# PRODUCT INFORMATION

Learn all you need to know about the Avenger Triple C Stand Roller Case

Avenger, the world's leading manufacturer of lighting supports and grip equipment designed to meet the needs of the cinema, broadcast, entertainment, video and photographic markets is pleased to announce the launch of the Triple C Roller Case for Detachable C Stands and accessories.

This ultra-tough, hardwearing case is designed and built for the professional imagemaker working on location. It allows them to transport all their essential C Stand accessories in one convenient carrying solution, ensuring everything is easily accessible and close to hand when arriving at a shoot.

With its external dimensions of 19cm x 35cm x 120cm (13.8in x 7.5in x 47.2in) this roller case has plenty of storage capacity and can carry up to a maximum load of 35kg (77.1lbs).

Tailored for carrying up to three turtle base (detachable) C stand kits and accessories, the spacious main compartment features high-density closed cell and cross link foam dividers to create three sections tailored for detachable C Stand columns and a fourth section with adjustable reinforced straps to securely stow extension arms. There is space for even more kit in the two removable padded storage trays, ideal for grip heads, clamps and other small accessories, keeping equipment safe and secure to prevent movement and unwanted noise in transit.

Up to three C stand turtle bases can be neatly stored by securely fastening them to the inner lid dividers using the adjustable quick release webbing straps, keeping them separate from the rest of the gear and making it easy to access the right components quickly.

The large internal zip pocket is ideal for foldable light controls such as flags and scrims, this pocket can be split into two using the Velcro fastening and features a viewing window making it easy to find even the smallest accessory often hard to find in a solid pocket.

The shell of this rugged case is constructed from hard ABS honeycomb and durable water-resistant 900D Polyester, with high quality YKK® RC zippers with moulded grip pull cords throughout. It also features strong anti-abrasion protective reinforcement in key high wear areas, as well as durable rubber feet, bumpers and back rails to further protect the case when navigating uneven terrain and obstacles.

The strong exterior padded handles on the top and side panels and replaceable shock-absorbing wheels allow for both single and two-person handling for ease of maneuverability on location.

The strong exterior padded handles on the top and side panels and replaceable shock-absorbing wheels allow for both single and two-person handling for ease of maneuverability on location.

Other external features include two large zip pockets which help to keep essential tools and accessories easily available, in addition a convenient luggage tag holder is also incorporated into the design for clear identification and to make shipping this all in one grip base even easier.

All of these features combined with the black finish, Avenger blue detailing, bold branding and crafted design make this all in one carrying solution stylish as well as functional. This ergonomic case is sure to become many imagemakers 'go to' solution when they need to transport their grip equipment. Its storage capacity, durability and well thought out design mean everything is easily accessible allowing for super-fast set up time.

The perfect carrying solution allowing the creative imagemaker to arrive on set ready to roll!
