

XWC-PC1 *Privacy Cover for Select Xcellon Webcams*

1. Peel off the protective backing strip from the mounting tape.
2. Align the Privacy Cover with the top of the webcam so the cover hangs over and is flush with the front of the webcam.
3. Press down for at least three seconds, allowing the mounting tape to adhere to the webcam.

When you're ready to use your webcam, flip the cover up and out of the way.

The cover allows you to view your webcam's LED status light so you can see when your video camera is active.

One-Year Limited Warranty
