

MIC100W

What's in the Box:

1.5M Charging dock USB cable X 1

About Wireless Mic:

1. Power On / Off

- Press and hold the Extension Microphone button for 2 seconds to turn the device on or off.
- When connected, the extension microphones will automatically shut down when the host device is powered off.
- When the extension microphone is not connected to the host, it will automatically power off within 5 minutes.

2. Wireless Extension Microphone Pairing

Note: The extension microphones are pre-paired with the video bar before shipment.

Re-pairing is not normally required.

If re-pairing is necessary (for example, after a firmware update or if connection issues occur)

Follow the steps below:

1. Ensure the video bar and wireless microphones are powered on.
2. On the extension microphone, press and hold the Mute button for 6–8 seconds until pairing mode is activated.
 - Pairing mode is indicated by a rapidly flashing white LED.
3. Using the remote control, press the following buttons in sequence: VOL+ → VOL + → Right Arrow.
 - You will hear a voice prompt saying “Pairing”.
4. Pairing is complete when the LED indicators on both the video bar and microphone stop flashing and remain solid.

3. Extension Microphone Charging

Connect the extension microphone to the charging dock.

Charging Status Indicators:

- **Low battery:** Red indicator light flashes
- **Charging:** Red indicator light stays on
- **Fully charged:** Green indicator light turns on.

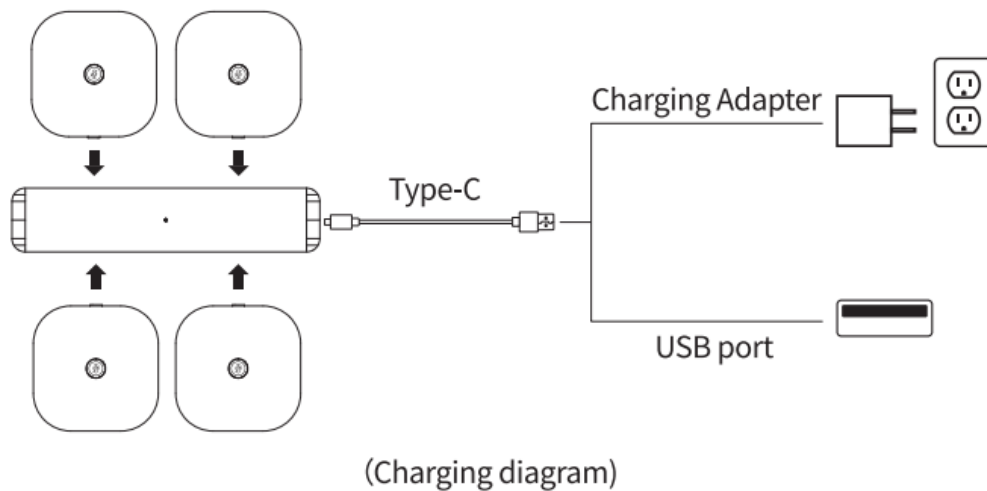

Note:

During charging, the extension microphone will stop working when connected to the host device.

Note:

When not paired, connect the extension microphone to the charging dock and remove it again to re-initialize the device.

When paired, place the extension microphone into the charging dock and then remove it to reconnect the device.

4. Microphone Priority Order (Wired / Wireless / Built-in)

When the host device is connected to a wired microphone, extension microphone, and built-in microphone at the same time, the system will use the following priority order:

1. Wired Microphone (**highest priority**)
2. Wireless Microphone
3. Built-in Microphone (**lowest priority**)
