

 iMac

## Welcome to iMac

Let's begin. Press the power button to start up your iMac.

Your rechargeable Magic Mouse 2 and Magic Keyboard are already paired with your iMac. If you purchased a Magic Trackpad 2 or Magic Keyboard with Numeric Keypad with your iMac, it will also be paired. To begin using these devices, simply turn the on/off switch to on (green will be visible).

Next, Setup Assistant will help you connect to your Wi-Fi network, create a user account, and migrate your documents, photos, and music from a Mac or PC. It can also help you create a new Apple ID or sign in with your existing Apple ID, which sets up your account in the App Store, the iTunes Store, Messages, and FaceTime.

Setup Assistant also configures iCloud, so apps such as Mail, Contacts, Calendar, and Safari will have your latest information.

## Get to know your desktop

Your Mac desktop lets you find everything and do anything. Keep the apps you use most in the Dock at the bottom of the screen. Open System Preferences to customize your desktop and other settings. Click the Finder icon to get to all your files and folders.

The menu bar at the top of the screen shows a menu based on the app you are using, as well as useful information about your Mac. Click the Wi-Fi icon to check the status of your wireless Internet connection. Click the Siri icon to do things like find files, launch apps, and get directions simply by using your voice.

Power button

**Headphone**

Plug in headphones or external speakers

**USB 3**

Charge devices, connect external storage, and more

**SDXC**

Transfer photos from your camera's memory card

**Thunderbolt 3 (USB-C)**

Charge devices; connect external displays and high-performance peripherals

**Gigabit Ethernet**

Connect to the Internet or a local network

### One-button click

Click or double-click anywhere on the surface.

### Two-button click

Enable Secondary Click in System Preferences to use right- and left-click.

### Screen zoom

Hold down the Control key and scroll with one finger to enlarge items on your screen.

### 360° scroll

Brush one finger along the surface to scroll or pan in any direction.

## Using your Magic Mouse 2 and Magic Keyboard

To personalize how you use your devices, open System Preferences and select Keyboard, Mouse, or Trackpad. Click the tabs to explore the available gestures and options for each device (like those pictured for the mouse, above).

To charge your devices, or if you need to pair them again, use the included Lightning to USB Cable to connect them to iMac. Check battery level and connection status in the Bluetooth menu.

**An important note**

Please read this document and the safety information in the *iMac Info* guide carefully before you first use your computer.

**Back up your data**

You can back up your iMac using Time Machine, a built-in backup tool in macOS that works with an external storage device, such as AirPort Time Capsule (sold separately). Open System Preferences and click the Time Machine icon to get started.

**Learn more**

For guidance on setting up and using your iMac, please refer to the *iMac Essentials* guide. To view the guide in iBooks, open iBooks, click iBooks Store, then search for “iMac Essentials.”

You can find answers to your questions, as well as instructions and troubleshooting information, in Mac Help. Click the Finder icon, click Help in the menu bar, then choose Mac Help.

**Support**

For detailed support information, visit [www.apple.com/support/imac](http://www.apple.com/support/imac). To contact Apple directly, go to [support.apple.com/contact](http://support.apple.com/contact).

**Restoring your software**

If you have a problem with your iMac, macOS Utilities can help you restore your software and data from a Time Machine backup or reinstall macOS and Apple apps. To access macOS Utilities, restart your computer while holding down the Command and R keys.
