

Component Checklist

Adjustor Pole Extension Pole Plastic Cover

HARDWARE

IMPORTANT INFORMATION:

- ! **IMPORTANT - Install Telehook Adjustor Pole as per installation instruction.**
- ! This product supports a maximum load of 454kg (1000lbs.).
- ! The manufacturer accepts no responsibility for incorrect installation.

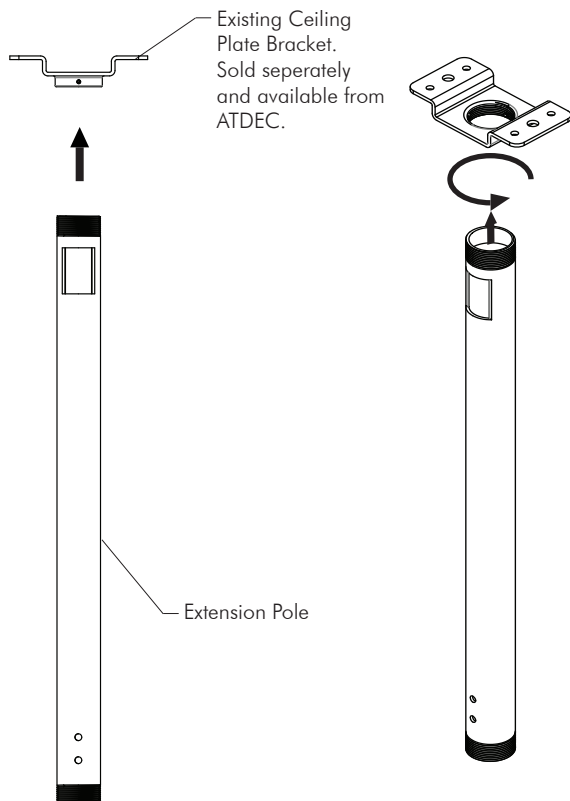

Step 1. Check Components

Check you have received all parts against the component checklist and hardware above.

Step 2. Configurations

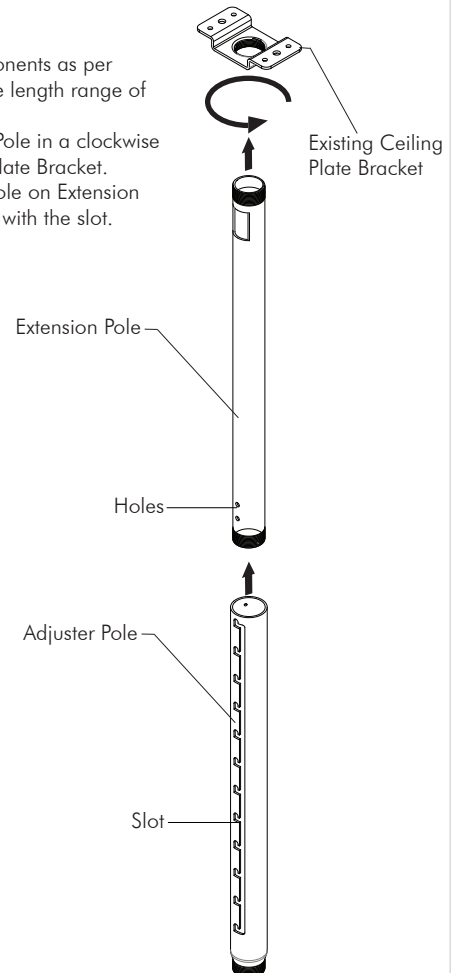

24" Range

- 2.1.** Configure components as per image below for a pole length of 24".
- 2.2.** Screw Extension Pole in a clockwise direction into Ceiling Plate Bracket.

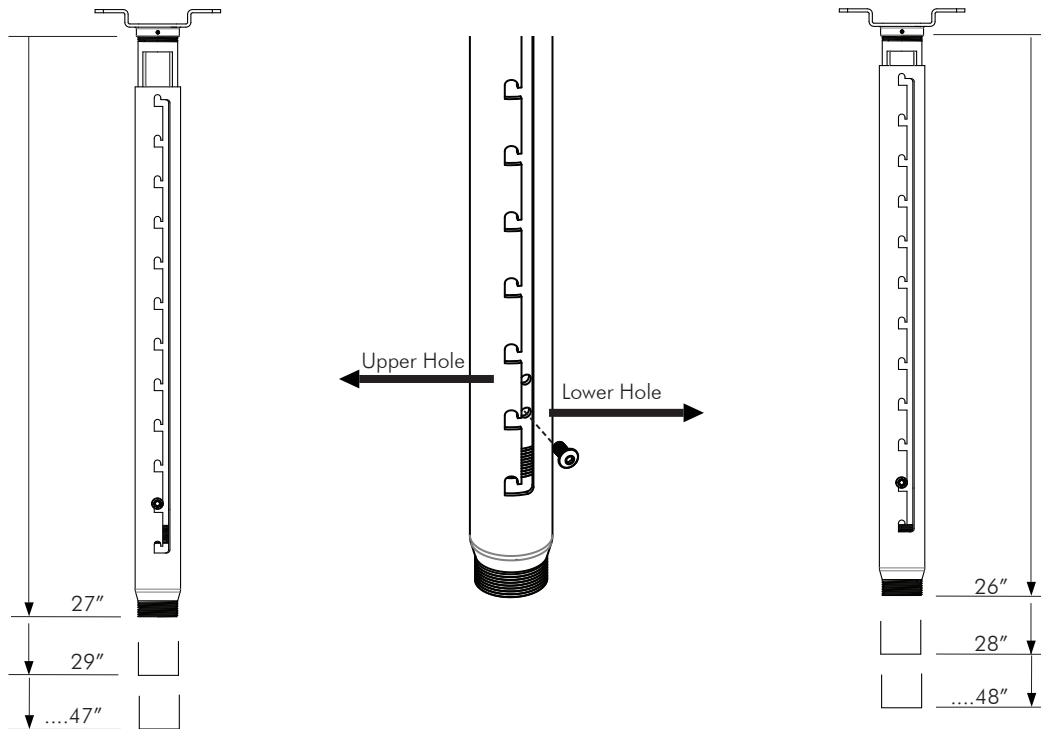

26-48" Range

- 2.3.** Configure components as per shown below for a pole length range of 26-48".
- 2.4.** Screw Extension Pole in a clockwise direction into Ceiling Plate Bracket.
- 2.5.** Locate Adjustor pole on Extension Pole aligning the holes with the slot.

Step 3. Assemble to desired length

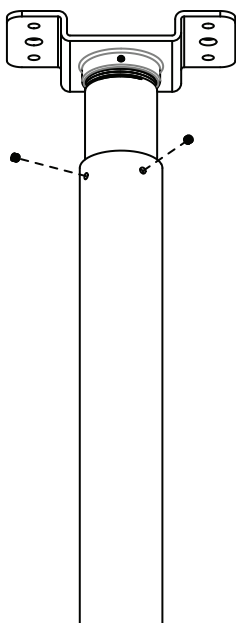

3.1. Insert the one Standard or Security Socket Head Pan Screw through the slot in the Adjuster Pole into either of the 2 visible holes in the Extension Pole. Each hole enables a different length range.

3.2. Move the extension pole to the desired length and rotate to locate in one of the three slots. Adjust the tightness of the screw using the 4mm Security Allen Key supplied.

Step 4. Secure Position

4.1. When desired pole length has been selected use either the Security or Set Standard Screws to secure position. Tighten with the 2.5mm Security Allen Key supplied.

4.2. Snap off upper segment of cable cover for cable access.
