Dual Security Gooseneck Kiosk Stand with Locking Case and Anti-Theft Cable for iPad and iPad Air

Dual Security Gooseneck Kiosk Stand

Make your tablet the cornerstone of a sophisticated, streamlined point of sale, with the Dual Security Gooseneck Kiosk Stand with Locking Case and Anti-Theft Cable for iPad and iPad Air from CTA Digital. This unique stand combines the security of two independent locking mechanisms with a heavy-duty and extraordinarily flexible gooseneck. The locking aluminum case encloses your tablet but leaves total access to the charging port, volume buttons, home button, and camera. The case can rotate a full 360 degrees for landscape and portrait orientations and fastens shut with a secure lock and key. A galvanized steel anti-theft cable attaches to a security slot at the stand base or on the back of the holder and secures to any permanent fixture for an additional measure of protection. The malleable gooseneck can be adjusted to accommodate any viewing angle, greatly simplifying register transactions. Keep your tablet charging and cable neatly tucked in with the included adhesive cable management clips and ties. The sturdy stand base can be anchored to a desk or countertop via predrilled holes, with an included set of mounting hardware. Also included is a 2-in-1 tablet stylus and ballpoint pen, plus a convenient built-in stylus holder on the stand base.

Features include:

- Aluminum case allows access to charging port, home and volume buttons, and front and rear cameras
- Case rotates full 360 degrees for easy landscape and portrait orientations
- Case lock keeps tablet secured inside kiosk stand
- Anti-theft cable secures stand to any permanent fixture
- Heavy-duty, flexible gooseneck adjusts to create any viewing angle
- Stand base can be anchored to desk or countertop with included mounting hardware
- 2-in-1 stylus and ballpoint pen with built-in holder on stand base
- Adhesive cable management clips and ties
- Compatible with iPad Air, iPad Air 2, and iPad (2nd-4th generations); iPad Air models secured with included adapters
