

Hello.

Quick Start Guide

Welcome to your new iMac. We'd like to show you around.

Let's get started

When you start your iMac for the first time, Setup Assistant helps you get going. Just follow a few simple steps to quickly connect to your Wi-Fi network, transfer your stuff from another Mac or a PC, and create a user account for your iMac.

You can also log in with your Apple ID, which allows you to shop the App Store, iTunes Store, and Apple Online Store, and keep in touch using Messages and FaceTime. And your Apple ID lets you access iCloud, which is automatically set up in apps like Mail, Contacts, and Calendar. If you don't have an Apple ID, creating one in Setup Assistant is easy and free.

Let's get moving

It's easy to move files like documents, email, photos, music, and movies to your new iMac from another Mac or a PC. The first time you start your new iMac, it walks you through the process step by step. All you have to do is follow the onscreen instructions.

Using your Magic Mouse

Your Apple Magic Mouse comes with two AA batteries and is already paired with your iMac using Bluetooth®, so as soon as you turn on the mouse you'll be ready to go. To adjust the tracking, clicking, and scrolling speed or to add secondary button support, choose System Preferences from the Apple menu, then click Mouse. Here are some tips on getting the most out of your Magic Mouse.

Turn on mouse
Slide the power button on the bottom of the mouse.

Two-button click
Enable Secondary Click in System Preferences to use right and left click.

Screen zoom
Hold down the Control key and scroll with one finger to enlarge items on your screen.

Click
Click or double-click anywhere on the surface.

360° scroll
Brush one finger along the surface to scroll or pan in any direction.

Two-finger swipe
Swipe left and right to move through Safari pages or browse photos in iPhoto.

Using your Apple Wireless Keyboard

Your Apple Wireless Keyboard comes with two AA batteries and is already paired with your iMac using Bluetooth®, so they can communicate with each other as soon as you turn on the keyboard. To customize your keyboard or assign keyboard shortcuts, choose System Preferences from the Apple menu, then click Keyboard. Here are some basics that make interacting with your iMac easy.

Brightness keys
Increase or decrease the brightness of the screen.

Media keys
Rewind, play or pause, or fast-forward a song, movie, or slideshow.

Indicator light
Glow when turned on, then blinks until it connects to iMac.

To customize your keyboard or assign keyboard shortcuts, choose System Preferences from the Apple menu, then click Keyboard. Here are some basics that make interacting with your iMac easy.

Launchpad

Launchpad is the home for all the apps on your Mac. Just click the Launchpad icon in the Dock, and your open windows are replaced by a full-screen display of all your apps. Arrange apps any way you want,

group them together in folders, or delete them from your Mac. When you download an app from the Mac App Store, it automatically appears in Launchpad.

Mission Control

Mission Control gives you a bird's-eye view of everything running on your Mac. Click the Mission Control icon in the Dock, and your Desktop zooms out to display all the open windows in every application, all your full-

screen apps, and Dashboard, the home of mini-apps called widgets. Click anything to zoom in on it. Think of Mission Control as the hub of your system—view everything and go anywhere with just a click.

Safari web browser

Click the Safari icon in the Dock and surf the web quickly and easily with Multi-Touch gestures. Scroll up or down with one finger on Magic Mouse. Swipe right and left with

two fingers to go back and forth between pages. Hold down the Control key and scroll with one finger to zoom in and out.

Mail

Mail lets you manage all your email accounts from a single, ad-free inbox, even when you're not connected to the Internet. It works with most email standards—including POP3 and IMAP—and

popular email services like Gmail, Yahoo! Mail, and AOL Mail. You can also use Mail with the free me.com email account you get with iCloud. The first time you open Mail, Setup Assistant will help you get started.

iTunes

With iTunes, you can organize and play your digital music and videos on your Mac. And you can shop in the iTunes Store for new music,

movies, TV shows, books, and more. iTunes is also where you'll find the App Store for iPad, iPhone, and iPod touch.

Calendar

Keep track of your busy schedule with Calendar. You can create separate calendars—one for home, another for school, a third for work. See all your calendars in a single window or choose to see only the calendars you want. Create and

send invitations using contact info from the Contacts app, then see who has responded. Use iCloud to update calendars on all your devices automatically or share calendars with other iCloud users.

Messages

Just log in with your Apple ID, and you can send unlimited messages including text, photos, videos, and more to your friends on a Mac, iPad, iPhone, or iPod touch. With iCloud, you can start a conversation on one

device and pick it up on another. And if you want to talk to someone face to face, you can start a video call* just by clicking the FaceTime icon in the top-right corner of the Messages window.

iPhoto

iPhoto is the best way to organize, browse, edit, and share your photos on your Mac. You can organize your photo library by Faces, Places, and Events. To send photos by email or publish them to Facebook, just

select the photo and click Share in the bottom right of your screen. Or click Create to turn your favorite shots into photo books, calendars, and cards.

iMovie

iMovie puts all your video clips in one place and gives you the editing tools and special effects you need to quickly turn them into something memorable. You can make great-looking movies or even Hollywood-style movie

trailers with just a few clicks. And iMovie lets you import video from most popular digital video cameras, your iPhone, iPad, or iPod touch, or the FaceTime HD camera on your Mac.

Mac App Store

The Mac App Store is the best way to find and download thousands of apps for your Mac, from games and social networking to productivity apps and more. New apps install in one step to Launchpad. You can install apps on every Mac authorized

for your personal use and even download them again. The Mac App Store lets you know when app and OS X updates are available, so you always have the latest versions. Open the Mac App Store by clicking its icon in the Dock.

*Requires FaceTime-enabled device for both caller and recipient. Not available in all areas.
