ROKINON AF

New AF 85mm F1.4
Full Frame Prime for Sony E

Sharp, Bright and Weather Sealed

(New York, New York) March 27, 2019 – The AF 85mm F1.4 Full Frame for Sony E is the fourth new lens introduced this spring by ROKINON. It is ROKINON's sixth autofocus lens designed specifically for optimal quality imaging with Sony full frame mirrorless cameras and as a high speed 127.5mm telephoto equivalent with Sony APS-C models.

Its complex optical construction consists of 11 Ultra Multi Coated (UMC) elements in eight groups, including High Refractive Index (HR) glass for a more compact lens with high image resolution. The achromatic design incorporates Extra Low Dispersion (ED) glass to effectively correct chromatic aberrations and minimize peripheral softness.

This autofocusing 85mm was designed with creativity in mind. The bright F1.4 aperture provides excellent performance even when shooting indoors or in darker conditions and precise selective focus control. Attractive bokeh is created through precision lens polishing and a nine blade iris for natural, circular, out-of-focus highlights at all apertures.

The ROKINON AF 85mm F1.4 for Sony E utilizes two Linear Ultrasonic Motors (LSM's) that only have to adjust a single inner lens group. This internal focusing design provides fast, precise, and quiet autofocusing and a non-rotating 72mm filter mount.

The durable aluminum body is weather sealed for enhanced dust and water protection to enable photographers to continue shooting even under adverse conditions.

The new ROKINON AF 85mm F1.4 Full Frame Lens for Sony E mount includes a reversible lens hood, lens caps, and a soft pouch case. Available in April from authorized ROKINON dealers, it can be pre-ordered from Adorama Camera at: https://www.adorama.com/rk8514afe.html.
