NANOMAX 450 RW20

with 3-way head REVOMAX RW20

Item Number: 52451

The new NANOMAX series, the so-called series 4, consists of a total of six different tripods and one monopod with ball head. The complete series 4 convinces with even higher quality, well thought-out detailed solutions and practice oriented operation. The triangular aluminium profile for tripod legs and centre column, which ensures reliable anti-twist protection, is a special feature of all new NANOMAX models.

Description

High quality materials like anodized aluminium profile for tripod legs and centre column, a protecting foam padding of the upper tripod legs, aluminium die casting for tripod star, simple, intuitive operation, unmistakable design in combination with a compact 3-way head RW20, this is the new entry-level tripod NANOMAX 450 RW20.

Well thought-out detail solutions, such as e.g. the design of tripod legs and centre column with their triangular aluminium profile, ensure reliable anti-twist protection and thus an extremely secure stand. A 3-fold angle adjustment of the tripod legs including the ground level macro position make the NANOMAX 450 RW20 the right solution for perfect macro photography. The centre column hook can be fastened to the long and also the short centre column, so that additional weights can be attached. The integrated bubble level in the tripod star, as well as the modern and independent design sensibly round off the well thought out further development of the well known NANOMAX tripod series 2.

The 3-way head with the well established camera QRC, which is entirely made of aluminium, is the ideal tripod head for the NANOMAX 450. The robust camera QRC-System* of the 3-way head is secured by an additional locking lever and thus prevents accidental opening. The robust aluminium camera adapter plate with a skid resistant cork padding, retractable video pin and 1/4 inch camera fastening screw provides a safe base for fascinating shootings with CSC and medium size DSLR-cameras.

The extension height of 145 cm and the load bearing capacity of 4 kg make the NANOMAX 450 RW20 the perfect tripod for ambitious newcomers. Due to its low weight for a sturdy tripod with 3-way head, it is most suitable for use at home and en-route and also the perfect solution for CSC cameras, small and light DSLR cameras as well as Bridge cameras and camcorders.

Features of the NANOMAX 450 RW20:

- Tripod star made of sturdy die cast aluminium
- Tripod legs made of anodised aluminium profiles
- Integrated monopod with convenient internal clamping
- Protective foam padding of the top tripod leg segment
- Convenient 3-stage tripod leg angle adjustment
- Integrated macro position for ground level shooting
- Additional short centre column for ground-level macro shots
- Convenient quick-action clips for comfortable tripod assembly and disassembly
- Stable and secure stand because of robust tripod leg clamping
- Rotatable centre column hook possible for long and short centre column
- Well legible bubble level integrated in the tripod star
- Robust aluminium 3-way head with separate 3-fold clamping
- Proven camera QRC-System* with 1/4 inch camera fastening screw
- Camera adapter plate with retractable video pin and skid resistant cork padding
- Additional protection against accidental unlocking of the camera adapter plate
- Well legible horizontal scale for precise panoramic shots
- Standard 3/8 inch tripod connection thread – suitable for products from other manufacturers
- Suitable for CSC and medium size DSLR-cameras and Camcorders

Highlights:

- Perfect universal tripod with detachable monopod
- Stable aluminium monopod with inside clamping
- Robust 3-way head with camera QRC-System*
- 3-fold tripod leg angle adjustment incl. macro position
- 10 year manufacturer's warranty

*QRC-System is an abbreviation for CULLMANN Quick-Release Coupling System
