

1. Make sure the hood's threads are exposed by rotating the hood's locking ring in the direction of the arrow. Don't overtighten.

2. Screw the lens hood onto the lens approximately two full turns until you meet resistance. Turn the hood back so the TOP label faces up.

3. Turn the locking ring in the direction of the arrow to secure the lens hood. Don't overtighten (see illustration).

Important: The Sensei Screw-On Tulip Lens Hoods are universal and proper installation will prevent vignetting in most cases.
