to save any changes you have made to it.

In the Load Session window, you can browse your computer for Antelope Session files (*.as) and choose which components to load. You can also choose from a drop-down list of recently loaded Sessions or load the last used Session. Clicking the 'Set Defaults' button restores the component selection to its default setting. Clicking the 'Set Defaults' button followed by the 'Load' button will return the Control Panel application to its default state.

Software Presets A-E

Project Session files can be loaded into the 5 quick recall Software Preset slots. Storing only certain settings in a file allows loading them exclusively, while keeping all other settings unaffected. *The 5 A-E buttons are available on the SRC and the control panel's monitoring pop-out widget, allowing easy access.*

LINE OUT

Clicking this button allows you to adjust the Line Out Volume of the Orion Studio SC via the rotary volume knob on the SRC. Clicking the volume knob will mute/unmute the Orion's Line output.

HP 1 & HP 2

Clicking this button allows you to adjust the volume of Orion Studio SC 's Headphones Out 1 & 2's via the rotary volume knob on the SRC. Clicking the volume knob will mute/unmute the currently selected Headphones out.

MON A/B buttons

Use the **MON A** & **MON B** buttons to switch between the associated speakers and control their volume via the Rotary volume knob. Hold the MON A or MON B to engage both monitor outputs simultaneously.

Clicking the volume knob while a speaker is selected will mute/unmute it.

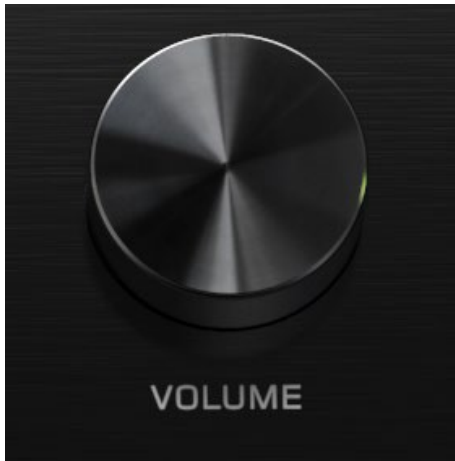

FN (Function)

Accesses SRC's options menu which includes the Display Brightness, Talkback Input, LFE on/off, Surround Tab on/off, Monitor A Trim, Monitor B Trim, Line Out Trim & Reamp Volume options.

TALK

Holding down the TALK button will enable Orion Studio SC's talkback feature. You can also adjust its volume via the rotary volume knob while holding the button down.

Volume Rotary Knob

Rotary knob output volume control for the surround/immersive audio monitoring outputs, or the stereo monitor when enabled. Press it down to mute or unmute the currently selected output.

MONO

Click the mono button to temporarily sum your stereo outputs into a single channel signal. Click it again to revert to stereo.

DIM Button

Conveniently positioned next to the big volume knob, this button quickly dims the currently selected output by -20 dB.

CUSTOMER SUPPORT INFORMATION

Antelope Audio Customer Support can be reached by the following means:

Online

Visit support.antelopeaudio.com

Phone

We are there for you around the clock, 21 hours/day, Monday to Friday.

- The [Knowledge Base](#) in our Customer Support section is an often-overlooked source of troubleshooting information, answers to commonly asked questions and Antelope know-how.

MY ANTELOPE AUDIO PRODUCT ISN'T WORKING.

WHAT SHOULD I DO?

If you cannot find a solution on your own, please get in touch with us so we check if you are having a hardware-related issue. If this is the case, we will guide you through the repair process. If the product should be returned, an RMA number will be issued so we can begin the procedure.

What's an RMA number?

Issuing an RMA (Return Merchandise Authorization) number is required for any factory service or repair procedure. Please, don't attempt to send us your device without receiving an RMA number first, as the device will be returned and not serviced.

How do I get an RMA number?

The Antelope Audio Customer Support team is in charge of issuing RMA numbers. Visit support.antelopeaudio.com and get in touch.

After your RMA has been issued, you will receive an email with instructions on how to proceed.

RMA shipping information

Alongside the product you are returning please, include a letter containing your full name, shipping address, RMA number issued by our technical support team, and a note with a short information about the technical issue.

Please use the original box if possible, because a worn-out one will surely not protect your product sufficiently on its way to the Antelope Audio HQ. Additional cushioning materials in multiple layers between the unit and the box walls to prevent shock, vibration, and various tears and scratches.

Please remove any labels or old shipment markings it may have and ensure you add your shipping address inside the box in case the original shipment label becomes illegible during transportation.

The shipping costs are covered by the owner of the product. Antelope Audio will not cover any local customs charges.

We recommend using a courier service of your choice (e.g. DHL, UPS, FedEx). The package should be insured for its real value, marked as fragile and a tracking number should be provided. We do not recommend using standard mail delivery services.

Please, don't forget to add the RMA number, issued by Antelope Audio technical support, on all shipping paperwork.

Antelope Audio cannot be held responsible for undelivered packages – lost or damaged on the way to the Antelope Audio HQ. For damage claims, please contact your shipping service provider of choice.

Antelope Audio cannot cover any repair costs for product damages due to poor packaging.

LIMITED WARRANTY POLICY

This is a non-transferable voluntary Limited Product Warranty provided to end-customers who have purchased Antelope Audio-branded hardware product (hereinafter referred to as “Product”) from an authorized Antelope Audio re-seller.

For customers covered by consumer protection laws or regulations in their country of purchase or, if different, their country of residence, the benefits conferred by Antelope Audio's Limited Warranty are in addition to, and not instead of, rights and remedies convened by such consumer protection laws and regulations and it does not exclude, limit or suspend buyer's rights arising from consumer law. Consumers have the right to choose whether to claim service under the Antelope Audio Limited Warranty or under their consumer law rights.

All claims made under the Antelope Audio Limited Warranty will be governed by the terms set out in this warranty document.

Warranty Coverage

Antelope Audio warrants that the Product will be free from defects in material and workmanship for the period of 1 (one) year commencing on the date of purchase of the Product by the end-customer from authorized Antelope Audio's re-seller.

Except where explicitly prohibited by applicable local law, this warranty is limited to the original purchaser and is non-transferable. This warranty provides you with specific legal rights, and you may have additional rights that vary under local laws.

In general, this warranty means your Antelope Audio hardware product will operate in accordance with published technical specifications, as specified by its data sheet, and in the operating environment for which it was intended for the length of the warranty period.

This version of the warranty applies to products purchased on or after January 1, 2018. For prior versions of the Antelope Audio limited warranty, please contact customer service.

Limited Factory Refurbished (B-stock) Warranty

Antelope Audio warrants products sold as “B-stock, Factory Refurbished or Open Box” to be free from defects in materials (unless otherwise stated in the product description) and workmanship. Only products purchased from an authorized dealer or directly from Antelope Audio are covered by this Warranty.

The Limited Factory Refurbished (B-stock) Warranty is valid for the period of 6 (six) months, commencing on the date of purchase of the Product, if local regulations do not require otherwise.

All warranty terms contained hereunder apply also to the B-stock Warranty unless otherwise specified.

Remedies

Antelope Audio’s entire liability and your exclusive remedy for any Antelope Audio Product that is not operating in accordance with its published technical specifications is at Antelope Audio’s discretion:

- 1) to repair the Product at Antelope Audio’s expense using new or equivalent-to-new refurbished parts in good working condition, or
- 2) to replace the Product at Antelope Audio’s expense with a product with equivalent functionality formed from new and/or equivalent-to new refurbished parts in good working condition, or
- 3) to refund the price paid. Should Antelope Audio decide to refund the price paid, it may deduct from the paid Product’s price any damages caused to the Product; where, within fourteen (14) days of the expiration of the warranty period,(i) Antelope Audio has received written notice of any nonconformity;(ii) after Antelope Audio’s written authorization, customer has returned the nonconforming product to the designated place; and (iii)Antelope Audio has determined that the Product is nonconforming and that such non-conformity is not the result of any of the exclusions designated below.

These warranty obligations are conditioned upon the hardware being returned to the original place of purchase, or another place as directed by Antelope Audio, with the original sales receipt attached. You will be required to pay shipping and handling charges for returning the product. You may be required to pay any other applicable tariffs, duties, taxes, or other fees with regard to returning the products.

Any repaired or replacement Product will be warranted for the remainder of the original warranty period.

Obsolete or Discontinued Products

An obsolete or discontinued product will be repaired or replaced with the same product if available. If Antelope Audio is unable to replace your obsolete or discontinued product with the same product, Antelope Audio will replace the obsolete or discontinued product, in its sole discretion, with a product having similar function and capacity.

Exclusions

This warranty does not cover problems or damage resulting from, but not limited to, any of the following: (i)Wear and tear associated with normal use; (ii)Any modification, abuse, accident, disassembly, misapplication, misuse, negligence, acts of God, accident; (iii)Unauthorized repair or attempted repair by anyone other than Antelope Audio or someone authorized by Antelope Audio to do warranty work; any unauthorized repairs will void this warranty(iv)Any improper operation, maintenance or installation, including any use not in accordance with any supplied product instructions; (v)Connection to any improper voltage supply; (vi)Use of consumables or spare parts not supplied by Antelope Audio, except where such restriction is prohibited by applicable local law; (vii)Any other cause which does not relate to a Product defect in materials or workmanship.

The warranty does not apply to any Products which have been subject to misuse, neglect, accident or modification or which have been soldered or altered such that they are not capable of being tested under normal test conditions.

This warranty does not cover (i) any counterfeit products, i.e. Products that Antelope Audio, at its sole discretion, determines were not manufactured by Antelope Audio or any

of its authorized manufacturing partners; (ii) Products purchased from a person or entity which is not an authorized dealer or re-seller of Antelope Audio; (iii) Product sold “as is” or “with all faults”, to the extent permitted by local law.

This warranty is not valid in case any manufacturer label(s), serial numbers, date stamp(s) or warranty sticker(s) has been altered or removed from the Product.

Limitation of Liability

ANTELOPE AUDIO SHALL NOT BE LIABLE FOR ANY SPECIAL, INCIDENTAL, INDIRECT, OR CONSEQUENTIAL DAMAGES WHATSOEVER, INCLUDING BUT NOT LIMITED TO LOSS OF PROFITS, REVENUE, OR DATA (WHETHER DIRECT OR INDIRECT) OR COMMERCIAL LOSS FOR BREACH OF ANY EXPRESS OR IMPLIED WARRANTY ON YOUR PRODUCT EVEN IF Antelope Audio HAS BEEN ADVISED PREVIOUSLY OF THE POSSIBILITY OF SUCH DAMAGES. Some local laws do not allow the exclusion or limitation of special, indirect, incidental, or consequential damages, so this limitation or exclusion may not apply in your jurisdiction.

ANTELOPE AUDIO WILL NOT ASSUME OR AUTHORIZE ANY OTHER PERSON TO ASSUME FOR IT ANY OTHER LIABILITY IN CONNECTION WITH ITS PRODUCTS.

Data Recovery

In the event of data loss using Antelope Audio storage devices, Antelope Audio is not responsible for backing up or recovering any data that you may have lost.

No Other Warranties

No Antelope Audio employee, dealer, re-seller, or other agent is authorized to make any modification, extension, or addition to this warranty.

How to Make a Warranty Claim

Valid warranty claims should be processed through your point of purchase. Please also verify the return policy directly with the retailer where you purchased your product. Any warranty claims that cannot be reprocessed through your original point of purchase should

be addressed directly to Antelope Audio. Our customer service contact information can be found on the web or in the documentation included with your Product.

Returning Your Product

In the event that you need to return your Antelope Audio products for repair or replacement, Antelope Audio will provide you with a Return Merchandise Authorization Number (RMA#) as well as return instructions. Do not return your product without prior approval from Antelope Audio. Any product returned without a valid unique RMA# will be refused and returned to the sender at the sender's expense. To avoid problems at the time of receipt, clearly write your RMA# on the outside of the package and include a copy of your RMA confirmation mail within the package.

In certain situations, for in-warranty units, we may (entirely in our opinion) offer you a temporary replacement unit, provided that we have such in stock in your state. To request a temporary replacement unit, a valid credit card must be provided to secure the new replacement unit for shipping prior to Antelope Audio receiving the defective one.

Request a Return Material Authorization Number (RMA#)

Please follow these steps to obtain an RMA number:

(i) For end-user customers, submit a claim online at: support.antelopeaudio.com. For business-to-business (B2B) / Direct customers of Antelope Audio please email us at techsupport@antelopeaudio.com

(ii) A valid proof of purchase is required for RMA processing (i.e. receipt, invoice, etc). Antelope Audio will provide you with the RMA number within 2 working days of the claim submission date.

RMA Return Addresses

We have multiple RMA-receiving locations worldwide. Your RMA confirmation will specify the specific return address you must use when sending your RMA package. Any packages

received at an unauthorized location may be refused and returned to the sender at the sender's expense.

Products Lost or Damaged During Transit

The original packaging material should be used to pack the product for return; if the original packaging is not available, you should use such materials that provide the same or greater protection to the product. All packages that arrive with any external damage or appear inadequately packed will be refused and returned to the sender at the sender's expense. We are not responsible for damage incurred during shipping to our RMA receiving locations or for lost or stolen products.

Company information

Antelope Audio is the trade name, under which the company Elektrosfera Ltd., registered under the legislation of the Republic of Bulgaria with UIN: 131052590, is doing business and is worldwide known. Elsewhere in this document where the trade name Antelope Audio is used shall refer to Elektrosfera Ltd., with an address of management: Tsarigradsko Shose Blvd., 7th km, Building of BIC IZOT, floor 6, Mladost region, Sofia, Bulgaria.

If any term hereunder is held to be illegal or unenforceable, it shall be severed from this warranty and the legality or enforceability of the remaining terms shall not be affected.

SAFETY NOTES

To reduce the risk of electrical shocks, fire, and related hazards:

- Do not remove screws, cover, or cabinet. There are no user-serviceable parts inside.
Refer servicing to qualified service personnel.
- Do not expose this device to rain, moisture, or spillover of liquid of any kind.
- Should any form of liquid or a foreign object enter the device, do not use it. Switch off the device and then unplug it from the power source. Do not operate the device again until the foreign object is removed or the liquid has completely dried and its residues are fully cleaned up. If in doubt, please consult the manufacturer.
- Do not handle the cable with wet hands!
- Avoid placing things on the cabinet or using the device in a narrow and poorly ventilated place which could affect its operation or the operation of other closely located components.
- Do not install near any heat sources such as radiators, stoves, or other apparatus (including amplifiers) that produce heat.
- Do not use harsh chemicals to clean your unit. Clean only with specialized cleaners for electronic equipment.
- Both occasional and continued exposure to high sound pressure levels can cause permanent ear damage via headphones and monitors.
- Your unit should always be un-racked when traveling or in a flight case.
- The device is designed to operate in a temperate environment, with a correct Operating Temperature of 0-50° C, 32-122° F.
