About the M-2:

The **M-2 Upright** is one of the components of the Wimberley Modular Flash Bracket System. It is included in the F-1 combo unit.

F-1
(Telephoto Bracket)

Connecting Flash Bracket Modules:

(The figure below shows the connection between M-3 and upright module; the same principle applies for other module connections.)

Tip: if you find the metal knobs difficult to grip, try wrapping several layers of self-fusing rubber grip tape (**3M 2155**) around the knob to cushion it and make it easier to grip in the field.
