

POS Station w/ Printer Stand, Magnetic Scanner Card Reader Holder & Universal Security Enclosure (White)

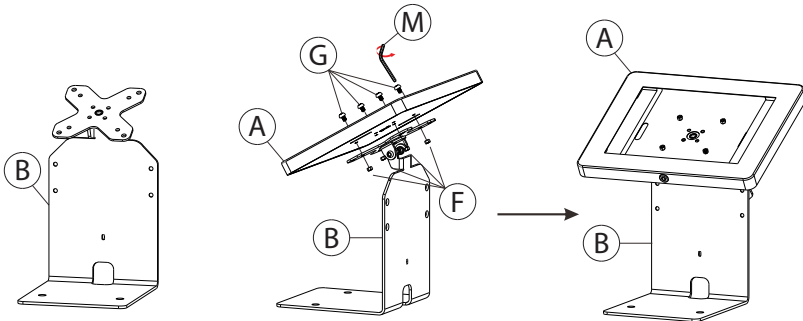

PAD-PARAPOSW INSTALLATION - MANUAL

CONTENTS:

INSTALLATION:

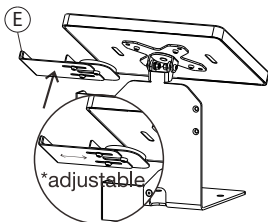

1. Installing the Enclosure :

1A. Align enclosure (A) with Kiosk Body (B)

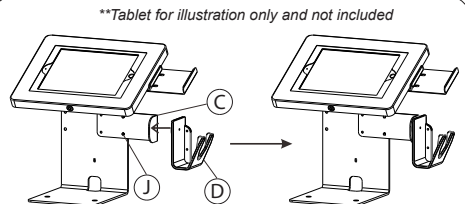

1B. After enclosure vesa holes are aligned to VESA plate, rotate in screws (G) with provided tool (M) while holding hex nuts (F) from behind until securely fastened.

2. Placing Magnetic Card Reader

2A. Place magnetic card reader holder (E) anywhere magnetic to setup.

3. Placing Magnetic Scanner Holder

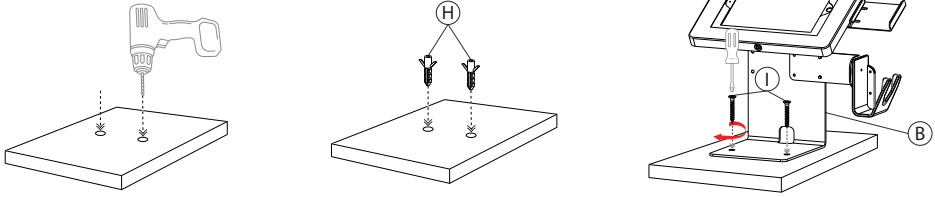

3A. Screw in arm extender (C) as illustrated using screws (J) and provided tool (M).

3B. Place magnetic scanner holder (D) on arm as shown above.

4. (Optional) Anchoring Base to Surface

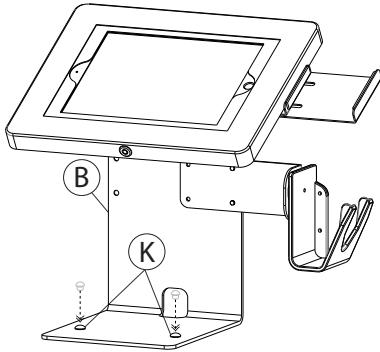

***Tablet and Powerdrill for illustration only and not included*

4A. Drill (2) holes into the surface using a power drill or like (not provided). Insert the plastic anchors (H) into the holes and then align the kiosk (A) holes with surface. Then take the screws (I) and rotate in with screwdriver (not included) until securely tightened.

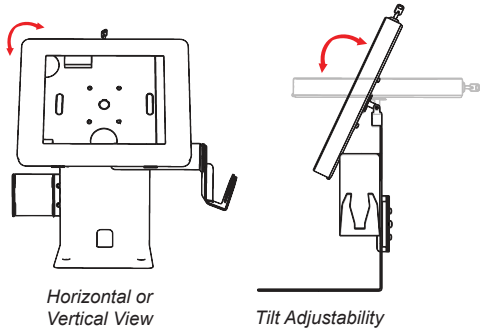

5. (Optional) Placing Hole Fillers

***Tablet for illustration only and not included*

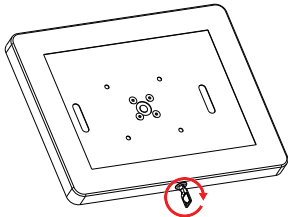

5A. If not anchoring into surface, use the (2) hole fillers (K) to plug in for a more seamless look.

View Angles and Orientation

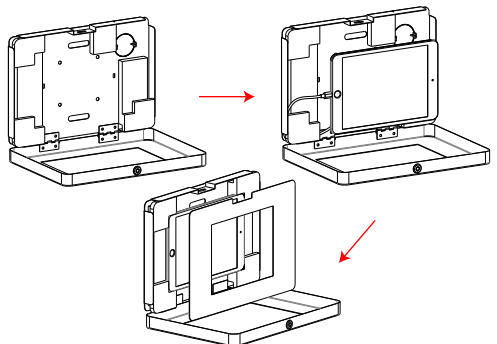

Tilt the enclosure as seen above for ideal viewing angle. Rotate 90 degrees for preferred portrait or landscape views.

Anti-Theft Enclosure Security

Place the key (L) in the enclosure to open up the enclosure. Rotate and remove to lock the enclosure.

Setting up Tablet Enclosure

Identify the foam / sheet bundle (N) in package. Select the corresponding pieces that will fit your device within the enclosure. Try them out until you find the correct fit.
