# READ CAREFULLY BEFORE USING!

## CANON SOFTWARE LICENSE AGREEMENT

IMPORTANT - READ THIS AGREEMENT BEFORE USING THE SOFTWARE ON THE CD-ROM IN THIS BOX. BY USING THE SOFTWARE, YOU AGREE TO BE BOUND BY THE TERMS OF THIS AGREEMENT.

This is a license agreement (the [Agreement]) between you and Canon Inc. ([Canon]).

IF YOU DO NOT AGREE TO THE TERMS AND CONDITIONS OF THIS AGREEMENT, DO NOT USE THE SOFTWARE PROGRAM ON THE CD-ROM AND THE USER MANUAL IN THIS BOX (COLLECTIVELY, THE [SOFTWARE]) AND RETURN THE SOFTWARE WITHIN 30 DAYS FROM THE DATE OF PURCHASE TO YOUR POINT OF PURCHASE FOR A REFUND.

In consideration of the right to use the SOFTWARE, you agree to abide by the terms and conditions of this Agreement.

1. **LICENSE:** Canon grants you the non-exclusive right to use the SOFTWARE only on a single computer. You may physically transfer the SOFTWARE from one computer to another provided that the SOFTWARE is used on only one computer at a time. You shall not install or use the SOFTWARE on a network, multiple CPU, multiple site arrangement, or any other hardware configuration where the SOFTWARE is accessible to more than one CPU or to more than one user.

YOU SHALL NOT ASSIGN, SUBLICENSE, RENT, LEASE, LOAN, CONVEY OR OTHERWISE USE, TRANSFER, COPY, TRANSLATE, CONVERT TO ANOTHER PROGRAMMING LANGUAGE, ALTER, MODIFY, DECOMPILE OR DISASSEMBLE THE SOFTWARE, IN WHOLE OR IN PART, EXCEPT AS EXPRESSLY PROVIDED IN THIS AGREEMENT.

2. **BACK-UP COPY:** You may make one copy of the SOFTWARE solely for back-up purposes, or copy the SOFTWARE onto the permanent storage device (e.g. a hard disk) of your computer and retain the original for back-up purposes. Any other copying of the SOFTWARE is a violation of this Agreement. You must reproduce and include the copyright notice on the back-up copy.

3. **SUPPORT AND UPDATES:** Canon is not responsible for providing maintenance or support for use of the SOFTWARE. No updates, fixes or support will be made available for the SOFTWARE.

4. **LIMITED WARRANTY AND LIMITATION OF LIABILITY:** It is your responsibility to choose, maintain and match the hardware and software components of your computer system. Thus Canon does not guarantee uninterrupted service or correction of errors or that the functions or performance of the SOFTWARE will meet your requirements. THE SOFTWARE IS LICENSED ON AN [AS IS] BASIS AND WITHOUT WARRANTY OF ANY KIND. The CD-ROM storing the SOFTWARE is warranted only against defective material under normal use for a period of ninety (90) days after purchase from an authorized Canon dealer as evidenced by your sales receipt. Your sole remedy for a defective CD-ROM shall be replacement of the same without charge when returned by you at your expense to your point of purchase and proven to be defective upon inspection. The replacement CD-ROM will be warranted for the remainder of the original ninety (90) day warranty period of the defective CD-ROM. The limited warranty does not apply if the failure of the CD-ROM resulted from accident, abuse or misapplication of the SOFTWARE and shall not extend to anyone other than the original user of the SOFTWARE.

EXCEPT AS SPECIFICALLY SET FORTH IN THIS PARAGRAPH 4, CANON, CANON'S SUBSIDIARIES, DISTRIBUTORS AND DEALERS DISCLAIM ALL WARRANTIES, EXPRESS OR IMPLIED, INCLUDING ANY WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, WITH RESPECT TO THE SOFTWARE.

NEITHER CANON NOR ANY OF CANON'S SUBSIDIARIES, DISTRIBUTORS OR DEALERS IS LIABLE FOR ANY DAMAGES HOWSOEVER CAUSED, INCLUDING WITHOUT LIMITATION, DIRECT, CONSEQUENTIAL OR INCIDENTAL LOSS OR DAMAGE INCLUDING LOSS OF PROFITS, EXPENSE OR INCONVENIENCE HOWSOEVER CAUSED OR ARISING OUT OF THE SOFTWARE OR THE USE THEREOF.

NEITHER CANON, NOR ANY OF CANON'S SUBSIDIARIES, DISTRIBUTORS OR DEALERS SHALL HAVE ANY OBLIGATION TO INDEMNIFY YOU AGAINST ANY CLAIM OR SUIT BROUGHT BY A THIRD PARTY ALLEGING THAT THE SOFTWARE OR THE USE THEREOF INFRINGES ANY INTELLECTUAL PROPERTY OF SUCH THIRD PARTY.

5. **TERM:** This Agreement is effective upon your using the SOFTWARE and remains in effect until expiration of all copyright interests in the SOFTWARE unless earlier terminated. You may terminate this Agreement by destroying the SOFTWARE. This Agreement will also terminate without notice to you if you fail to comply with any of the terms of this Agreement and you must then promptly return the SOFTWARE. In addition, Canon may enforce its other legal rights.

6. **U.S. GOVERNMENT RESTRICTED RIGHTS NOTICE:** The SOFTWARE is provided with restricted rights. Use, duplication or disclosure is subject to restrictions as set forth in either subparagraph (c) (1) (ii) of the Rights in Technical Data and Computer software clause at DFARs 252.227-7013 or subparagraph (c) (1) and (2) of the Commercial Computer Software Restricted Rights Clause at FAR 52.227-19, as applicable.

7. **SEVERABILITY:** In the event that any provision of this Agreement is declared or found to be illegal by any court or tribunal of competent jurisdiction, such provision shall be null and void with respect to the jurisdiction of that court or tribunal and all the remaining provisions of this Agreement shall remain in full force and effect.

8. **CONTROLLING LAW:** The terms of this Agreement as it relates to purchases of the Software in the United States of America shall be governed and construed in all respects in accordance with the laws and regulations of the State of New York, without reference to choice of law principles. The terms of this Agreement as it relates to purchases of the Software in Canada shall be governed by the laws of the province of Ontario.

9. **OWNERSHIP:** All rights, including but not limited to copyrights and trade secret rights, to the SOFTWARE belong to Canon, its affiliated corporations and third party licensors. Your use of the SOFTWARE is subject to the United States, Canada and other applicable copyright and trademark laws and nothing in this Agreement constitutes a waiver of the rights of Canon, its affiliated corporations and third party licensors under such laws.

Nothing contained in Paragraph 1 shall be construed to give Canon any ownership rights in any images, graphics or textual material that you save in connection with the Software.

10. **ACKNOWLEDGEMENT:** BY USING THE SOFTWARE, YOU ACKNOWLEDGE THAT YOU HAVE READ THIS AGREEMENT, UNDERSTOOD IT, AND AGREE TO BE BOUND BY ITS TERMS AND CONDITIONS. YOU ALSO AGREE THAT THIS AGREEMENT IS THE COMPLETE AND EXCLUSIVE STATEMENT OF AGREEMENT BETWEEN YOU AND CANON CONCERNING THE SUBJECT MATTER HEREOF AND SUPERSEDES ALL PROPOSALS OR PRIOR AGREEMENTS, VERBAL OR WRITTEN, AND ANY OTHER COMMUNICATIONS BETWEEN THE PARTIES RELATING TO THE SUBJECT MATTER HEREOF. NO AMENDMENT TO THIS AGREEMENT SHALL BE EFFECTIVE UNLESS SIGNED BY A DULY AUTHORIZED OFFICER OF CANON.

# Starting up ZB

Double-click the desktop icon.

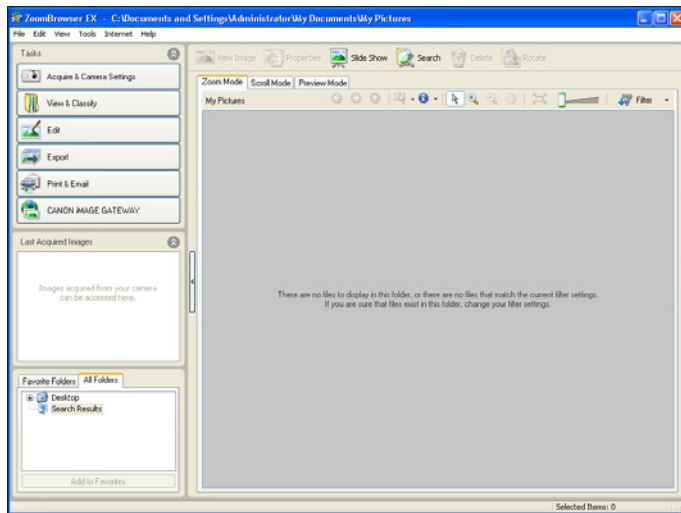

Double-click

→ ZB starts up and the main window appears.

## Main window

 The [CANON iMAGE GATEWAY] button may not be displayed depending on the area you are in.

# Downloading an Image to Your Computer

Connect the camera and computer with the cable provided and download the images saved on the memory card inserted in the camera. For downloading images, start up the camera software “EOS Utility” from ZB and use.

## 1 Select the save destination for the images.

Click to display the [All Folders] tab sheet

Click

● When creating a folder, refer to [p.24](#).

## 4 Download images.

- Downloading of images begins.
- The downloaded images are saved in the folder selected in step 1 and are displayed in the main window of ZB.
- The downloaded images are sorted into folders by date and saved.
- Click the EOS Utility [Quit] button to exit EOS Utility and turn the camera's power switch to < OFF >.

### Advantages of using EOS Utility to download images

Using EOS Utility to download images makes it easier to organize your images as they are downloaded, sorted and saved into folders by date.

## Downloading Images Using Your Card Reader

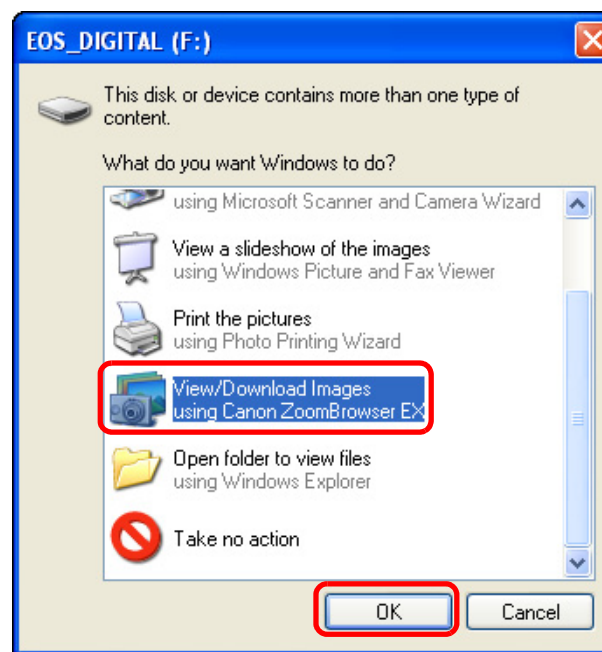

You can also download images to the computer using a third-party card reader.

1 Select the save destination for the images (p.7).

2 Load the memory card into the card reader.

- When the dialog box below appears, select [using Canon ZoomBrowser EX] and then click the [OK] button. ZB starts up.

→ Proceed to step 4.

#### Advantages of using ZB to download images

Using ZB to download images makes it easier to organize your images as they are downloaded, sorted and saved into folders by date.

# Viewing an Image

Images downloaded to your computer are displayed as a thumbnails list in the main window. You can double-click a thumbnail to open the viewer window and display the image at a larger size.

## View Images as Thumbnails in the Main Window

Display thumbnails of all the images inside the folder selected in the folder area on the left

- To select multiple images, click on the images while holding down the < Ctrl > key on the keyboard.

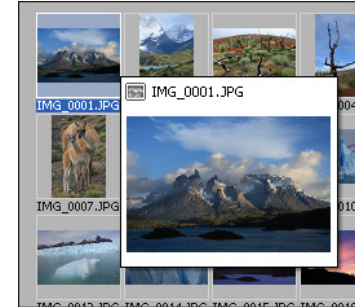

## Simple Display Function

Move the cursor over the image with the mouse and you can check images that are displayed in the simple display window (mouse over window).

To deactivate simple display, click on [  ] on the top of the window, select [Show Mouse Over Windows] from the menu and remove the check mark.

## Simple display window

## Printing an Image Using Easy-PhotoPrint EX

If you have an inkjet printer that is compatible with the Easy-PhotoPrint EX (hereinafter, "EPP EX") software for Canon printers, you can start up EPP EX from within ZB and easily perform high-quality photo printing. To perform this printing, it is necessary to first install EPP EX version 1.0 or later on your computer.

Also, Easy-PhotoPrint users can select [Easy-PhotoPrint] in step 2 and print following the same steps.

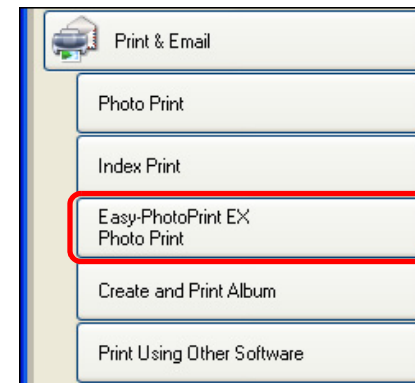

### 1 Select the image to be printed.

- To select multiple images, click on the images while holding down the < Ctrl > key on the keyboard.
- You can select all the images inside a folder by clicking on an empty part of the folder.

### 2 Start up EPP EX.

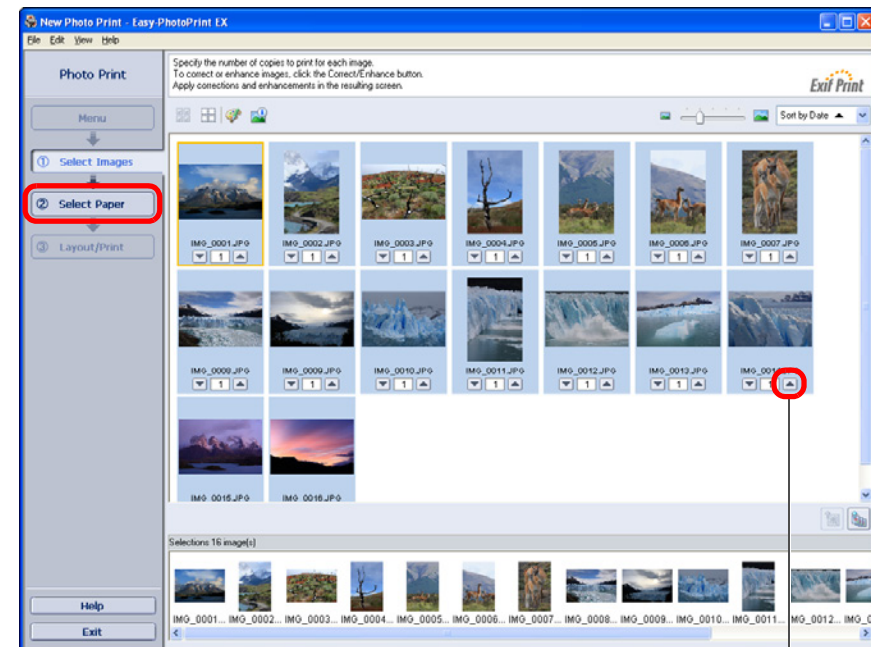

- Click the buttons [Print & Email] ► [Easy-PhotoPrint EX Photo Print].

→ EPP EX starts up.

### 3 Specify the number of copies to be printed and then click [Select Paper].

Easy-PhotoPrint EX

Click to increase the number of copies to be printed

# Checking/Sorting Images

You can enlarge images one at a time from a list in the main window and check what they look like in detail, and sort them into one of three groups with [★] (ratings).

## Enlarging and Checking Images One at a Time

1 Double-click on the image on the top left of the main window.

→ The viewer window appears.

2 Click [←] or [→] to switch to the image you want to display.

Viewer window

- The shooting information is displayed by clicking [📷] on the top of the window.
- To exit the viewer window, click [X] on the top right of the window.
- When checking RAW images, always click on the [Display Original Image] button and check the processed images.

💡 To display only selected images in the viewer window

Select multiple images in the main window (p.11) and then click on [📷 View Image] on the top left of the main window (p.68) to display only the selected images in the viewer window.

📖 For a list of viewer window functions, refer to p.71.

# Arranging Images in the Main Window

You can arrange images in order of how many [★] you have attached to it (ratings), or according to the image's shooting date and time.

Select the [View] menu ► [Sort by] ► desired item.

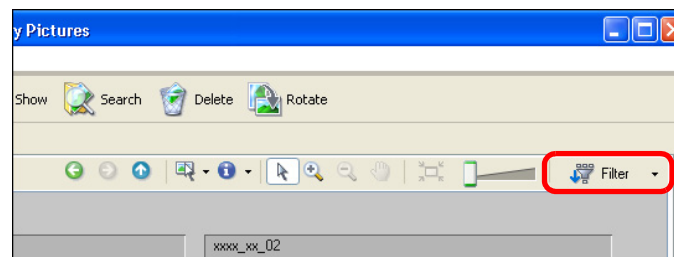

→ The images are arranged in the order according to the selected item.

Sort item	Description
Star Rating	Images are arranged in the order of the least number of [★].
Name	Image file names are arranged in the order of 0 – 9 → a – z.
Shooting Date	Images are arranged in the order of most recently shot.
Modification Date	Images are arranged in the order of most recently updated.
Type	Images are arranged in the order of BMP images → RAW images → JPEG images → TIFF images.
<b>Ascending</b>	Images are arranged from top to bottom in order of sorting criteria.
<b>Descending</b>	Images are arranged from bottom to top in order of sorting criteria.

## Extracting Images You Want to Display (Filter Display)

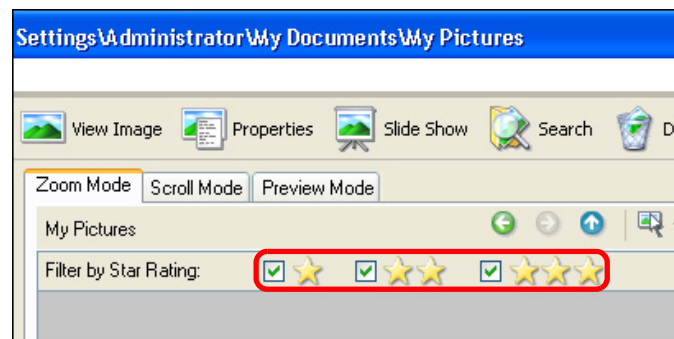

You can extract images displayed in the main window by the number of [★] you have attached to them (ratings).

1 Click the [  Filter ] button.

→ The extract function appears.

2 Checkmark the number of [★] you want to extract and display.

→ Only the images with the number of [★] you have checkmarked are displayed in the main window.

● To exit the extract display, click the [  Filter ] button again.

- 1 Select the image whose name you want to change in the main window, or select the folder whose name you want to change in the folder area.
- 2 Select the [File] menu ► [Rename].

→ The [Rename Image] or [Rename Folder] dialog box appears.

- 3 Enter the file name or folder name of the image and then click the [OK] button.  
→ The file name or folder name changes to the new name.

## Deleting Images

Please take care as deleted images cannot be recovered.

- 1 Select the unwanted image in the main window.
- 2 Click [Delete].

Click

- The [Confirm File Delete] dialog box appears.
- 3 Click the [Yes] button.  
→ The image is moved to the [Recycle Bin] and is deleted from ZB.
  - Right-click [Recycle Bin] on the desktop and select [Empty Recycle Bin] from the menu that appears to delete the image from your computer.

- You can also change the file names in the [Properties] window (p.46) or the image display area in Preview Mode (p.70).
- You can also change the folder names in the [Properties] window (p.46).

## Deleting Folders

Deleted folders cannot be recovered. Please take care as all images inside folders are also deleted.

**1** In the folder area, select the folder you want to delete.

**2** Select the [File] menu ► [Delete].

→ The [Confirm File Delete] window appears.

**3** Click the [Yes] button.

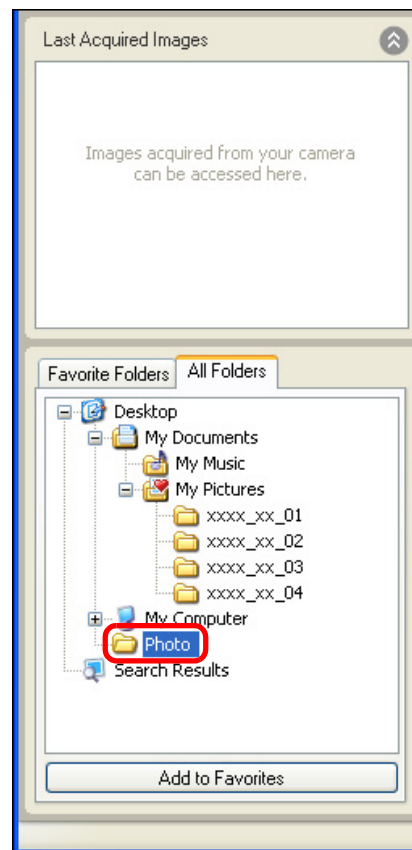

→ The folder is moved to the [Recycle Bin] and is deleted from ZB.

- Right-click [Recycle Bin] on the desktop and select [Empty Recycle Bin] from the menu that appears to delete the folder from your computer.

## Registering Frequently-Used Folders as Favorite Folders

You can register shortcuts for frequently-used folders in the [Favorite Folders] tab sheet in the folder area to make images easier to find. Please note that because the [My Pictures] folder is registered as a favorite folder by default, the folder icon appears as [📁❤️].

**1** Select the folder you want to register.

**2** Click the [Add to Favorites] button.

→ The folder icon changes to [📁❤️] and is registered as a favorite folder.

**3** Select the [Favorite Folders] tab sheet.

**4** Select the registered folder to display the images inside the folder.

→ The images inside the folder appear.

**?** If you have edited or deleted images in folders you have registered as favorites

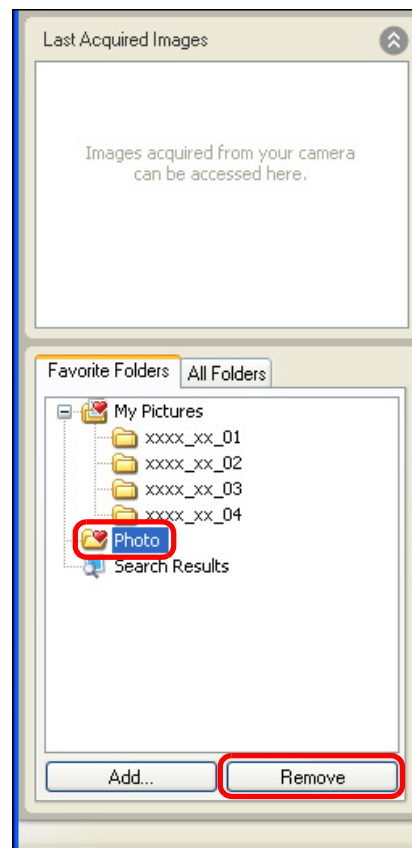

Any changes done to images inside registered folders will be applied to the original images. Therefore, please be aware that by editing or deleting images inside registered folders, you are in fact editing or deleting the original images.

## Deleting Favorite Folders

If you no longer need a folder you have registered in the [Favorite Folders] tab sheet, you can delete it from this tab sheet.

Please note that as registered folders are shortcuts, the original folder will not be deleted when you delete the shortcut.

**In the [Favorite Folders] tab sheet, select the folder you want to delete and then click the [Remove] button.**

→ The folder is deleted.

# Editing an Image

If the brightness or color of images is different from what you visualized when you shot the photo, you can adjust an image using the editing functions to bring them closer to what you visualized.

This section explains about automatic adjustment of images, adjustment of brightness, saturation and contrast, trimming images, inserting text into images, adjustment of sharpness and red-eye correction.

JPEG images deteriorate slightly when edited and saved, and the image before editing cannot be recovered. For this reason, an edited JPEG image should be saved as a separate image from the original image.

Chapter 3 explains about high-level editing functions other than those described above.

You can edit RAW images in Digital Photo Professional (hereinafter, "DPP"). Select the RAW image in the Main Window and click the buttons [Edit] ► [Digital Photo Professional Process RAW images], which will start up DPP. For detailed instructions on using DPP, refer to "Digital Photo Professional Instruction Manual" (PDF electronic manual).

## Automatic Adjustment Using ZB

The brightness and colors, etc. of the image are automatically adjusted.

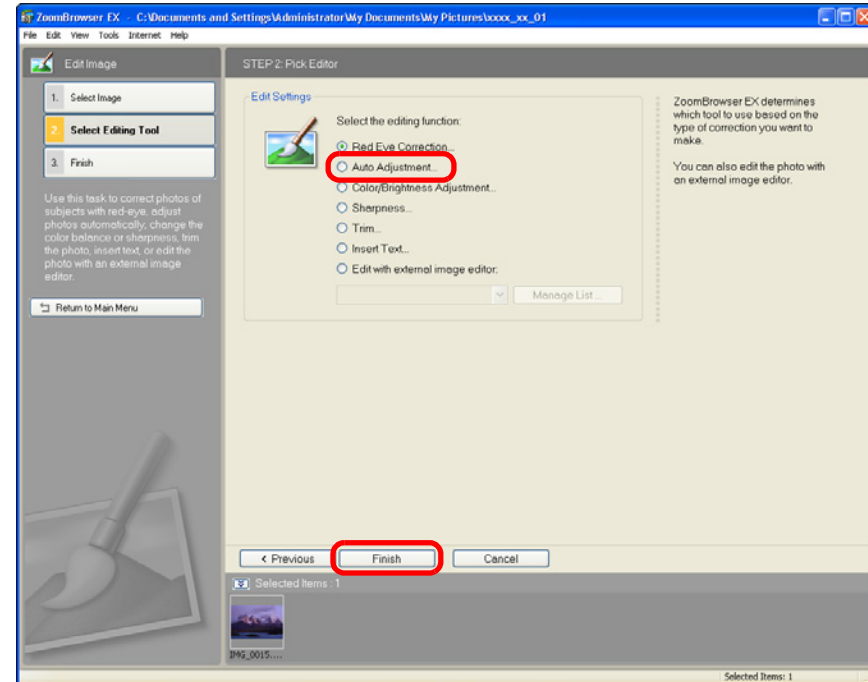

1 Select the image you want to edit.

2 Click the buttons [Edit] ► [Edit Image].

→ The [Edit Image] window appears.

3 Select the buttons [Auto Adjustment] ► [Finish].  
Edit Image window

→ The [Auto Adjustment] window appears.

### 3 Checkmark [Include images in the screen saver] and click the [Finish] button.

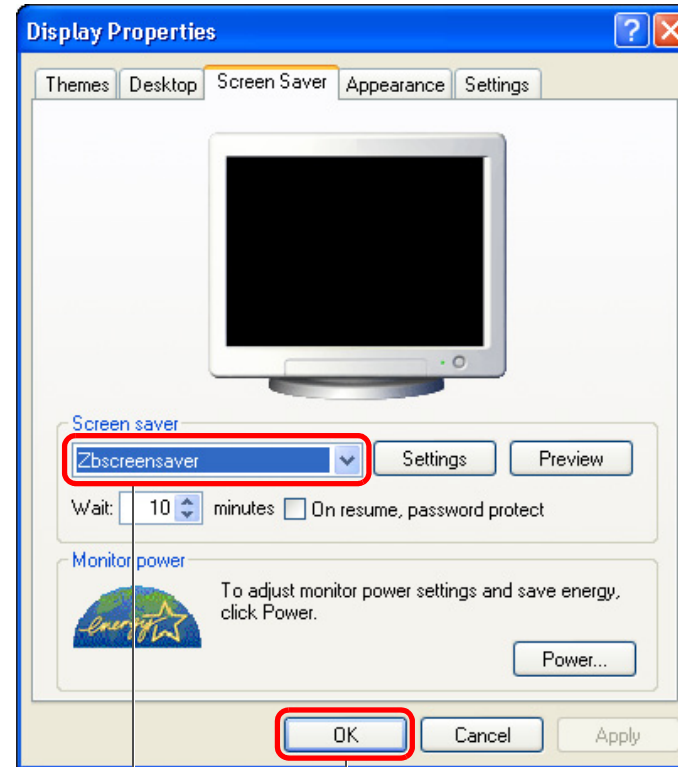

Export as a Screen Saver window

→ The data for the screen saver is saved in the specified folder.

### 4 Specify the saved screen saver on your computer.

- On the desktop, right-click with the mouse and in the menu that appears, select [Properties]. Display the [Screen Saver] tab sheet in the [Display Properties] dialog box.

Applies the selected screen saver data

Select the saved screen saver data

#### 💡 About the [Include images in the screen saver] checkbox

When you checkmark [Include images in the screen saver] in step 3, the original image is copied to create the data for the screen saver. This means that even if the original image is deleted or the file name is changed, it does not affect the screen saver. However, if you remove the check mark, the data is created using the original image, and if the original image is deleted or the file name is changed, the screen saver will not work properly.

# Comparing Multiple Images

To compare multiple images, you can split the viewer window into two, three or four and display multiple images at the same time. You can also align the display position of enlarged images and compare.

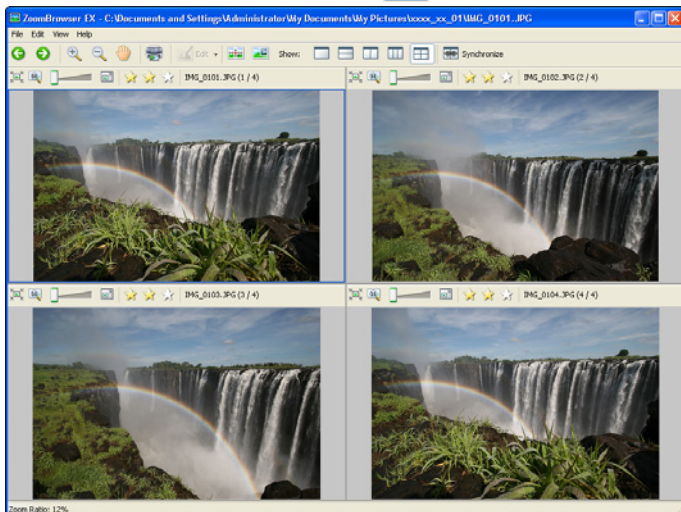

- 1 In the main window, select the images you want to compare (p.11).
- 2 Click [  View Image ] (p.68).  
→ The viewer window appears.
- 3 Select the number of images you want to display at the same time.

→ The viewer window is split and the multiple images are displayed at the same time.

Example of display when [  ] is clicked

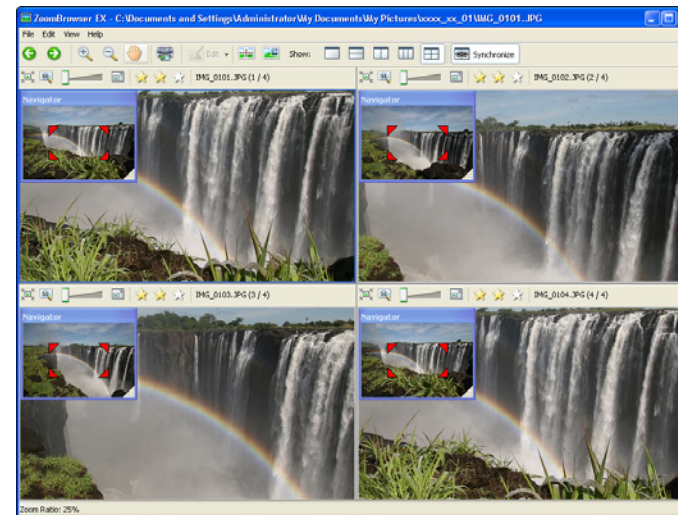

- 4 Click [Synchronize] and then enlarge the image.

Click

Drag right to change the display magnification

- The synchronize display appears and all the images are displayed at the same display magnification and in the same position.
- The [Navigator] window that displays the enlargement display position appears and you can check and move the enlargement display position (p.21).
- Click [Synchronize] again to cancel the synchronize display. You can now change the display magnification and move the enlargement display position for each image.
- To return to full view, click [  ] on the top left of each window.
- To cancel the split display, click [  ] at the top of the window.

# Listing Images by Folder Level

You can switch the main window display to Scroll Mode that displays in folder levels and simultaneously view multiple folders and images inside the folders. You can also set the level to which images and folders are displayed in the window, which makes looking for the folders and images you want easier.

## 1 Click the [Scroll Mode] tab sheet.

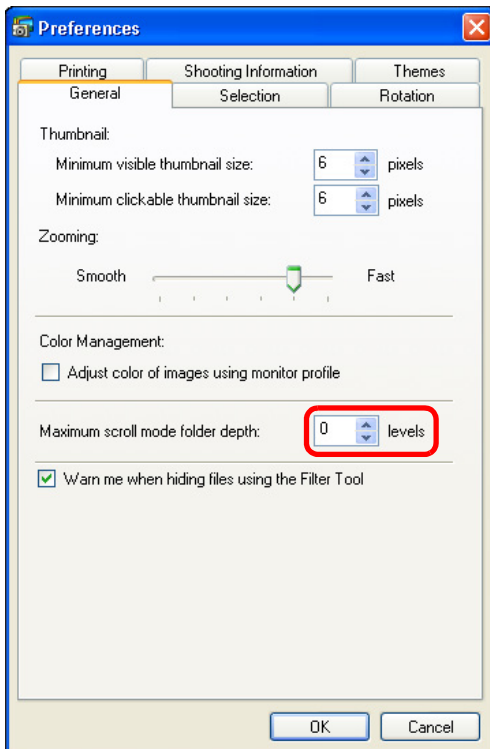

→ The display in the main window switches to Scroll Mode.

## 2 Select the [Tools] menu ► [Preferences].

→ The [Preferences] window appears.

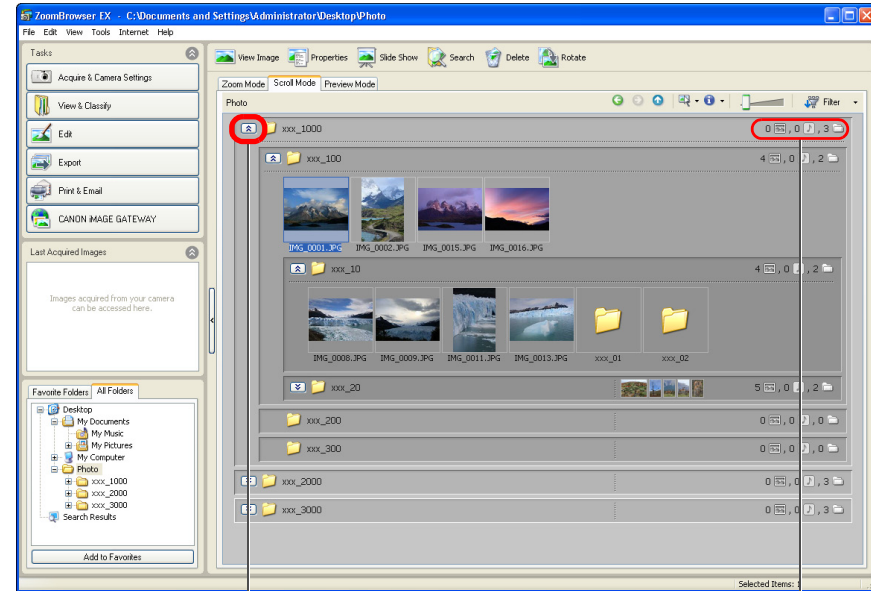

## 3 Change the depth of the folder level to be displayed.

## 4 Click the [OK] button.

→ The main window is displayed at the folder depth you set.

### Example of display when you have set the folder level setting [3]

Click

Number of images inside the folder and number of folders

- Folders up to the third level and images inside the folders are displayed in the window.
- Folders at or higher than the fourth level are displayed as folder icons. Double-click these folders to display images and folders inside the folders.

# Organizing Images Using High-Level Functions

You can organize images using high-level functions such as setting keywords and entering comments, renaming multiple files in a single operation and classifying images by shot year/month/date, all of which are useful when organizing your images.

## Setting Keywords in Images

You can set keywords to identify images. The set keywords are also useful when searching for images (p.52).

- 1 Display the [Properties] window (p.46).
- 2 Click the [  ] button in [Keywords] and then click the [View/Modify Keywords].  
→ The [View/Modify Keywords] dialog box appears.
- 3 Select the keyword(s) and then click the [OK] button.

→ The keyword is set in the image.

## Entering Comments into Images

You can enter information relating to images as comments. The entered comments are also useful when searching for images (p.52).

- 1 Display the [Properties] window (p.46).
- 2 Click the [  ] button in [Comment].  
→ A field for entering comments is displayed.
- 3 Enter text and then press the < Enter > key on the keyboard.

→ The entered text is saved in the image.

# Performing Advanced Editing

This section explains image editing using high-level functions based on the assumption that you are familiar with handling standard image editing software.

JPEG images deteriorate slightly when edited and saved, and the image before editing cannot be recovered. For this reason, an edited JPEG image should be saved as a separate image from the original image.

You can edit RAW images in Digital Photo Professional (hereinafter, "DPP"). Select the RAW image in the Main Window and click the buttons [Edit] ► [Digital Photo Professional Process RAW images], which will start up DPP. For detailed instructions on using DPP, refer to "Digital Photo Professional Instruction Manual" (PDF electronic manual).

## Adjusting the Color of an Image in RGB

You can adjust the color of an image in RGB (red, green, blue).

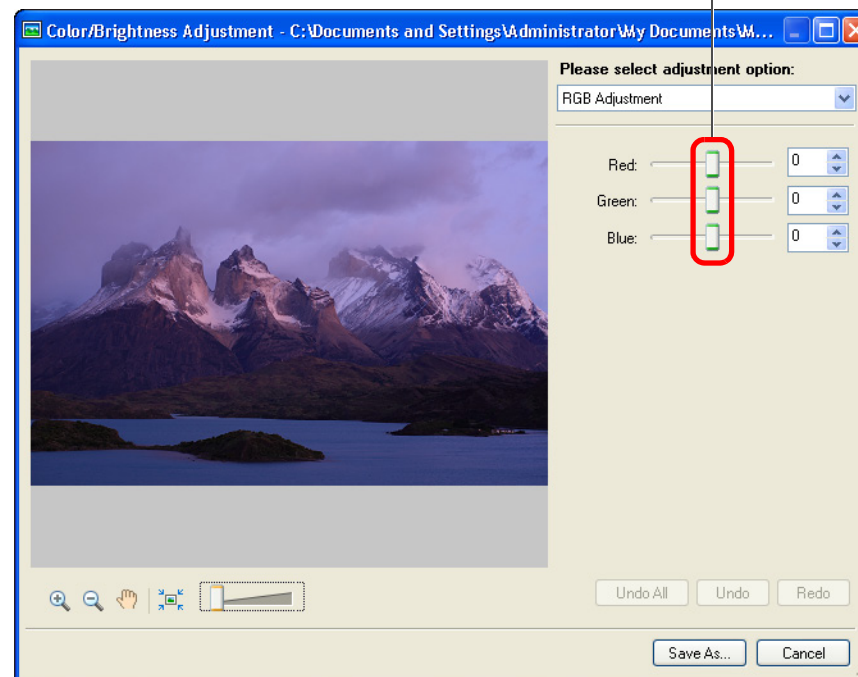

- 1 Select an image and display the [Edit Image] window (p.29).
- 2 Select [Color/Brightness Adjustment] and then click the [Finish] button.  
→ The [Color/Brightness Adjustment] window appears.
- 3 From the list box, select [RGB Adjustment].

→ The window switches to the [RGB Adjustment] window.

## 4 Adjust the image.

Drag to the left or right to adjust

→ The image is adjusted.

- 5 Click the [Save As] button and save as a separate image (p.30).

## 7 Specify the save destination and then click the [Save] button.

→ The merged images are saved.

## 8 Select the [File] menu ► [Exit].

→ PhotoStitch exits.

See also the Help that are displayed when you click [ ? ] on the right of the window for information on operating PhotoStitch and PhotoStitch functions.

# Adding Sound to Images/Playing Back

You can add sound to images and play back sound which you have added to images with a camera that has a sound record function.

## Adding Sound to Images

You can add WAVE sound files to images (extension “.WAV”).

- 1 Select an image to which you want to add sound.
- 2 Select the [Edit] menu ► [Add/Remove Sound].  
→ The [Sound] dialog box appears.
- 3 Click the [Add] button and select the sound file to be added to the image.
  - Select a WAVE sound file.
  - The display returns to the [Sound] dialog box.
- 4 Click the [OK] button to close the dialog box.  
→ The [ 🎵 ] icon is displayed on images to which sound has been added.

## Playing Back Sound

You can play back sound files that are attached to images.

- 1 Select an image to which a [ 🎵 ] icon is attached.
- 2 Select the [Edit] menu ► [Play Sound].  
→ The sound is played back.

# Printing Using Other Printing Software

You can start up printing software installed on your computer from within ZB and print images.

- 1 Select an image you want to print.**
- 2 Click the buttons [Print] ► [Print Using Other Software].**
  - The [Print Using Other Software] window appears.
- 3 Select the printing software and then click the [Launch] button.**
  - The printing software starts up and the image you selected in step 1 is displayed.
- 4 Make the necessary settings in the printing software and print.**

## ? Printing software does not appear

Printing software that is incompatible with ZB does not appear in the [Print Using Other Software] window and can therefore not be used to print.

# Preferences

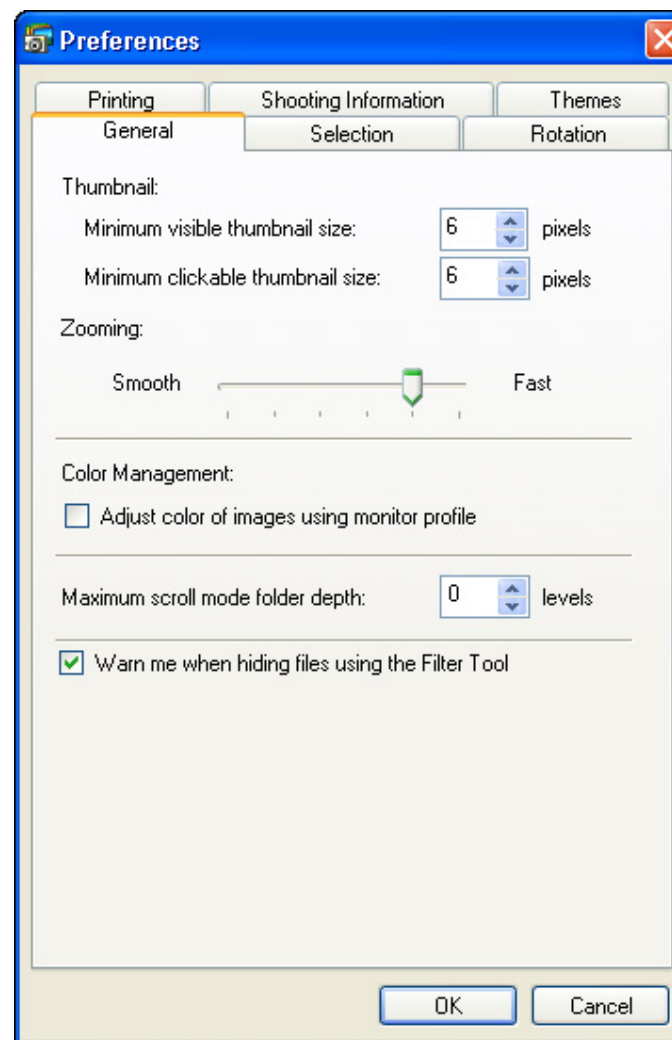

You can change any of the ZB functions in the preferences window. Check the settings displayed for each window before making changes.

- 1 Select the [Tools] menu ► [Preferences].
- 2 Select the tab sheet to be set, make changes to the settings and then click the [OK] button.

## General Settings

You can make settings such as adjusting the minimum size of thumbnail images that are displayed in the main window, the speed of Zoom Mode (p.68), the levels of image and folder display in Scroll Mode (p.69) and color management.

## Themes Settings

You can set the background color for the main window.

## Showing/Hiding Task Buttons

You can show or hide task buttons displayed on the left of the main window according to your requirements. Hiding buttons you do not use makes operating ZB easier.

- 1 Select the [Tools] menu ► [Customize].  
→ The [Customize] dialog box appears.
- 2 Remove the check mark from the buttons you want to hide.
- 3 Click the [OK] button to apply your changes.
- 4 Restart ZB for the settings to be applied.

# Troubleshooting

If ZB is not operating correctly, refer to the items below.

Also refer to the Help from the [Help] menu or click the [?] button at the top of each window and refer to the Help displayed.

## Installation could not be completed correctly

- You cannot install the software if a user setting with privileges other than [Computer administrator] or [Administrator] is selected. Select a user setting with [Computer administrator] privileges in Windows XP or [Administrator] privileges in Windows Vista. For detailed information on selecting the user setting, refer to your computer User's Manual.

## ZB does not work

- ZB does not operate correctly on a computer if its system requirements does not meet. Use ZB on a computer with compatible system requirements (p.67).
- Even if your computer has the RAM capacity (memory) described in the system requirements (p.67), if other applications are running at the same time as ZB, you may not have sufficient RAM (memory). Exit any applications other than ZB.

## Images do not display properly

- Images that are not supported by ZB (p.67) do not display. There are various types of JPEG and TIFF images, so JPEG images other than Exif 2.2 and 2.21 compatible images and TIFF images other than Exif compatible images may not display properly.
- With initial settings, the color of images that have been shot in Adobe RGB appear weak. In this case, check the [General] tab sheet in preferences and checkmark [Adjust color of images using monitor profile] (p.61). Color management is performed and the color of the image shot with an Adobe RGB setting and the image shot with an sRGB setting are matched.

# Deleting the Software (Uninstalling)

- Exit any applications before uninstalling the software.
- Log in under the Computer administrator/Administrator privileges when uninstalling the software.
- To prevent computer malfunctions, always restart your computer after you have uninstalled the software. Re-installing the software without first restarting your computer is particularly likely to result in computer malfunctions.

- 1 Select the [Start] button ([] button in Windows Vista) ► [All Programs] ► [Canon Utilities] ► [ZoomBrowser EX] ► [ZoomBrowser EX Uninstall].
- 2 Proceed with the uninstallation as directed by the on-screen messages.  
→ The software is uninstalled.

# System Requirements

<b>OS</b>	Windows Vista* <sup>1</sup> Windows XP Professional/Home Edition* <sup>2</sup>	
<b>Computer</b>	PC with one of the above OS preinstalled (Upgraded machines not supported) * .NET Framework 2.0 or later is required.* <sup>3</sup>	
<b>CPU</b>	Windows Vista	1.3GHz Pentium or higher
	Windows XP	500MHz Pentium or higher
<b>RAM</b>	Windows Vista	Minimum 512MB
	Windows XP	Minimum 256MB
<b>Display</b>	Screen resolution: 1024 × 768 pixels or more Color quality: Medium (16 bit) or more	

\*<sup>1</sup> Compatible with 32-bit/64-bit systems for all versions except Starter Edition (Also compatible with Service Pack 1)

\*<sup>2</sup> Compatible with Service Pack 2/Service Pack 3

\*<sup>3</sup> .NET Framework is Microsoft software. It is installed together with ZB.

# Supported Images

	Image type	Extension
JPEG images	JPEG images shot with a Canon digital camera (Exif 2.2 or 2.21-compatible JPEG images)	.JPG, .JPEG
RAW images	RAW images shot with a EOS DIGITAL camera excluding EOS D6000, EOS D2000, EOS DCS1, EOS DCS3	.CR2 .TIF .CRW
TIFF images	Exif-compatible TIFF images	.TIF, .TIFF
BMP images	Bitmap images	.BMP
PCD images	Photo CD images	.PCD

# About RAW Image Task

- RAW Image Task is the RAW image editing software linked with ZB. RAW Image Task is not provided with ZB ver. 6.2, but if it is installed on your computer, it can be started up from ZB ver. 6.2 in the same way as from versions 6.1 and earlier.
- RAW Image Task is not compatible with RAW images shot using an EOS 50D.

# Scroll Mode

The screenshot shows the ZoomBrowser EX interface in Scroll Mode. The window title is "ZoomBrowser EX - C:\Documents and Settings\Administrator\Desktop\Photo". The menu bar includes File, Edit, View, Tools, Internet, and Help. The toolbar contains icons for View Image, Properties, Slide Show, Search, Delete, and Rotate. The main area is divided into several sections:

- Tasks:** A vertical sidebar on the left containing buttons for "Acquire & Camera Settings", "View & Classify", "Edit", "Export", "Print & Email", and "CANON IMAGE GATEWAY".
- Last Acquired Images:** A section below the tasks sidebar.
- Folder area:** A section at the bottom of the sidebar showing a tree view of folders like Desktop, My Documents, My Music, My Pictures, My Computer, Photo, xxx\_1000, xxx\_2000, xxx\_3000, and Search Results.
- Image display area:** The central pane showing a hierarchy of folders (xxx\_1000, xxx\_100, xxx\_10, xxx\_20, xxx\_200, xxx\_300, xxx\_2000, xxx\_3000) with thumbnails of images and folders. A status bar at the bottom right indicates "Selected Items: 1".
- Filter display:** A small area above the image thumbnails.
- Image search, Deletes images, Rotates an image, Slide show, Properties window, Viewer window:** These are labels pointing to specific icons in the toolbar.
- Display magnification:** A zoom slider icon.
- Shows/hides the image or folder information:** An information icon.
- Selects/deselects all the images or folders:** A selection icon.
- Displays the folder one level above:** An up arrow icon.
- Returns to the display of the folder before [Up Arrow] is clicked:** A left arrow icon.
- Returns to the display of the folder previously displayed:** A right arrow icon.

\*1 The [CANON IMAGE GATEWAY] button may not be displayed depending on the area you are in.  
 \*2 Images in folders and folders selected here are displayed on the image display area.

# Preview Mode

The screenshot shows the ZoomBrowser EX interface in Preview Mode. The main window displays a large image of a glacier. To the left is a task pane with buttons for 'Acquire & Camera Settings', 'View & Classify', 'Edit', 'Export', 'Print & Email', and 'CANON IMAGE GATEWAY'. Below these are 'Last Acquired Images' and 'Favorite Folders'. The top menu bar includes 'File', 'Edit', 'View', 'Tools', 'Internet', and 'Help'. The toolbar contains 'View Image', 'Properties', 'Slide Show', 'Search', 'Delete', and 'Rotate'. The right side features a 'Filter' display, 'File Information' (File Name, Modified, File Size, Image Size, Data Type, Sound), 'Star Rating', 'Comment', 'Keywords', 'Brightness Histogram', and 'Shooting Information' (File Name, Camera Model, Shooting Date, Tv, Av, ISO Speed, Image Size). At the bottom, there are 'Previous' and 'Next' buttons, a 'Thumbnail image display area' showing a row of image thumbnails, and a 'Number of selected images' indicator.

Labels and callouts:

Printer selection and settings

The screenshot shows the 'Index Print' window in ZoomBrowser EX. The window title is 'ZoomBrowser EX - C:\Documents and Settings\Administrator\My Documents\My Pictures\xxxx\_xx\_01'. The main area is titled 'STEP 2: Specify Printer and Layout Settings'. On the left, there is a sidebar with three steps: '1. Select Images', '2. Printer and Layout Settings' (which is active), and '3. Print'. Below the sidebar, there is a 'Return to Main Menu' button. The main settings area is divided into several sections: 'Printer' (Name: Canon XXX, Media Type: Photo Paper Pro, Paper Size: A4), 'Orientation' (Portrait selected, Landscape unselected), 'Copies' (set to 1), 'Page Layout Settings' (Columns: 3, Rows: 3), and 'Shooting Information' (checked, with a 'Settings...' button). Below these are 'Header/Footer' settings. To the right is a 'Preview' section with buttons for 'Rotate Left', 'Rotate Right', and 'Trim Image', and a grid of photo thumbnails. At the bottom of the preview area, there are left and right navigation arrows. The status bar at the bottom shows 'Page: 1/1' and 'Selected Items: 9'. A 'Print' button is located at the bottom left of the main settings area.
