# READ CAREFULLY BEFORE USING!

## CANON SOFTWARE LICENSE AGREEMENT

IMPORTANT - READ THIS AGREEMENT BEFORE USING THE SOFTWARE ON THE CD-ROM IN THIS BOX. BY USING THE SOFTWARE, YOU AGREE TO BE BOUND BY THE TERMS OF THIS AGREEMENT.

This is a license agreement (the [Agreement]) between you and Canon Inc. ([Canon]).

IF YOU DO NOT AGREE TO THE TERMS AND CONDITIONS OF THIS AGREEMENT, DO NOT USE THE SOFTWARE PROGRAM ON THE CD-ROM AND THE USER MANUAL IN THIS BOX (COLLECTIVELY, THE [SOFTWARE]) AND RETURN THE SOFTWARE WITHIN 30 DAYS FROM THE DATE OF PURCHASE TO YOUR POINT OF PURCHASE FOR A REFUND.

In consideration of the right to use the SOFTWARE, you agree to abide by the terms and conditions of this Agreement.

1. LICENSE: Canon grants you the non-exclusive right to use the SOFTWARE only on a single computer. You may physically transfer the SOFTWARE from one computer to another provided that the SOFTWARE is used on only one computer at a time. You shall not install or use the SOFTWARE on a network, multiple CPU, multiple site arrangement, or any other hardware configuration where the SOFTWARE is accessible to more than one CPU or to more than one user.

YOU SHALL NOT ASSIGN, SUBLICENSE, RENT, LEASE, LOAN, CONVEY OR OTHERWISE USE, TRANSFER, COPY, TRANSLATE, CONVERT TO ANOTHER PROGRAMMING LANGUAGE, ALTER, MODIFY, DECOMPILE OR DISASSEMBLE THE SOFTWARE, IN WHOLE OR IN PART, EXCEPT AS EXPRESSLY PROVIDED IN THIS AGREEMENT.

2. BACK-UP COPY: You may make one copy of the SOFTWARE solely for back-up purposes, or copy the SOFTWARE onto the permanent storage device (e.g. a hard disk) of your computer and retain the original for back-up purposes. Any other copying of the SOFTWARE is a violation of this Agreement. You must reproduce and include the copyright notice on the back-up copy.

3. SUPPORT AND UPDATES: Canon is not responsible for providing maintenance or support for use of the SOFTWARE. No updates, fixes or support will be made available for the SOFTWARE.

4. LIMITED WARRANTY AND LIMITATION OF LIABILITY: It is your responsibility to choose, maintain and match the hardware and software components of your computer system. Thus Canon does not guarantee uninterrupted service or correction of errors or that the functions or performance of the SOFTWARE will meet your requirements. THE SOFTWARE IS LICENSED ON AN [AS IS] BASIS AND WITHOUT WARRANTY OF ANY KIND. The CD-ROM storing the SOFTWARE is warranted only against defective material under normal use for a period of ninety (90) days after purchase from an authorized Canon dealer as evidenced by your sales receipt. Your sole remedy for a defective CD-ROM shall be replacement of the same without charge when returned by you at your expense to your point of purchase and proven to be defective upon inspection. The replacement CD-ROM will be warranted for the remainder of the original ninety (90) day warranty period of the defective CD-ROM. The limited warranty does not apply if the failure of the CD-ROM resulted from accident, abuse or misapplication of the SOFTWARE and shall not extend to anyone other than the original user of the SOFTWARE.

EXCEPT AS SPECIFICALLY SET FORTH IN THIS PARAGRAPH 4, CANON, CANON'S SUBSIDIARIES, DISTRIBUTORS AND DEALERS DISCLAIM ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO THE SOFTWARE.

NEITHER CANON NOR ANY OF CANON'S SUBSIDIARIES, DISTRIBUTORS OR DEALERS IS LIABLE FOR ANY DAMAGES HOWSOEVER CAUSED, INCLUDING WITHOUT LIMITATION, DIRECT, CONSEQUENTIAL OR INCIDENTAL LOSS OR DAMAGE INCLUDING LOSS OF PROFITS, EXPENSE OR INCONVENIENCE HOWSOEVER CAUSED OR ARISING OUT OF THE SOFTWARE OR THE USE THEREOF.

NEITHER CANON, NOR ANY OF CANON'S SUBSIDIARIES, DISTRIBUTORS OR DEALERS SHALL HAVE ANY OBLIGATION TO INDEMNIFY YOU AGAINST ANY CLAIM OR SUIT BROUGHT BY A THIRD PARTY ALLEGING THAT THE SOFTWARE OR THE USE THEREOF INFRINGES ANY INTELLECTUAL PROPERTY OF SUCH THIRD PARTY.

5. TERM: This Agreement is effective upon your using the SOFTWARE and remains in effect until expiration of all copyright interests in the SOFTWARE unless earlier terminated. You may terminate this Agreement by destroying the SOFTWARE. This Agreement will also terminate without notice to you if you fail to comply with any of the terms of this Agreement and you must then promptly return the SOFTWARE. In addition, Canon may enforce its other legal rights.
6. U.S. GOVERNMENT RESTRICTED RIGHTS NOTICE: The SOFTWARE is provided with restricted rights. Use, duplication or disclosure is subject to restrictions as set forth in either subparagraph (c) (1) (ii) of the Rights in Technical Data and Computer software clause at DFARs 252.227-7013 or subparagraph (c) (1) and (2) of the Commercial Computer Software Restricted Rights Clause at FAR 52.227-19, as applicable.
7. SEVERABILITY: In the event that any provision of this Agreement is declared or found to be illegal by any court or tribunal of competent jurisdiction, such provision shall be null and void with respect to the jurisdiction of that court or tribunal and all the remaining provisions of this Agreement shall remain in full force and effect.
8. CONTROLLING LAW: The terms of this Agreement as it relates to purchases of the Software in the United States of America shall be governed and construed in all respects in accordance with the laws and regulations of the State of New York, without reference to choice of law principles. The terms of this Agreement as it relates to purchases of the Software in Canada shall be governed by the laws of the province of Ontario.
9. OWNERSHIP: All rights, including but not limited to copyrights and trade secret rights, to the SOFTWARE belong to Canon, its affiliated corporations and third party licensors. Your use of the SOFTWARE is subject to the United States, Canada and other applicable copyright and trademark laws and nothing in this Agreement constitutes a waiver of the rights of Canon, its affiliated corporations and third party licensors under such laws. Nothing contained in Paragraph 1 shall be construed to give Canon any ownership rights in any images, graphics or textual material that you save in connection with the Software.
10. ACKNOWLEDGEMENT: BY USING THE SOFTWARE, YOU ACKNOWLEDGE THAT YOU HAVE READ THIS AGREEMENT, UNDERSTOOD IT, AND AGREE TO BE BOUND BY ITS TERMS AND CONDITIONS. YOU ALSO AGREE THAT THIS AGREEMENT IS THE COMPLETE AND EXCLUSIVE STATEMENT OF AGREEMENT BETWEEN YOU AND CANON CONCERNING THE SUBJECT MATTER HEREOF AND SUPERSEDES ALL PROPOSALS OR PRIOR AGREEMENTS, VERBAL OR WRITTEN, AND ANY OTHER COMMUNICATIONS BETWEEN THE PARTIES RELATING TO THE SUBJECT MATTER HEREOF. NO AMENDMENT TO THIS AGREEMENT SHALL BE EFFECTIVE UNLESS SIGNED BY A DULY AUTHORIZED OFFICER OF CANON.

# Introduction

This chapter includes information on the precautions to be read before using ImageBrowser, how to use this Instruction Manual, the system requirements and the supported image types. It also explains the software main features and configuration.

## About This Manual

Thank you for purchasing this Canon product.

Precautions for using this product safely and icons to help you with procedures, etc. are described at the beginning of this Instruction Manual. Please be sure to read these first before proceeding to the information in the other chapters.

- It is prohibited to reproduce, in whole or part, the contents of this Instruction Manual without permission.
- Canon may change without notice the software specifications and contents of this Instruction Manual.
- The software screens and displays printed in this Instruction Manual may differ slightly from the actual software.
- The content of this Instruction Manual has been reviewed thoroughly. However, if you should notice any errors or omissions, please contact a Canon Service Center.
- Please note that irrespective of the above-mentioned, Canon does not take responsibility for the outcome of the operation of the software.

## Trademark Acknowledgments

- Canon and EOS are trademarks of Canon Inc.
- Macintosh, Mac OS, PowerBook and Power Macintosh are trademarks of Apple Computer Inc., registered in the United States and other countries.
- Other names and products not mentioned above may be registered trademarks or trademarks of their respective companies.

- Click on the item to display its page.

# How to Use This Instruction Manual

Click to move to the beginning of each chapter.

Click to move to the previous page.

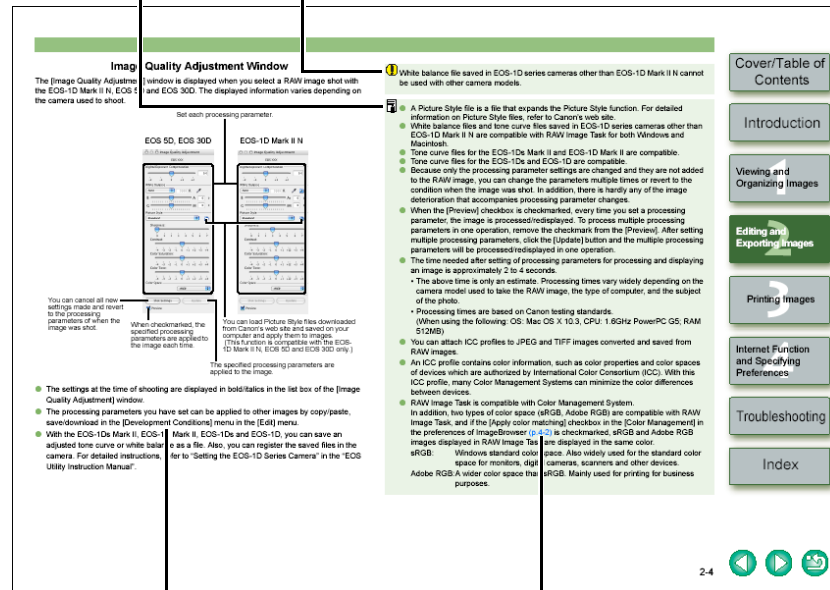

Click to move to the next page.

Click to return to previously displayed page.

- The camera name is shown in the screens as "EOS XXX".
- For how to use the software applications, also refer to the Help for each software application.
- For more information on the restrictions of each software, refer also to the "ReadMe" file for each software application.  
ReadMe: Double-click the [Canon Utilities] folder ► folder of each software application to display "ReadMe" file.

: Marks additional information that you will find helpful.

: Marks information that should be read before use to prevent problems that would interfere with the functioning of software and computer.

Square brackets [ ] are used to indicate items such as menu names, button names and window names that appear on the computer screen.

Reference page numbers are indicated in blue either in brackets ( ) or within text. Click on the page number to move to the corresponding page.

- In this manual, the screens used in the examples are from Mac OS X 10.3.
- Text inside < > in this document indicates the keys on the keyboard and camera button names.
- ► in this document indicates the sequence of operation as shown on the right.  
Example: [View] menu ► [Sort] ► [Shooting Date/Time].

## Main Window (Browser Window)

**Menu bar**  
You can perform various operations (p.1-8 to p.1-10, p.2-2 to p.2-6, p.4-2).

**Displays the registered favorite folders (p.1-3).**

**Displays the drives and folders on the computer (p.1-3).**

**Folder area**  
The images in the selected folder are displayed in the image display area. [RAW] is automatically attached to the folder containing the images downloaded with EOS Utility or CameraWindow MC.

**Add to Favorites button (p.1-3)**

**You can change the display mode of the image display area (p.1-4 to p.1-6).**

**Image display area**  
The images inside the folder selected in the folder area are displayed.

**Displayed on RAW images.**

**Displayed on images that are locked (protected).**

**Operating buttons**  
The number of selected images and images in the folder are displayed.

**You can delete the selected image or folder.**

**You can print images (p.3-1).**

**You can connect to the internet and send images (p.4-2).**

**The EOS Utility starts up and you can download images from the camera (p.1-3).**

**Displays the selected image in the viewer window (p.1-7).**

**Displays the selected images as a slide show (automatic playback) (p.1-8).**

- When sound is recorded in an image shot with an EOS-1D series camera, [RAW] is displayed. For playback of the sound, select the [File] menu ► [Sound] ► [Play].
- [RAW] is displayed on images shot with AEB.

- The mark attached to the folder containing the images downloaded with EOS Utility or CameraWindow MC is stored until you quit ImageBrowser.
- ImageBrowser is compatible with Color Management System (compatible color spaces: sRGB, Adobe RGB). When the [Apply color matching] checkbox in the [Color Management] in the preferences (p.4-2) is checkmarked, sRGB and Adobe RGB images are displayed in the same colors.

# Downloading Images from Your Camera

You can download shot images saved on the CF card in your camera to your computer using EOS Utility, software for the camera.

For detailed instructions on EOS Utility, refer to the "EOS Utility Instruction Manual".

**1 Start up ImageBrowser (p.1-1).**

**2 Click the [Canon Camera] button.**

→ [EOS Utility] starts up.

**3 Connect the camera to your computer with the interface cable and set the camera's power switch to <ON>.**

**4 Click the [Starts to download images] button in [EOS Utility].**

→ The images are downloaded to the computer and the downloaded images are displayed in the ImageBrowser main window.

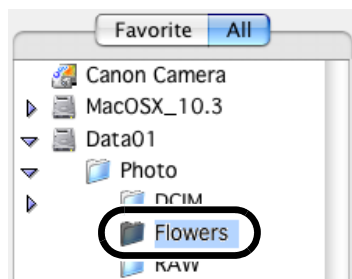

When downloading images using a third-party card reader, insert the memory card removed from the camera in the card reader, and follow the procedure in step 2. The image download window appears. You can then download images by clicking the [Starts to download images] button. For detailed information on downloading images using a third-party card reader, refer to "Downloading Images Using Your Card reader" in the "EOS Utility Instruction Manual".

# Displaying Images

The images in the folder selected in the folder area are displayed in the image display area.

**Select the folder where the images to be displayed are saved.**

→ The images in the folder are displayed in the main window.

# Handling the Folders

You can create a new folder as well as copy an optional folder.

**Select the [File] menu ► [New Folder]**

- A new folder is created.
- Select the folder you want to copy and then while holding down the <option> key, drag and drop another folder to copy.

## Registering Frequent Use Folder

You can register a frequently used folder as a [Favorite Folder].

**1 Select the [All] tab.**

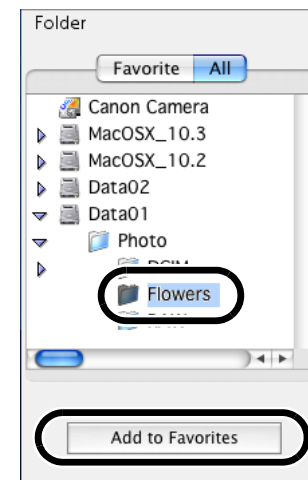

**2 Select the folder you want to register and then click the [Add to Favorites] button.**

→ The folder is displayed as [ ]

**3 Select the [Favorite] tab.**

→ The registered folder appears.

- Alternatively, you can register a favorite folder in the dialog box displayed when you click the [Add] button in the [Favorite] tab sheet.
- To remove the registered folder, select the folder and click the [Remove] button.

The removed registered folder is deleted only from the [Favorite] tab sheet and the actual folder or images inside the folder are not deleted.

# Selecting the Image Display Mode

You can select the image display mode from 3 types (Preview mode, List mode, TimeTunnel mode). Also, you can display images individually in the viewer window.

## Preview Mode

You can select an image displayed as a thumbnail and display it individually.

Select the [Preview] tab.

**Preview tab**

**Image information area**

**Folder area**  
The images in the selected folder are displayed in the thumbnail image display area.

**Image display area**  
The image selected in the thumbnail image display area is displayed.

You can display only the images that match a "Rating".

**Operating buttons (p.1-2)**  
Drag left or right to display the image in the thumbnail image display area enlarged or reduced.  
Displays the thumbnail image reduced.  
Displays the thumbnail image enlarged.

**Image information area details:**  
 - When sound is recorded in an image shot with an EOS-1D series camera, the name of the sound file is displayed. For playback of the sound, select the [File] menu ▶ [Sound] ▶ [Play].  
 - You can change the file name.  
 - You can lock (protect) the image.  
 - You can set a "Rating".  
 - You can enter comments.  
 - The [Keywords Setting] dialog box appears and you can set a keyword.  
 - Displays the histogram (brightness distribution).  
 - Displays the shooting information.

**Thumbnail image display area**  
The images inside the folder selected in the folder area are displayed. If you click an image, the image will be displayed in the image display area. If you double-click an image, the image will be displayed in the viewer window (p.1-7).

You can show/hide the image information area.

You can show/hide the operating buttons.

You can show/hide the folder area.

You can select or deselect all the images in the thumbnail image display area.

- To select multiple images, hold down the <shift> key or <⌘> key and click the images.
- To select sequential images, click the first image and then hold down the <option> + <shift> key and click the last image.
- You can switch between showing and hiding each item by clicking the [▶] button in the image information area.

⚠ You cannot change the file name or edit an image that is locked (protected).

# TimeTunnel Mode

You can display images in a "time tunnel" window, in the order of when they were shot.

Select the [TimeTunnel] tab.

The date and time of shooting is displayed.

**TimeTunnel tab**

Folder area  
The images in the selected folder are displayed in the image display area.

Image display area  
The images inside the folder selected in the folder area are displayed.

Tool panel  
You can advance or retract the shot date and time by dragging upward or downward.

You can set the auto cruise and you can show/hide the tool panel. When you show the tool panel, you can select the time tunnel's shot date and time by moving the slider. You can also change the appearance of the time tunnel and select the number of rings in the time tunnel.

Operating buttons (p.1-2)

- To select an image, click the target image.
- If you double-click an image, the image will be displayed in the viewer window (p.1-7).
- To select multiple images, hold down the <shift> key and click the images.
- If you move the cursor over the image and wait for a while, the shooting information of the image will be displayed.

# Viewer Window

You can display images in individual windows.

## Double-click the image.

→ The selected image is displayed in the viewer window.

You can double-click an image to display it in full screen. To return to the original view, click the image.

Select the display size. When an image is enlarged, the navigator window appears and you can check the enlarged display position and move it by dragging.

You can process a RAW image and display it.

You can set a "Rating".

Displays the previous image.\*

Displays the next image.\*

You can save the edited image (p.2-1).

You can edit the image (p.2-1).

You can divide the window and display multiple images.\*

You can display the shooting information and the AF point used at the time of shooting.

You can print the image (p.3-1).

You can display the image in full screen. To return to the original view, click the image.

When you have divided the window and displayed multiple images, you can link the images by making the enlargement ratio and display position of the images the same.\*

\* When you have selected multiple images and opened the viewer window, you can switch between the selected images. If you have selected one image and opened the viewer window, you can switch between images inside the same folder.

- When the shot was taken with automatic AF point selection, multiple active AF points might be displayed.
- You can change the processing parameters of RAW images (p.2-2).
- You can set the items that are displayed as the shooting information (p.4-2).

## Renaming the Files in a Single Operation

You can rename the multiple files in a single operation.

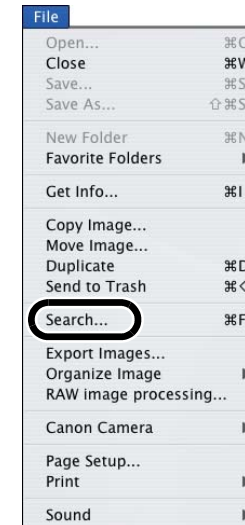

- 1 **Select the images.**
- 2 **Select the [File] menu ► [Organize Image] ► [Rename].**  
→ The [Rename] dialog box appears.
- 3 **Specify desired settings.**
  - For detailed information, select the [Help] menu ► [ImageBrowser Help] and refer to the help that appears.
- 4 **Click the [OK] button.**  
→ The settings are executed.

## Searching Images

You can search for images with set conditions.

- 1 **Select in the folder area the folder or drive to be searched (p.1-2).**
- 2 **Select the [File] menu ► [Search].**  
→ The [Set Search Criteria] dialog box appears.
- 3 **Specify desired settings.**
  - For detailed information, select the [Help] menu ► [ImageBrowser Help] and refer to the help that appears.
- 4 **Click the [Search Now] button.**  
→ The search begins and images that match the set conditions are displayed in the [Search Results] window.
- 5 **Click the [Finish] button.**  
→ The display returns to the main window.
  - Select the [Search Results] folder in the folder area to display the searched images.
  - The images in the [Search Results] folder are stored until you search for an image with set conditions again or quit ImageBrowser.

! All operations performed on images in the [Search Results] folder are reflected in any original images. Please be cautioned that editing or deleting of images in the [Search Results] folder will then also cause editing or deleting of any original images.

## Editing Function

### Editing Images

You can edit your images with red-eye correction, brightness/color correction, sharpness, trimming, text insertion, automatic correction. Also, you can transfer an image to other image editing software.

**1 Double-click the image to display it in the viewer window (p.1-7).**

**2 Click the [Edit] button and select the edit settings from the menu that appears.**

- The dialog box of the selected settings appears.

**3 Adjust using the dialog box that appears and then click the [OK] button.**

- For detailed information, select the [Help] menu ► [ImageBrowser Help] and refer to the help that appears.
- To transfer and edit your image in different image editing software, click the [Edit] button and select the image editing software to use from the menu that appears. Alternatively, select the image editing software to use from [Edit with Registered Application].

**4 Click the [Save] button.**

- The dialog box for saving with a different name appears.

**5 Enter the file name, select the save destination and then click the [Save] button.**

- The edited image is saved.

- ! ● You cannot select multiple images and edit.
- You cannot edit RAW images here. You can edit RAW images with RAW Image Task (p.2-2).
- Edited images cannot be reverted to their original condition. We recommend saving edited images under a different name.

## Rotating Images

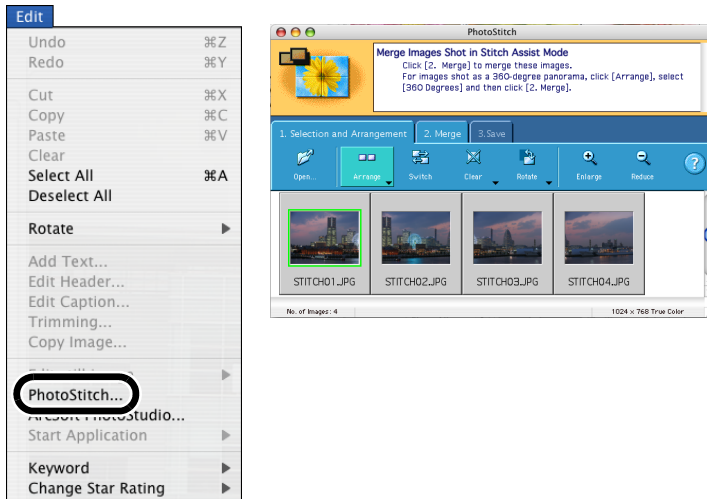

You can rotate the image.

- 1 **Select the images.**
- 2 **Select the [Edit] menu ► [Rotate Image].**  
→ The [Rotate Image] dialog box appears.
- 3 **Click the desired setting button and then click the [OK] button.**  
→ The images are rotated.

## Merging Images

You can merge up to 4 JPEG images to create a panorama image.

- 1 **Select multiple images.**
- 2 **Select the [Edit] menu ► [PhotoStitch].**  
→ The PhotoStitch starts up and the main window is displayed.

- Follow the instructions displayed to merge the images.
- For detailed information, click the [?] button and refer to the Help displayed.

- ! ● You cannot merge RAW images in the PhotoStitch.
- Merging may not be successful when more than 4 images are merged.

## Processing RAW Images

You can specify the same processing parameters for RAW images as for the camera. Also, you can convert RAW images to JPEG images or TIFF images and save or transfer them to other image editing software, as well as attach ICC profiles.

- 1 **Select the RAW image.**
- 2 **Select the [File] menu ► [RAW image processing].**  
→ The RAW Image Task starts up and the main window is displayed.
  - Refer to the [next page](#) for an explanation of the RAW Image Task window.
- 3 **Adjust the image.**
  - Adjust the image with the [Image Quality Adjustment] window.
- 4 **Click [Save] in the toolbar.**  
→ The [Save] window appears.
- 5 **Specify desired settings.**
- 6 **Click the [Save] button.**  
→ The image is saved.
- 7 **Select the [RAW Image Task] menu ► [Quit RAW Image Task].**  
→ The RAW Image Task quits.

## Image Quality Adjustment Window

Set each processing parameter.

You can cancel all new settings made and revert to the processing parameters of when the image was shot.

When checkmarked, the specified processing parameters are applied to the image each time.

You can load Picture Style files downloaded from Canon's web site and saved on your computer and apply them to images. (This function is compatible with the EOS-1D Mark II N, EOS 5D and EOS 30D only.)

The specified processing parameters are applied to the image.

- The above window shows information displayable when you select a RAW image shot with the EOS-1D Mark II N, EOS 5D and EOS 30D. The displayed information varies depending on the camera used to shoot.
- The settings at the time of shooting are displayed in bold/italics in the list box of the [Image Quality Adjustment] window.
- The processing parameters you have set can be applied to other images by copy/paste, save/download in the [Development Conditions] menu in the [Edit] menu.
- With the EOS-1D series cameras, you can save an adjusted tone curve or white balance as a file. Also, you can register the saved files in the camera. For detailed instructions, refer to "Setting the EOS-1D Series Cameras" in the "EOS Utility Instruction Manual".

! White balance file saved in EOS-1D series cameras cannot be used with other camera models.

- A Picture Style file is a file that expands the Picture Style function. For detailed information on Picture Style files, refer to Canon's web site.
- White balance files and tone curve files saved in EOS-1D series cameras are compatible with RAW Image Task for both Windows and Macintosh.
- Tone curve files for the EOS-1Ds Mark II and EOS-1D Mark II are compatible.
- Tone curve files for the EOS-1Ds and EOS-1D are compatible.
- Because only the processing parameter settings are changed and they are not added to the RAW image, you can change the parameters multiple times or revert to the condition when the image was shot. In addition, there is hardly any of the image deterioration that accompanies processing parameter changes.
- When the [Preview] checkbox is checkmarked, every time you set a processing parameter, the image is processed/redisplayed. To process multiple processing parameters in one operation, remove the checkmark from the [Preview]. After setting multiple processing parameters, click the [Update] button and the multiple processing parameters will be processed/redisplayed in one operation.
- The time needed after setting of processing parameters for processing and displaying an image is approximately 2 to 4 seconds.
  - The above time is only an estimate. Processing times vary widely depending on the camera model used to take the RAW image, the type of computer, and the subject of the photo.
  - Processing times are based on Canon testing standards. (When using the following: OS: Mac OS X 10.3, CPU: 1.6GHz PowerPC G5; RAM 512MB)
- You can attach ICC profiles to JPEG and TIFF images converted and saved from RAW images.
- An ICC profile contains color information, such as color properties and color spaces of devices which are authorized by International Color Consortium (ICC). With this ICC profile, many Color Management Systems can minimize the color differences between devices.
- RAW Image Task is compatible with Color Management System. In addition, RAW Image Task is compatible with two types of color space (sRGB, Adobe RGB), and if the [Apply color matching] checkbox in the [Color Management] in the preferences of ImageBrowser (p.4-2) is checkmarked, sRGB and Adobe RGB images displayed in RAW Image Task are displayed in the same color.
  - sRGB: Windows standard color space. Also widely used for the standard color space for monitors, digital cameras, scanners and other devices.
  - Adobe RGB: A wider color space than sRGB. Mainly used for printing for business purposes.

# Exporting Function

## Exporting Images

You can change the size of JPEG images as well as convert them to other image types and save them.

**1 Select the images.**

**2 Select the [File] menu ► [Export Images].**

→ The [Write a still image] dialog box appears.

**3 Select [Edit and Save Image] and then click the [Next] button.**

→ The [Edit and Save Image] dialog box appears.

**4 Specify desired settings.**

• For detailed information, select the [Help] menu ► [ImageBrowser Help] and refer to the help that appears.

**5 Click the [Finish] button.**

→ The settings are executed.

**!** You cannot export RAW images.

## Exporting Shooting Properties

You can export as a text file the shooting properties recorded to the image when the shot was taken.

**1 Select the image.**

**2 Select the [File] menu ► [Export Images].**

→ The [Write a still image] dialog box appears.

**3 Select [Export Shooting Properties] and then click the [Next] button.**

→ The [Export Shooting Properties] dialog box appears.

**4 Specify desired settings.**

• For detailed information, select the [Help] menu ► [ImageBrowser Help] and refer to the help that appears.

**5 Click the [Finish] button.**

→ The settings are executed.

## Exporting an Image as a Screen Saver

You can export a JPEG image as a file for a computer screen saver.

**1** Select the image.

**2** Select the [File] menu ► [Export Images].

→ The [Write a still image] dialog box appears.

**3** Select [Export as a Screensaver] and then click the [Next] button.

→ The [Export as a Screensaver] dialog box appears.

**4** Specify desired settings.

● For detailed information, select the [Help] menu ► [ImageBrowser Help] and refer to the help that appears.

**5** Click the [Finish] button.

→ The settings are executed.

! You cannot export RAW images.

## Exporting an Image as Wallpaper

You can export a JPEG image as a file for wallpaper for a computer.

**1** Select the image.

**2** Select the [File] menu ► [Export Images].

→ The [Write a still image] dialog box appears.

**3** Select [Export an Image as Wallpaper] and then click the [Next] button.

→ The [Set Image as Wallpaper] dialog box appears.

**4** Specify desired settings.

● For detailed information, select the [Help] menu ► [ImageBrowser Help] and refer to the help that appears.

**5** Click the [Finish] button.

→ The settings are executed.

! You cannot export RAW images.

# 3 Printing Images

This chapter explains various ways to print images.

- Click on the item to display its page.

<b>Printing Images</b> .....	3-1
Printing One Photo per Page .....	3-1
Index Printing .....	3-2
Layout Printing .....	3-2

## Printing Images

### Printing One Photo per Page

You can print one photo per page.

**1** Select an image.

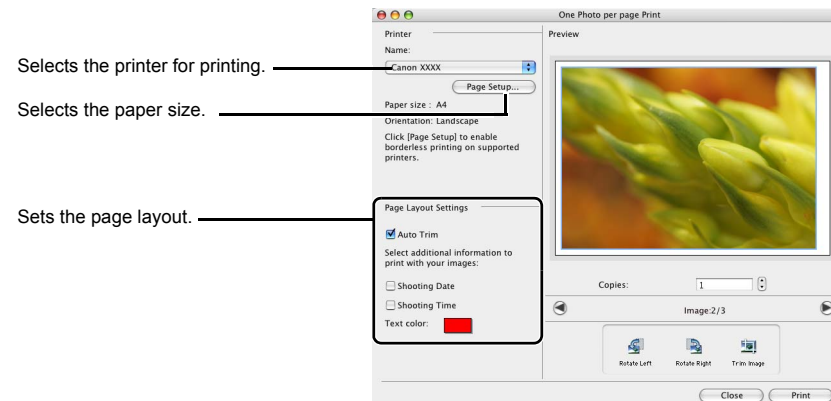

**2** Click the [Print] button and select [One Photo per page Print] from the menu that appears.

- The [One Photo per page Print] dialog box appears.

**3** Specify desired settings.

- For detailed information, select the [Help] menu ► [ImageBrowser Help] and refer to the help that appears.

Selects the printer for printing.

Selects the paper size.

Sets the page layout.

**4** Click the [Print] button.

- The [Print] dialog box appears.

**5** Specify desired settings and then click the [Print] button.

- The image is printed.
- For detailed information, click the [?] button and refer to the Help displayed.

## Index Printing

You can print multiple images in index format.

### 1 Select the images.

### 2 Click the [Print] button and then select [Index Print] from the menu that appears.

→ The [Index Print] dialog box appears.

### 3 Specify desired settings.

- For detailed information, select the [Help] menu ► [ImageBrowser Help] and refer to the help that appears.

### 4 Click the [Print] button.

→ The [Print] dialog box appears.

### 5 Specify desired settings and click the [Print] button.

- The images are printed.
- For detailed information, click the [?] button and refer to the Help displayed.

## Layout Printing

You can layout images and print them.

- The settings displayed in the dialog box vary depending on the printer being used.

### 1 Select the images.

### 2 Click the [Print] button and then select [Layout Print] from the menu that appears.

→ The [Layout Print] dialog box appears.

### 3 Specify desired settings.

- You can move the image by dragging it.
- You can change the size of the image by dragging the borders of the image.
- For detailed information, select the [Help] menu ► [ImageBrowser Help] and refer to the help that appears.

### 4 Click the [Print] button.

→ The [Print] dialog box appears.

### 5 Specify desired settings and click the [Print] button.

- The images are printed.
- For detailed information, click the [?] button and refer to the Help displayed.

# Internet Function

## Sending an Image by E-mail

You can attach an image to an e-mail and send it.

**1** Select the image.

**2** Click the [Internet] button and then select [Create Image for Email] from the menu that appears.

→ The [Create Image for Email] dialog box appears.

**3** Select either [Send without changing the file size] or [Resize, compress, and send] and then click the [Next] button.

→ The compression settings dialog box appears.

→ If you selected [Send without changing the file size], proceed to step 5.

**4** Specify desired settings and click the [Next] button.

**5** Click the [Finish] button.

→ The image is displayed in the browser window and the e-mail software is started.

● Attach [E-mail Images] from the folder area and send the e-mail.

# Specifying Preferences

You can set various ImageBrowser function settings.

**1** Select the [ImageBrowser] menu ► [Preferences].

**2** Specify desired settings.

# Troubleshooting

If you could not complete the installation correctly, software does not work, or you could not display images with ImageBrowser, consult the items described below.

- For instructions on installing, refer to the “Software Guide” supplied with your camera.

## Installation failed.

- **Are you logged into an account other than the Administrator account?**
  - You cannot install software unless you are logged into an account with Administrator privileges. Log in again into an account with Administrator privileges.  
For how to log in and how to specify Administrator settings, refer to the User’s Manual for the Macintosh computer you are using or for OS X.

## Software does not work.

- **Does your computer meet the system requirements for the software?**
  - Check the system requirements (p.0-1).
- **Is there enough RAM (memory)?**
  - Check the system requirements (p.0-1).
- **Is the screen resolution less than [1024 x 768]?**
  - Specify [1024 x 768] or more for the screen resolution (p.0-1).
- **Is the color less than [Thousands]?**
  - Specify [Thousands] or more for the color (p.0-1).
- **Are multiple applications running?**
  - Quit any applications other than ImageBrowser. Even if your computer has the RAM capacity (memory) described in system requirements (p.0-1), if other application is running at the same time as ImageBrowser, you may not have sufficient RAM (memory).
- **The preferences file for your software may be damaged. Quit all active programs and delete the files from the [Preferences] folder as described in the procedures below, and then restart the software.**
  - Open the hard disk drive where the system is saved ► the [Users] folder ► Folder for the logged in user ► the [Library] folder ► the [Preferences] folder and then delete the target file.
  - For OS X 10.2, double-click the hard disk drive where the system is saved ► click the [Home] button ► the [Library] folder to open the [Preferences] folder and delete the target files.

• ImageBrowser Preferences	Preferences file for the ImageBrowser
• RAW Image Task Pref	Preferences file for the RAW Image Task
• PhotoStitch Pref	Preferences file for the PhotoStitch

## Could not display images with ImageBrowser.

- **Did you try to display images other than the image types that are supported by ImageBrowser?**
  - Check the supported images (p.0-1).

# Uninstalling the Software

The following explanation uses the procedures for uninstalling the ImageBrowser as an example for uninstalling other programs as well.

- Log into the account used when installation was performed.
- Before starting the software uninstallation, quit all programs you are using and disconnect the dedicated cable from your computer.
- When you have moved the folders and the software to be deleted to the Trash, select the [Finder] menu ► [Empty Trash] and empty the Trash. You cannot reinstall the software until you have emptied the Trash.

## 1 Display the folder in which the software is saved.

- Open the [Canon Utilities] folder.

## 2 Drag the [ImageBrowser] folder to the Trash.

## 3 Select the [Finder] menu on the desktop ► [Empty Trash].

- The software is deleted.
- When uninstallation ends, restart your computer.

⚠ You cannot retrieve data that you have emptied into the Trash and deleted, so be particularly careful when deleting data.
