

NANUK 975

4 POSSIBLE CONFIGURATIONS

Introducing the **NANUK 975 series** - the most configurable waterproof protective case available from the brand that everyone's talking about. As an industry-first, we designed the 975 series with modular features, so there's a version for almost any user's preference. The full-featured base model 975 includes our rigid, two-stage retractable handle and four (4) strong polyurethane wheels with stainless steel ball bearings. On the other end of the spectrum, our 975M is lightweight and features ultra-strong team-carry handles. Want even more choices? Try the 975W and 975T. Both are infinitely configurable, with available accessories for immediate or future needs. We call that long-term value in a protective case! For added convenience, the 975, 975W, and 975T are in stock and ready to ship. Optional polycarbonate ID Window can be added to the side or front of the case.

975
