\(1\) Overall system performance is based on several PC attributes. GHz, processor clock speed, is one of the attributes. Intel Turbo Boost Technology performance varies depending on hardware, software and overall system configuration.

\(2\) Shared system memory may be allocated to support integrated graphics, depending on system memory size and other factors. Actual system memory available to the operating system will be reduced by the amount of dedicated and shared system memory utilized by the graphics solution and resources required by the operating environment.

\(3\) 1 GB is 1 billion bytes. Actual formatted capacity is less and may vary depending on preloaded materials and operating environment. Recovery Management utilizes up to 8 GB (10 GB with Microsoft® Office Starter 2010 Trial) of the stated hard disk capacity as dedicated backup space.

\(4\) Battery life varies depending on product specifications, computer settings, and applications or features launched. All batteries’ maximum capacity diminishes with time and use.

\(5\) For a free copy of the standard limited warranty end users should see a reseller where Acer products are sold, or write to Acer America Corporation, Warranty Department, P.O. Box 6137, Temple, TX 76503. TFT displays commonly exhibit a small number of discolored dots, so-called “nonconforming pixels.” This phenomenon is a limitation of TFT LCD technology, not a product defect and, as such, is not covered by the limited warranty or by the upgrade program. For international travelers warranty valid only in countries where Acer has an authorized repair facility. For a list of these countries, go to the global service locations at: http://globalaca.com/support/loc.htm or call 800 860-2227. Services and response times may vary in countries outside the U.S. and Canada.
