Subject: *NEW XPRO Monopods*

Introducing the new XPRO Monopods

Manfrotto introduces the new XPRO Monopod range that is a redesign of its high-end monopod offerings for advanced hobbyists and professional photographers. The new XPRO Monopods will be replacing the old 679B, 680B, 681B, 682B, 694CX and 695CX. This update brings the 055/190 performance and style on a one leg support.

PRODUCT LAUNCH

Key Benefits:

- ✓ **SOLID AND FAST SET-UP**
Higher locking power that doesn't compromise ergonomics: the QPL single-handed opening mechanism enables quicker, more comfortable set-up.
- ✓ **D- SHAPED FORTIFIED ALUMINUM TUBE**
The new D-shaped tubes used in the aluminum version ensure great stability hindering undesired rotation movements inside the locking mechanism
- ✓ **NEW RUBBER LEGWARMER**
The new rubber legwarmer, with the Manfrotto logo on it, provides an exceptional grip while giving an outstanding style to all the product range.
- ✓ **SCREWED FEETS**
The feet of the new XPRO Monopods are screwed within the last tube. This solution allows the feet to be strongly fixed with the monopod avoiding any risk of losing it during the shooting
- ✓ **NEW SIZES**
The sizes of XPRO Monopods have been reviewed both on height performance and compactness and portability. The new monopods are +10% higher than the past range while the new 5 section versions have been particularly design for traveler photographers.
