

13975 / 13976 Piano bench

INTENDED USE

Classic, high-quality piano bench with tapped and glued base frame for optimum stability.

FEATURES and CAPABILITIES

- Variants:

13975-100-21 - Upholstered seat covered with black velour

13976-200-21 - Upholstered seat covered with black imitation leather

- Continuous height adjustment from 480 - 570 mm

- Attractive appearance thanks to both clear design and high-gloss lacquered surfaces

- Stable footing thanks to feet with floor-levelling threads

Thank you for choosing this product. Please read and follow these instructions carefully before assembling and operating this product. It informs you about all important steps necessary for safe installation and operation. We recommend that you keep them for future reference.

SAFETY INSTRUCTIONS

- Ensure that the surface is suitable, stable, and level.
- Careful, considerate handling of the product and protection against adverse influences (misuse, moisture) preserve its function and service life and, not least, ensure the user's safety.
- Changes to the mechanism are not permitted.
- **WARNING:** Do not put your fingers between the seat and the base while adjusting the height. Do not modify the mechanism.
- **WARNING:** risk of accident! Never use the product as a climbing aid.

INSTALLATION INSTRUCTIONS

1. COMPONENTS

Please visually inspect whether all parts are present and, as far as can be seen, in good working order. Damaged parts must no longer be used. They must be replaced. They must be replaced.

a Upholstered seat: 13975 velour, 13976 imitation leather

b Side handles; **c** Seat mechanism;

d Leg (tapped and glued to frame); **e** floor-levelling thread

2. ASSEMBLY & POSITIONING

The piano bench is completely pre-assembled at the factory and can be set up immediately. Height adjustment and adjustment of the floor leveling threads **e** are carried out on site.

3. HEIGHT ADJUSTMENT

3.1 When moving the seat in or out, the seat cushion must always be **UNLOADED**.

3.2 By turning the side handles, the seat cushion moves...

3.3 ...upwards (maximum upto 570 mm)

3.4 ...downwards (minimum to 480 mm)

4. STABILITY / FLOOR LEVELLING

4.1 The stability depends on the nature and quality of the floor surface, which should be level and firm. Any rocking can, within certain limits, be corrected by turning one or more of the floor-levelling threads.

4.2 The levelling feet are suitable for height adjustments of up to 5 mm.

4.3 Heights of more than 5 mm place increasing load on the thread and lead to instability of the connection.

INSPECTION, MAINTENANCE, CLEANING

- If the screws become loose through use, re-tighten them regularly with the wrench **b.1** supplied.
- Lubricate the spindle mechanism regularly with oil or grease. This extends the service life of your bench and avoids disturbing noises.
- Do not attempt to adjust the piano bench while you are sitting on it, as adjustment under load will lead to premature wear of the spindle mechanism.
- If the piano bench has not been used for a long period, clean the spindle mechanism thoroughly to remove any contamination and then lubricate it.
- Clean with a slightly damp cloth and a non-abrasive cleaning agent.

TECHNICAL DATA

Material	Base frame: Solid wood, polished, black lacquered Mechanism: Steel, powder-coated, black Seat cover: Velour, black (13975) Imitation leather, black (13976)
Dimensions	Upholstered seat, width x depth: 555 x 335 mm Seat height: continuously adjustable from 480 to 570 mm
