

Ruggard[®]

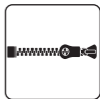

UV-C SANITIZING BACKPACKS AND CASES

Instructions

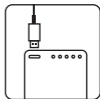

1. Open the backpack or case, and insert the items you want to sterilize into the sterilization compartment.

2. Close the compartment, and make sure it remains closed whenever sterilization is in progress.

3. Connect the attached USB cable to a power bank or an AC outlet with a USB power adapter (not included).

4. Press the power button to turn on the UV lights. Then repeatedly press the time control button to select the length of the sterilization cycle (5, 15, or 30 minutes). Depending on the number of items in the sterilization compartment, select the UV light intensity (25%, 50%, 75%, or 100%).

5. The power indicator will turn off when the sterilization cycle is complete.

6. Once the power indicator is off, it's safe to remove the sterilized items.

Warnings

- Use this product only in temperatures between 41°F and 104°F (5°C and 40°C).
- This product is designed only for personal use. Do not use this case or backpack to sterilize heavy items for industrial purposes.
- Do not open the sterilization compartment when the sterilization cycle is in progress.
- UV-C light can be harmful to your eyes and skin. If the compartment is accidentally opened during the sterilization cycle, do not stare at the lights, and do not put your hands into the lit sterilization compartment. Immediately disconnect the power cable from its source.
- Keep this product out of reach of children. Do not let children operate this unit without adult supervision.
- Do not immerse this product in or expose it to water.
- Do not attempt to disassemble or repair this unit—doing so will void the warranty, and Ruggard will not be responsible for any damage.
