

MAKE OF IT WHAT YOU WILL

FEATURES

FreeForm™ Modular System – Easily customize, adjust, and upgrade your case, inside and out.

Flexible Dual Chamber Design – Removable partition panel isolates power supply and cables for clean management.

Additional front panel - Provide a solid front panel to turn the chassis into a simple and sleek look.

Clear View Inside – An edge-to-edge light grey tinted tempered glass side panel gives a wide view inside your PC to showcase your masterpiece.

360mm liquid cooling support - An add-on bracket allows 360mm radiator installation in front.

Drop-proof Side Panels - The unique bracket holds the side panels from falling down while installing or removing.

Clip-and-click - Unique components panel for drive cage adjustment.

Slip-and-Clip SSDs - Two pockets with four mounting positions – behind motherboard tray and on top of partition plate.

Cooler Master is breaking new ground in the way cases are designed, made, bought and used. Fundamental to this reimagining is FreeForm™.

We want you to have absolute control over how your case looks and functions, and that means giving you the option to adjust the exterior structure and aesthetic via a range of replacement panels and doors. Each choice changes the look and feel of the case, but also the flexibility of the interior layout.

The option to relocate the M.port and remove the partition plate gives you the freedom to adjust the inside of the case. Leveraging our unique clip-and-click design, FreeForm™ lets users vertically adjust or entirely remove drive cages, allowing for multiple system configurations.
