How to use your **Webcaster X1** to stream to Facebook Live

1 Connect your HDMI camera to the back of Epiphan **Webcaster X1™** using an HDMI cable.

2 Using an Ethernet cable, connect **Webcaster X1** to your network. (The network must have access to Facebook so **Webcaster X1** can send your stream to Facebook Live.)

3 Plug the provided power cable into the back of **Webcaster X1** and turn on the device by toggling the ON/OFF switch.

4 See your Facebook Live device pairing code on the front of **Webcaster X1**.

5

In a browser on your computer or phone, go to **https://www.facebook.com/device**.

After logging in, enter the device pairing code from the front of your **Webcaster X1**. Click **Continue**.

6

Click **Okay** to let Facebook Live know it's okay to send your profile data to **Webcaster X1** and to let **Webcaster X1** post to Facebook for you.

7

When you're ready to make your stream public, go to your Facebook page and set your stream permissions to public or friends.

8

You're live! See **Webcaster X1**'s screen to see how long you've been streaming. When you're done your stream, turn off **Webcaster X1**.

For all tech specs and documentation including instructions on how to configure your **Webcaster X1** with a keyboard, mouse and monitor, visit [epiphan.com/webcaster-fb](https://www.epiphan.com/webcaster-fb)
