

## IGGY & THE CRADLE

Mini Action Tripod and Phone Holder

**Iggy** is 3 Legged Thing's versatile mini action tripod. Built from rugged ABS plastic, **Iggy** has an adjustable ballhead and 1/4"-20 screw mount. **Iggy** comes packaged with a useful **GoPro adapter**, making it an essential companion to the popular action cam range.

Measuring just 14 cm / 5.5 inches high when standing, Iggy lends itself to a huge variety of uses including desktop tripod, stand mount for microphones and small lights, a low-level tripod for compact and lightweight cameras, and paired with **The Cradle**, can be used as a smartphone stand for watching video, and taking pictures.

**Iggy**'s legs can be closed to create an ergonomic handle which makes the ideal camera handle for skaters, boarders and other outdoor activities.

Featuring two 1/4"-20 screw threads for attachment to tripods, **The Cradle** is a phone holder which can expand to hold most smartphones up to iPhone 6/7/8 Plus and Samsung Galaxy S8 width.

**The Cradle** can be used on any tripod or device with a 1/4"-20 screw mount, and can hold phones in either portrait or landscape orientation.

**The Cradle** folds flat for storage and transportation.

See opposite for a list of the product packs available.
