

MVP100 IP VIDEO PHONE

InFocus
The New Way to Collaborate

Feature-rich and easy-to-use business phone

The InFocus MVP100 is the only phone you'll need on your desk. The MVP100 video phone enables effective visual communication with the ease of a standard phone so you can be more productive in your business interactions.

The MVP100 is packed with features and simple to use, maintain and adjust to suit you. Making an audio or video call is as easy as a standard phone. Plus, you can import your existing contact lists and manage its features from the web.

Ready for mass deployment in the office, the MVP100 is easily provisioned and managed by IT, just like any other business IP phone.

Key Benefits

- Enhance collaboration and productivity of people, teams and partners within an office and between offices
- Affordable enough for mass deployment to improve the visual communications of more people
- Significant reductions in travel costs while maintaining effective face-to-face communications
- Quickly pay for themselves with savings in travel and increased productivity

Key Features

- 10-inch HD display and 720p camera are both adjustable for comfortable visual communication
- Make calls to – or answer calls from – any phone
- As easy to use as a standard phone
- Seamless videoconferencing with InFocus Mondopad
- Manage contacts and sync features via infocus.net web portal
- Standard SIP protocol

Visual communication made easy

The advantages to communicating face-to-face are many – and the MVP100 makes it as easy as making a standard phone call. Going beyond facial expressions, visual communication brings audiences closer together so ideas are more clearly expressed and understood. Time is saved and efficiency skyrockets.

IT-friendly management

The MVP100 is designed for easy mass deployment and easy management. They seamlessly integrate into business environments as a remotely controlled asset like any other IP phone. The phone can also be password protected so outgoing calls and contact information can be secure while users are away.

HD quality video and audio

The phone has a crisp 10" color display that is easily adjustable plus a 720p HD camera that is also adjustable, providing a relaxing view of the caller and the caller's view of you. The built-in wide-band speaker and high dynamic range microphone ensure clear conversations. You can also use your headset.

Remote access via web portal

IT and users can manage and support their MVP100 phones via a comprehensive web portal. Manage your phone contacts and automatically sync them to your phone and even enable features such as call forwarding and password protection all from the web.
