

DMS-202 / MAINMAST DUAL DISPLAY DESKTOP MONITOR STAND

for 17 to 27 in. Screens

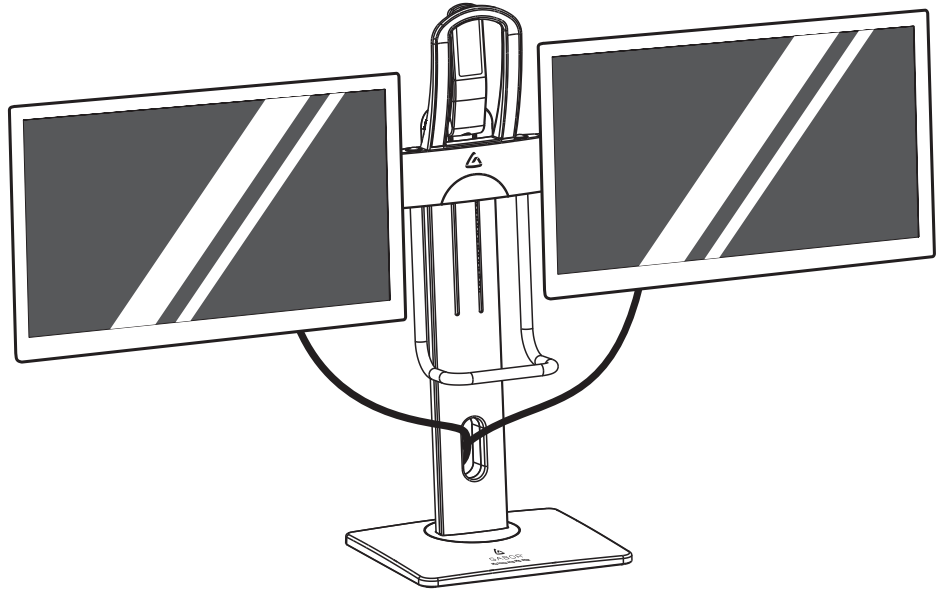

User Manual

Thank you for choosing Gabor.

Gabor's sturdy Mainmast Dual Display Desktop Monitor Stand is a space and clutter saver for desks and workstations at home and in the office.

This free-standing desk accessory can hold two monitors, each weighing up to 13.2 pounds, and allow you to adjust the height, swivel, and tilt for the perfect viewing angle. Standard VESA 75 × 75 and 100 × 100 patterns are compatible with most 17- to 27-inch monitors and the VESA plates rotate for both landscape and portrait orientation.

Safety Warnings

- Please read and follow the instructions, and keep this manual in a safe place.
- To avoid damage to this product, be careful not to overtighten or improperly thread any of the threaded fittings.
- Clean this product with only a soft, dry cloth.
- Mounting surfaces should be sturdy and flat. Do not install this product on a weak, uneven surface.
- Do not install this product on an unsteady structure or one that is prone to vibration, has a chance of being impacted, or is susceptible to other movements. Reinforce the structure as necessary before installing this product.
- Make sure everything is secure before proceeding to the next step.
- Do not exceed the maximum load capacity.
- Make sure that this product is intact and that there are no missing parts.
- If this product is missing hardware or there are defective parts, visit www.madebygabor.com or call Customer Service at 212-594-2353.
- If you have safety concerns about installing this product, contact a qualified professional or installation contractor.

Product Specifications

Monitor display size

17 to 27 in. (43.2 to 68.6 cm)

Maximum weight per monitor

13.2 lb. (6 kg)

VESA standards

75 × 75 mm

100 × 100 mm

Monitor rotation

±180°

Monitor tilt

±45°

Column rotation

±40°

Column height adjustment

9.6 to 15.7 in. (24.5 to 40 cm)

Monitor height adjustment range

6.1 in. (15.5 cm)

Weight (without monitors)

9.9 lb. (4.5 kg)

Package weight

11.6 lb. (5.2 kg)

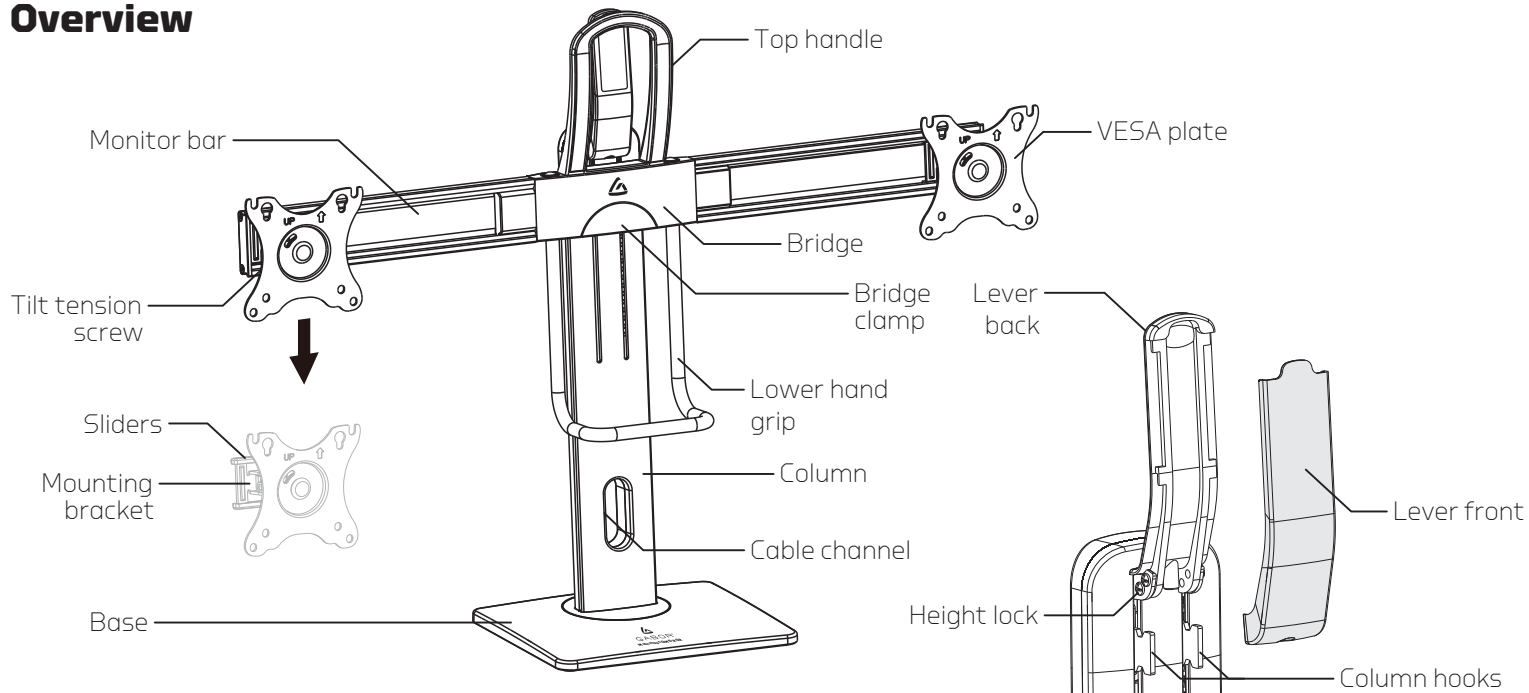

Package dimensions (W × L × H)

17.1 × 10.8 × 4.4 in.

(43.5 × 27.5 × 11.2 cm)

--	---	---

Assembling the Base

Fit the column (A) into the base (B).

Screw the hex bolts (L) into the holes in the bottom of the base using the 6 mm hex key (T).

Attaching the Lever

1. Attach the lever back (E) to the height lock with the four screws (M). Use the screwdriver end of the 5 mm hex key (S) to tighten the screws until secure.

2. Slide the lever front (F) up onto the lever back (E) so it locks in place.

3. Secure the lever front to the lever back with the M4x8 screw (N). Tighten it with the Phillips end of the 5 mm hex key (S).

Inserting the VESA Mounts into the Monitor Bar

1. Place two sliders (D) onto each mounting bracket (C) as pictured.

2. Slide the mounting brackets into the monitor bars.

Note: Make sure the VESA plates are correctly oriented as pictured.

Assembling the Monitor Bar

1. Slide the left and right sides of the monitor bar (G) onto the bridge (H).
2. Make sure the bridge's arch is facing down.
3. Use the M6x12 hex screws (O) to connect the two sides of the monitor bar with the bridge. Tighten with the 4 mm hex key (R) until secure.
4. Hang the monitor bar with the bridge assembly on the column hooks.
5. Slide the bridge clamp (I) into place under the bridge, attach it with hex bolt (Q) using the 5 mm hex key (S) until secure.

Attaching the Handles

1. Slide the top handle (J) under the base of the lever to align the holes.

Note: The handle should curve toward the back of the stand.

2. Secure the handle to the bridge with the M6×15 screws using the 5 mm hex key (S).
3. Insert the lower hand grip (K) up through the two holes on the bottom of the bridge.

4. Use the 4 mm hex key (R) to tighten the monitor arm set screws until secure.

Mounting the Monitor

Before you attach the VESA plate, hand thread one of the M-A or M-B screws to determine which one fits your monitor. Make sure the screw is also not too long or too short. If the screw is too long, it may damage the display. If it's too short, it may not hold it.

100 × 100 VESA Pattern

1. Slide M-C washers onto two screws, and thread the screws into your monitor's top two VESA holes. Leave about 3 mm between the washers and the monitor.
2. Hang the monitor on the VESA plate's two top notches with the two installed mounting screws.

Important! The washer should be between the screwhead and the VESA plate.

3. Slide M-C washers onto two screws, and thread the screws into the bottom two VESA holes.
4. Use the 5 mm hex key (K) to tighten all four screws until snug. Do not overtighten.

75 × 75 VESA Pattern

1. Thread two screws into your monitor's top two VESA holes. Leave about 3 mm between the screws and the monitor.
2. Hang the monitor on the VESA plate's two keyholes with the two installed mounting screws.

Important! Do not use washers for the top screws on the 75×75 VESA pattern.

Cable Organization

After the monitors are installed, keep your cables neat and organized by running them through the cable channel in the center column.

Adjusting the Monitor Height

Important! When adjusting monitor height, hold the handle and hand grip simultaneously. This will prevent the monitors from accidentally rising too quickly or tipping over.

1. With the monitors attached, hold the lower hand grip and press the lever towards the top handle.
2. Adjust the monitors to the desired height, and release the lever.

Monitor Tilt, Rotation, and Swivel

Swivel

For optimum monitor position, the column swivels 40° to the left and right. Use the top and bottom handles to position the monitors at the preferred viewing angle.

Rotation

To change the orientation of a monitor from landscape to portrait, turn the monitor while it's attached to the VESA plate.

Tilt

To adjust the viewing angles, tilt the monitors up or down by 45°. You may need to increase the tilt tension for larger and heavier monitors. Tighten the tilt tension screws by turning them clockwise for larger and heavier monitors. For smaller and lighter monitors, decrease the tilt tension by turning the tilt tension screws counter-clockwise.

Three-Year Limited Warranty

This Gabor product is warranted to the original purchaser to be free from defects in materials and workmanship under normal consumer use for a period of three (3) years from the original purchase date or thirty (30) days after replacement, whichever occurs later. The warranty provider's responsibility with respect to this limited warranty shall be limited solely to repair or replacement, at the provider's discretion, of any product that fails during normal use of this product in its intended manner and in its intended environment. Inoperability of the product or part(s) shall be determined by the warranty provider. If the product has been discontinued, the warranty provider reserves the right to replace it with a model of equivalent quality and function.

This warranty does not cover damage or defect caused by misuse, neglect, accident, alteration, abuse, improper installation or maintenance. EXCEPT AS PROVIDED HEREIN, THE WARRANTY PROVIDER MAKES NEITHER ANY EXPRESS WARRANTIES NOR ANY IMPLIED WARRANTIES, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. This warranty provides you with specific legal rights, and you may also have additional rights that vary from state to state.

To obtain warranty coverage, contact the Gabor Customer Service Department to obtain a return merchandise authorization ("RMA") number, and return the defective product to Gabor along with the RMA number and proof of purchase. Shipment of the defective product is at the purchaser's own risk and expense.
