1. QuickPole Features

Lightweight and stable

We use a specially developed carbon composite fiber with an additional layer of UHM fibers for our boom pole. Thanks to this technology, our QuickPole Series 5 is **stronger and yet lighter than any other boom pole on the market**. The innovative design makes it possible for our longest version - the QP5150 - to be over 6 meters long when fully extended.

Quick Operation

On set, things often have to move fast. The low-maintenance, durable counter bearing, a teflon sheet and silicone-lubricated felts, make for **silky-smooth extending and collapsing** of our boom pole.

Additional safety: even when the thread is loose, the segments do not retract by themselves but stay where they are.

Perfect grip

The locks give you **better grip thanks to the refined knurling and extended length**. The threading has been further tuned so **with just a quarter turn the locks open and close securely** yet lightning fast.

You'll also love our **anti-twist mechanism** of the pole-sections (inter-sectional twist protection): The lock pieces automatically fall into place when you disassemble and reassemble your pole for cleaning or maintenance.

Clever cabling

The recess at the tip and optional bottom end allows for easy, solder-free cable retrofit. Simply take off the tip, insert the pre-configured internal cabling and plug it to the cable outlet.

2. QuickPole Series 5

For one, the name stands for five boom segments offering the ideal combination of **stability and mobility**. But Series 5 also refers to the fact that it is **the 5th edition of our popular boom pole**.

Lightweight, perfectly balanced and even fully extended super stable with only a little flex

Available lengths

Type	Length collapsed mm (in)	Length extended	Weight g (oz)
QP550	550 (21.65)	1850 (72.83)	450 (15.87)
QP565	690 (27.17)	2480 (97.64)	540 (19.05)
QP580	840 (33.07)	3120 (122.83)	636 (22.43)
QP5100	1040 (40.94)	4020 (158.27)	760 (26.81)
QP5130	1340 (52.76)	5320 (209.45)	950 (33.51)
QP5150	1550 (61.02)	6370 (250.79)	1080 (38.10)

3. QuickPole Slim

The QP Slim is one of the few 4-segmented boompoles on the market. Less weight and a thinner diameter makes it more convenient to operate for many boom operators.

Type	Length collapsed mm (in)	Length extended	Weight g (oz)
QP Slim Short	1000 (39.37)	3300 (129.92)	550 (19.40)
QP Slim Long	1550 (61.02)	5180 (203.94)	835 (29.45)

4. Cable Kits

Internal cabling is available in mono (XLR 3Pin) or stereo (XLR 5Pin) – straight or coiled cable. For coiled cabled booms you can choose between side or bottom outlet. To see which options are available for which boompoles see the following table.

Available Cabling Options

All our boompoles can be ordered preconfigured with an internal cable. These are the available options:

Boompole	Coiled Cable (Mono or Stereo) Side Outlet	Coiled Cable (Mono or Stereo) Bottom Outlet	Straight Cable (Mono or Stereo) Side Outlet
QP550	Yes	Yes	Yes
QP565	Yes	Yes	Yes
QP580	Yes	Yes	Yes
QP5100	Yes	Yes	Yes
QP5130	Yes	Yes	Yes
QP5150	No	No	Yes
QP Slim Short	Yes	No	Yes
QP Slim Long	Yes	No	Yes

Available Cable Kits for do-it-yourself retrofit

If you already own a boom and want to install an internal cable, get the cable kit separately for a do-it-yourself retrofit. To learn how to do it we recommend our video tutorial.

Boompole	Coiled Cable Side Outlet	Coiled Cable Bottom Outlet	Straight Cable Side Outlet
QP550	A80581 (Mono) A80576 (Stereo)	A80934 (Mono) A80939 (Stereo)	A80599 (Mono) A80605 (Stereo)

5. Maintenance and Repair Instructions

Ambient products stand for durability and high quality. However, boompoles are mechanical devices that require regular maintenance. Frequent use over the years can lead to contamination or wear of single elements, so that the boom can no longer be extended as smoothly as you are used to.

But don't worry: using the Ambient QuickPole Maintenance Kit and our Video tutorials you can maintain your boompole so that it feels like new afterwards.

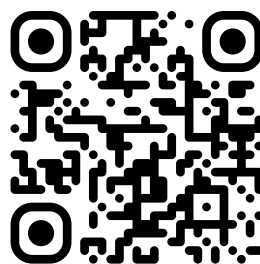

Video Tutorials

You'll find video tutorial on how to clean and maintain your QuickPole Series 4 or 5 booms scanning these QR codes or in our YouTube Channel.

6. Maintenance Kits

Components of each Maintenance Kit:

- 4x Black **Velcro Felt** (cut to size)
- 4x White **Spacer Tape** (cut to size)
- 4x Black **Rubber Seals**
- 1x **Leather Ring** for the Tip
- 1x Small Tube with **Grease**
- 1x Small Tube with **Silicon Oil**

Needed Accessories

To do the complete cleaning, you'll need a few more things that can be purchased at your local hardware store:

- Rubbing Alcohol
- Acetone
- Paper Towels
- Cotton Stick
- Boxcutter

7. Ambient Boom Case

The sturdy transport solution for your QuickPole boompoles - with the carrying comfort of a shoulder bag. Designed to fit your boompole including QuickLok and cable outlet.

- Inside is a sturdy tube that can withstand even the toughest applications and roughest transportation methods
- Robust fabric coating on the outside
- Available in 3 different lengths
- 70mm inner diameter. Wide enough to fit QuickPoles with side cable outlet
- Carrying handle and sturdy, adjustable carrying strap
- Inner padding to protect the boompole
- Slot-in pocket for your business card

Compatibility Chart

Here is an overview which Ambient poles fit which Boom Case. This applies to the boom pole alone as well as including a mounted QuickLok and cable outlet.

8. General Advice

Regular Care

If you don't want to do a complete cleaning, but just want to maintain your boompole regularly, we recommend cleaning the surface of the fully extended boom with rubbing alcohol every few months. Afterwards, rub the surface with aromatic polishing oil - this prevents the formation of odors.

Booming in the rain?

If you have worked with boompole in the rain, you should take it apart completely afterwards and let the five segments dry separately. Otherwise, they will eventually start to smell.

Booming in the desert?

If sand or other small particles have entered your boompole, be sure to perform a complete cleaning (see video tutorials).

Repairing or renewing Segments

If a segment gets damaged, Ambient can supply a spare segment ready for fitting.

Replacing Velcro Felt or Spacer Tape

If you do not want to use our repair kit but want to purchase Velcro Felt and Spacer Tape yourself, please note: When applying the felt ring, a small expansion gap (2mm) should be left. Never overlap the felt.

Danger! Highly Conductive Material.
Please keep away from power lines
