## HEARING PROTECTION

Zone Wired 2 provides three types of protection to help you hear safely.

**Peak limiting:** Audio volume is always limited at 100dBA to prevent hearing damages.

**Anti-startle protection:** It limits sudden audio spikes to avoid acoustic shocks as per Australian G616 guideline. This can be enabled on the Logi Tune app and applies to call activities only.

**Noise exposure over time:** It monitors the average daily noise levels in calls not to exceed time-weighted average of 85dBA as per Australian G616 guideline. This can be enabled on the Logi Tune app and applies to call activities only.

## ENABLE EQ FOR CALLS

Logi Tune now lets you apply equalizer settings to call audio in addition to music. Customize the sound you hear in calls with deeper bass, crisper treble, or any other preferred settings.

Turn on the "Enable EQ for calls" toggle in Logi Tune to use your customized equalizer settings for calls.

## POWER SAVING MODE

Activate Power Saving Mode in Logi Tune to lower power usage from the device your headset is connected to.
