Posing Table

ASSEMBLY INSTRUCTIONS

Instructions

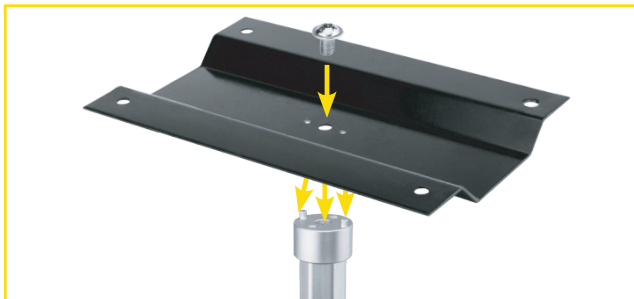

1. Place the tabletop facedown on a flat, non-scratch surface. Remove the four screws and mounting bracket from the tabletop with a PH3-size Phillips screwdriver.

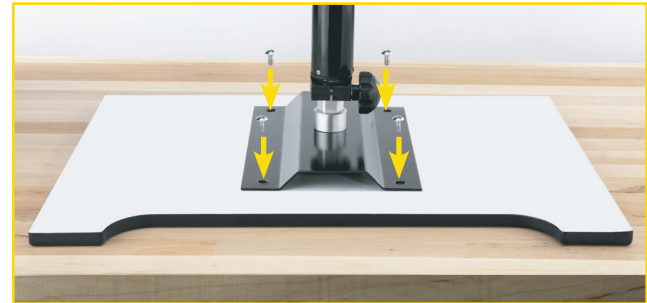

2. Use the included hex key to remove the hex-flange bolt from the top-center of the riser.

3. Hold the column in one hand, and seat the mounting bracket's pin holes—wings up—onto the riser bracket pins. Insert the hex-flange bolt into the threaded socket, and use the hex key to tighten until secure.

4. Place the tabletop facedown on a flat, non-scratch surface. Align the holes in the mounting bracket with the holes in the tabletop. Fasten all four screws until secure. Do not overtighten. **Tip:** Insert all four screws before tightening.

5. Stand the pedestal base on the casters, and lock all casters. Insert the bottom of the column into the open port of the pedestal base. Press down until the tabletop is firmly seated into the base.

6. Loosen the locking knob, and adjust the tabletop's height. Tighten the locking knob to secure the table's position. Make sure everything is secure before use.
