Serial No.____________________

Important Safety Instructions

• Read these instructions.
• Keep these instructions.
• Heed all warnings.
• Follow all instructions.
• Do not use this apparatus near water.
• Clean only with dry cloth.
• Do not block any ventilation openings.
  Install in accordance with the manufacturer’s instructions.
• Do not install near any heat sources such as radiators, heat registers, stoves, or other apparatus (including amplifiers) that produce heat.
• Do not defeat the safety purpose of the polarized or grounding-type plug. A polarized plug has two blades with one wider than the other. A grounding-type plug has two blades and a third grounding prong. The wide blade or the third prong are provided for your safety. If the provided plug does not fit into your outlet, consult an electrician for replacement of the obsolete outlet.
• Protect the power cord from being walked on or pinched particularly at plugs, convenience receptacles, and the point where they exit from the apparatus.
• Only use attachments/accessories specified by the manufacturer.
• Use only with the cart, stand, tripod, bracket, or table specified by the manufacturer, or sold with the apparatus. When a cart is used, use caution when moving the cart/apparatus combination to avoid injury from tip-over.
• Unplug this apparatus during lightning storms or when unused for long periods of time.
• Refer all servicing to qualified service personnel. Servicing is required when the apparatus has been damaged in any way, such as power-supply cord or plug is damaged, liquid has been spilled or objects have fallen into the apparatus, the apparatus has been exposed to rain or moisture, does not operate normally, or has been dropped.

WARNING

To avoid electrical shock, do not open the cabinet. Refer servicing to qualified personnel only.

WARNING

THIS APPARATUS MUST BE EARTHED.

WARNING

When installing the unit, incorporate a readily accessible disconnect device in the fixed wiring, or connect the power plug to an easily accessible socket-outlet near the unit. If a fault should occur during operation of the unit, operate the disconnect device to switch the power supply off, or disconnect the power plug.

Attention—when the product is installed in Rack:

1. Prevention against overloading of branch circuit
When this product is installed in a rack and is supplied power from an outlet on the rack, please make sure that the rack does not overload the supply circuit.

2. Providing protective earth
When this product is installed in a rack and is supplied power from an outlet on the rack, please confirm that the outlet is provided with a suitable protective earth connection.

3. Internal air ambient temperature of the rack
When this product is installed in a rack, please make sure that the internal air ambient temperature of the rack is within the specified limit of this product.

4. Prevention against achieving hazardous condition due to uneven mechanical loading
When this product is installed in a rack, please make sure that the rack does not achieve hazardous condition due to uneven mechanical loading.

5. Install the equipment while taking the operating temperature of the equipment into consideration
For the operating temperature of the equipment, refer to the specifications of the Operation Manual.

6. When performing the installation, keep the following space away from walls in order to obtain proper exhaust and radiation of heat.

Upper : 4.4 cm (1 3/4 inches) or more
Lower (when not using the stand) : 1.7 cm (11/16 inches) or more
Rear : 10.0 cm (4 inches) or more
CAUTION
The apparatus shall not be exposed to dripping or splashing. No objects filled with liquids, such as vases, shall be placed on the apparatus.

CAUTION
The unit is not disconnected from the AC power source (mains) as long as it is connected to the wall outlet, even if the unit itself has been turned off.

WARNING
Excessive sound pressure from earphones and headphones can cause hearing loss. In order to use this product safely, avoid prolonged listening at excessive sound pressure levels.

Consult with Sony qualified personnel for wall mount or rack mount installation.

For the customers in the U.S.A.
WARNING:
Using this unit at a voltage other than 120 V may require the use of a different line cord or attachment plug, or both. To reduce the risk of fire or electric shock, refer servicing to qualified service personnel.

For the customers in Canada
This Class A digital apparatus complies with Canadian ICES-003.

For the customers in Europe
This product with the CE marking complies with the EMC Directive issued by the Commission of the European Community. Compliance with this directive implies conformity to the following European standards:
- EN55103-1: Electromagnetic Interference (Emission)
- EN55103-2: Electromagnetic Susceptibility (Immunity)

This product is intended for use in the following Electromagnetic Environments: E1 (residential), E2 (commercial and light industrial), E3 (urban outdoors), E4 (controlled EMC environment, ex. TV studio).

For the customers in Europe
This product has been manufactured by or on behalf of Sony Corporation, 1-7-1 Konan Minato-ku Tokyo, 108-0075 Japan. Inquiries related to product compliance based on European Union legislation shall be addressed to the authorized representative, Sony Deutschland GmbH, Hedelfinger Strasse 61, 70327 Stuttgart, Germany. For any service or guarantee matters, please refer to the addresses provided in the separate service or guarantee documents.

For the customers in Europe
This product has been manufactured by or on behalf of Sony Corporation, 1-7-1 Konan Minato-ku Tokyo, 108-0075 Japan. Inquiries related to product compliance based on European Union legislation shall be addressed to the authorized representative, Sony Deutschland GmbH, Hedelfinger Strasse 61, 70327 Stuttgart, Germany. For any service or guarantee matters, please refer to the addresses provided in the separate service or guarantee documents.

For the customers in the U.S.A.
This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.

You are cautioned that any changes or modifications not expressly approved in this manual could void your authority to operate this equipment.

All interface cables used to connect peripherals must be shielded in order to comply with the limits for a digital device pursuant to Subpart B of Part 15 of FCC Rules.

This device complies with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) this device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

For the customers in Canada
This Class A digital apparatus complies with Canadian ICES-003.

For the customers in Europe
This product with the CE marking complies with the EMC Directive issued by the Commission of the European Community. Compliance with this directive implies conformity to the following European standards:
- EN55103-1: Electromagnetic Interference (Emission)
- EN55103-2: Electromagnetic Susceptibility (Immunity)

This product is intended for use in the following Electromagnetic Environments: E1 (residential), E2 (commercial and light industrial), E3 (urban outdoors), E4 (controlled EMC environment, ex. TV studio).

Precaution

On Safety

- Operate the unit only with a power source as specified in the “Specifications” section.
- A nameplate indicating operating voltage, etc., is located on the rear and bottom.
- Should any solid object or liquid fall into the cabinet, unplug the unit and have it checked by qualified personnel before operating it any further.
- Do not drop or place heavy objects on the power cord. If the power cord is damaged, turn off the power immediately. It is dangerous to use the unit with a damaged power cord.
- Unplug the unit from the wall outlet if it is not to be used for several days or more.
- Disconnect the power cord from the AC outlet by grasping the plug, not by pulling the cord.
- The socket-outlet shall be installed near the equipment and shall be easily accessible.
- Do not carry the monitor by holding the stand.
- Do not carry the monitor by holding the AC adaptor.

On Installation

- Allow adequate air circulation to prevent internal heat build-up.
  Do not place the unit on surfaces (rugs, blankets, etc.) or near materials (curtains, draperies) that may block the ventilation holes.
- Do not install the unit in a location near heat sources such as radiators or air ducts, or in a place subject to direct sunlight, excessive dust, mechanical vibration or shock.

Handling the LCD Screen

- The LCD panel fitted to this unit is manufactured with high precision technology, giving a functioning pixel ratio of at least 99.99%. Thus a very small proportion of pixels may be “stuck”, either always off (black), always on (red, green, or blue), or flashing. In addition, over a long period of use, because of the physical characteristics of the liquid crystal display, such “stuck” pixels may appear spontaneously. These problems are not a malfunction.
- Do not leave the LCD screen facing the sun as it can damage the LCD screen. Take care when you place the unit by a window.

- Do not push or scratch the LCD monitor’s screen. Do not place a heavy object on the LCD monitor’s screen. This may cause the screen to lose uniformity.
- If the unit is used in a cold place, horizontal lines or a residual image may appear on the screen. This is not a malfunction. When the monitor becomes warm, the screen returns to normal.
- The screen and the cabinet become warm during operation. This is not a malfunction.

On Burn-in

For LCD panel, permanent burn-in may occur if still images are displayed in the same position on the screen continuously, or repeatedly over extended periods.

Images that may cause burn-in
- Masked images with aspect ratios other than 16:9
- Color bars or images that remain static for a long time
- Character or message displays that indicate settings or the operating state

To reduce the risk of burn-in
- Turn off the character displays
  Press the MENU button to turn off the character displays. To turn off the character displays of the connected equipment, operate the connected equipment accordingly. For details, refer to the operation manual of the connected equipment.
- Turn off the power when not in use
  Turn off the power if the viewfinder is not to be used for a prolonged period of time.

On a Long Period of Use

Due to the characteristics of LCD panel, displaying static images for extended periods, or using the unit repeatedly in a high temperature/high humidity environments may cause image smearing, burn-in, areas of which brightness is permanently changed, lines, or a decrease in overall brightness.

In particular, continued display of an image smaller than the monitor screen, such as in a different aspect ratio, may shorten the life of the unit.
Avoid displaying a still image for an extended period, or using the unit repeatedly in a high temperature/high humidity environment such an airtight room, or around the outlet of an air conditioner.

To prevent any of the above issues, we recommend reducing brightness slightly, and to turn off the power whenever the unit is not in use.
On Cleaning

Before cleaning
Be sure to disconnect the AC power cord from the AC outlet.

On cleaning the monitor screen
The monitor screen surface is especially treated to reduce reflection of light. As incorrect maintenance may impair the performance of the monitor, take care with respect to the following:
- Wipe the screen gently with a soft cloth such as a cleaning cloth or glass cleaning cloth.
- Stubborn stains may be removed with a soft cloth such as a cleaning cloth or glass cleaning cloth lightly dampened with water.
- Never use solvent such as alcohol, benzene or thinner, or acid, alkaline or abrasive detergent, or chemical cleaning cloth, as they will damage the screen surface.

On cleaning the cabinet
- Clean the cabinet gently with a soft dry cloth. Stubborn stains may be removed with a cloth lightly dampened with mild detergent solution, followed by wiping with a soft dry cloth.
- Use of alcohol, benzene, thinner or insecticide may damage the finish of the cabinet or remove the indications on the cabinet. Do not use these chemicals.
- If you rub on the cabinet with a stained cloth, the cabinet may be scratched.
- If the cabinet is in contact with a rubber or vinyl resin product for a long period of time, the finish of the cabinet may deteriorate or the coating may come off.

On Dew Condensation
If the viewfinder is moved suddenly from a cold place to a warm place, or used in a room with high humidity, water droplets may form on the interior of the product. This phenomenon is known as dew condensation. This product does not come with a feature that warns users of dew condensation. If water droplets are found on the casing, turn off the power, and wait until the condensation disappears before using.

On Repacking
Do not throw away the carton and packing materials. They make an ideal container which to transport the unit.

On Mounting on a Rack
Leave 1U space empty above and below the monitor to ensure adequate air circulation or install a fan to maintain the monitor’s performance.

If you have any questions about this unit, contact your authorized Sony dealer.

Disposal of the Unit
Do not dispose of the unit with general waste. Do not include the monitor with household waste. When you dispose of the monitor, you must obey the law in the relative area or country.

On Fan Error
The fan for cooling the unit is built in. When the fan stops and the (standby) switch indicator on the front panel flashes in green and amber for fan error indication, turn off the power and contact an authorized Sony dealer.

On AC Adaptor Terminal
The AC adaptor terminal of this unit (the connector for AC adaptors) is a consumable part. The unit may not operate properly if the pins of the AC adaptor terminal are bent or deformed by shock or vibrations, or if they become corroded due to prolonged outdoor use. Periodic inspections are recommended to keep the unit working properly and to prolong its usable lifetime. Contact your dealer or a Sony service representative for more information about inspections.
The LMD-941W (9 type) is equipped with a Full HD (1920 × 1080) LCD panel providing precise image and high performance in multiple formats, suitable for broadcast or business use. It supports both digital or analog main broadcast signal and HDMI 1) input. It is also equipped with functions to adjust for various objects or use.

1) The terms HDMI and HDMI High-Definition Multimedia Interface, and the HDMI Logo are trademarks or registered trademarks of HDMI Licensing LLC in the United States and other countries.

**High brightness Full HD (1920 × 1080) LCD panel**
Because of precise image, wide viewing angle technology, real color images can be reproduced. Use the light intercepting hood, connector protector and carrying handle (optional Sony VF-510 Monitor ENG Kit) for outdoor use.

**Color space function**
Sony’s “ChromaTRU” technology brings to you broadcast standard (ITU-R BT.709/EBU/SMPTE-C) color space settings. You can contrast the images of the monitors placed on monitor wall mount or rack mount.

**Strong, slim and lightweight**
The strong, slim, and lightweight design of the aluminum die-cast chassis makes the monitor suitable for use with rack mounts or as a portable monitor. This reduces the weight burden on an outdoor broadcasting van, and allows for a wider working space.

**I/P mode select**
The desired I/P mode for interlace signal can be selected for your purpose.

*For more information, see “SYSTEM SETTING” on page 23.*

**Select marker/scan display**
Various items for broadcast use can be displayed. The center marker, aspect marker or display size (scan), etc are displayed by selecting according to use.

*For more information, see “MARKER SETTING” on page 24 and SCAN of “FUNCTION BUTTON SETTING” on page 28.*

**Input signal waveform, audio level, and vectorscope display**
The input signal waveform, the audio level (embedded audio only), or the vectorscope can be displayed.

*For more information, see “WFM/ALM/VECTOR (waveform monitor, audio level meter, and vectorscope) SETTING” on page 26.*

**Timecode display**
Timecode superimposed on SDI signals is displayed on the screen.

*For more information, see “T/C (time code) DISPLAY SETTING” on page 24.*

**Camera focus**
This function sharpens the edges of the image more than the amount set by the upper limit of the aperture value in the USER CONTROL menu. This is convenient for focusing with the camera. This function also colors the focused part of an image, providing fast and exact focusing.

**Scan setting/native display**
When video signals are input, you can set the display size to 0% scan (normal) or 5% over scan (over). A native display function that maps the pixel of the signal to the panel in one-to-one mode is also equipped. With this, scaling to correct the screen aspect ratio is done to the horizontal direction of SD signals with non-square pixels (number of horizontal pixels of the signal system is 720 or 1440) or 640 × 480 SD signal of HDMI video.

**External remote function**
The input signal is selected or various items are adjusted by use of the serial (Ethernet) remote function. Up to 32 monitors and control units (max. 4) can be connected by the Ethernet (10BASE-T/100BASE-TX) connection and controlled remotely on the network. You can control individual monitors or monitor groups simply by entering the monitor ID or group ID number. You can also execute the same operation on all connected monitors, or put all connected monitors into the same setup and adjustment state.

*For more information, see SERIAL REMOTE of REMOTE menu on page 31.*

Refer to the Operation Manual of the BKM-15R or BKM-16R Monitor Control Unit (optional).

**Closed caption**
EIA/CEA-608 and EIA/CEA-708 standard closed caption signals superimposed on an SDI signal can be displayed. Closed caption signals superimposed on an NTSC signal can also be displayed.

**IMD (in-monitor display)**
With the external remote function, image source names and tally information are displayed on the screen.

*For more information, see IMD (in-monitor display) SETTING on page 25.*
Illuminated control panel
The characters that represent the names of the buttons on the control panel can be illuminated, so it is visible in the dark. The brightness of the LED has two levels, and varies according to the ambient light.

Key inhibit function
You can inhibit a key function to prevent misoperation.

Monaural speaker
The monitor has a monaural speaker to reproduce sound.

Two power systems
This unit can also be operated by DC 12V or its exclusive AC adaptor. The AC adaptor can be mounted on the rear of the monitor for easy use.

Silent mode
You can stop the built-in cooling fan. This function is convenient for stopping the noise of the fan rotation.

Rack mount monitors
Using the optional MB-531 Mounting Bracket, up to two monitors may be mounted on the EIA-standard 19-inch rack. A height of 4U space-saving design allows more equipment to be installed in tight space, such as an outdoor broadcasting van.

Carrying handle
A carrying handle is included.

Tripod socket holes
Tripod socket holes are provided on the bottom of the unit.
With the supplied arm mount bracket installed on the unit, you can use the same screw holes on the upper side.

Removable screen’s protection plate
You can attach and detach the screen’s protection plate easily with the four screws.

Monitor stand
You can set the monitor display in 15° by using the stand.

Monitor ENG Kit
You can use the light intercepting hood, connector protector and carrying handle (optional Sony VF-510 Monitor ENG Kit) for outdoor use.
**Location and Function of Parts and Controls**

**Front Panel**

1. **Tally lamp**
   You can check the status of the monitor by the color of the tally lamp.
   The tally lamp lights in red, green or amber according to the setting of PARALLEL REMOTE in the REMOTE menu.

2. **Protection plate**
   You can detach the protection plate by removing the four screws.

3. **(headphones) jack**
   The audio signal which is selected by the input select button is output in stereo sound.

4. **Speaker**
   The audio signal which is selected by the input select button is output in monaural sound (L + R).
   When SDI signals are input, the audio which is selected in AUDIO SETTING of the USER CONFIG menu is output (see page 30).
   The audio signals from the speaker are output from the AUDIO OUT connector on the rear (see page 12).
   Audio signals will not be output when headphones are connected to the jack.

5. **Stand**
   Pull the stand toward you to tilt the monitor screen by 15°. When using the optional VF-510 Monitor ENG Kit, set the stand at positions B and C (see “Using the stand” on page 10).

6. **Input select buttons**
   Press to monitor the signal input to each connector. If a temperature increase occurs inside the unit when using the unit in a high temperature environment, or in SILENT MODE, the LED flashes.
   - **SDI 1 button**: to monitor the signal through the SDI 1 input connector
   - **SDI 2 button**: to monitor the signal through the SDI 2 input connector
   - **HDMI button**: to monitor the signal through the HDMI connector
   - **COMPOSITE button**: to monitor the signal through the COMPOSITE IN connector

7. **Function buttons**
   You can turn the assigned function on or off.
   The factory setting is as follows;
   - **F1 button**: BRIGHTNESS
   - **F2 button**: CONTRAST
   - **F3 button**: CHROMA
   - **F4 button**: SCAN
**F5 button**: H/V DELAY  
**F6 button**: VOLUME  
**F7 button**: I/P MODE  

You can assign various functions in FUNCTION BUTTON SETTING of the USER CONFIG menu. Press the button BRIGHTNESS, CONTRAST, CHROMA, VOLUME, PHASE, or APERTURE function assigned to display the adjustment screen. Press the same button again, and the adjustment screen disappears, but you can adjust the value without the setting value display.

*For details of the function assigned to the function button, see page 28.*

### 0 Menu operation buttons
Displays or sets the on-screen menu.

#### Menu selection control
When the menu is displayed, turn the control to select a menu item or setting value, and then press the control to confirm the setting.

If the menu is not displayed and the menu selection control is pressed, the characters that represent the names of the buttons light up, then disappear after a specified time. Also, the names of the functions selected in FUNCTION BUTTON SETTING of the USER CONFIG menu appear on the screen, then disappear after a specified time.

Alternatively, if the menu is not displayed and the menu selection control is pressed for more than two seconds, the signal format is displayed on the screen.

#### RETURN button
When the menu is displayed, press the button to reset the value of an item to the previous value (except some items).

When the menu is not displayed, press the button to display the name of the function selected in FUNCTION BUTTON SETTING of the USER CONFIG menu.

#### MENU button
Press to display the on-screen menu. Press again to clear the menu.

### 3 (standby) switch and indicator
Press to turn on the power when this unit is in standby mode. The indicator lights in green. Press the switch again to set the monitor in standby mode. The indicator goes out. When a fan error occurs, the indicator flashes in green and amber alternately. In power saving mode, it lights in amber.

### Using the stand

Pull the stand toward you to tilt the monitor screen by 15°.

The mounting position of the stand can be changed. Move the mounting screws on the underside of the stand to positions A and C, or positions B and C.

A and C: Sets the stand towards the back.  
B and C: Sets the stand towards the front.

When using the optional VF-510 Monitor ENG Kit, set the stand at positions B and C.

○: Adjustable/can be set  
×: Not adjustable/cannot be set

*1 Adjustment of SUB CONTROL is the same.  
*2 Only the interlace signal is input.  
*3 Adjustable when RGB format of HDMI signals are input.  
*4 When the marker display is set to ON, or NATIVE is selected in the scan mode, closed captions cannot be displayed.  
*5 When RGB format signal is input, VECTOR cannot be displayed.  
*6 When the WFM/ALM/VECTOR display is set to ON, this does not function.  
*7 Some characters may be misplaced, cropped or missing.
SDI (3G/HD/SD) input and output connectors (BNC)

1 (input) connector, 2 (input) connector
Input connector for serial digital component signals. SDI 1 and SDI 2 inputs are available.

OUT connector
Output connector for serial digital component signals.

Note
- The signal from the OUT connector does not satisfy the ON-LINE signal specifications.
- Output is only activated when the power is on. No output in standby mode.

COMPOSITE input and output connectors (BNC)

IN connector
Input connector for composite video signals.

OUT connector
Loop-through output connector.

Note
When inputting a video signal with the jitters, etc. the picture may be disturbed. We recommend using the TBC (time base corrector).

AUDIO input and output connectors (stereo mini jack)

IN connector
Connect to the audio outputs of external equipment such as a VCR.

OUT connector
Outputs the audio signal which is selected by the input select button on the front panel.
When SDI signal is selected, either the audio signal of the channel which is selected in AUDIO SETTING of the USER CONFIG menu or the audio signal from the AUDIO IN connector is output.

PARALLEL REMOTE connector (modular connector, 8-pin)
Forms a parallel switch and controls the monitor externally.

For details on the pin assignment and factory setting function assigned to each pin, see page 34.

CAUTION
For safety, do not connect the connector for peripheral device wiring that might have excessive voltage to this port. Follow the instructions for this port.

SERIAL REMOTE connector (RJ-45)
Connect to the network or Sony BKM-15R/16R Monitor Control Unit by using a 10BASE-T/100BASE-TX LAN cable (shielded type, optional).

For details, refer to the Interface Manual for Programmers (saved in the supplied CD-ROM, Japanese and English only).
Installing the Handle

You can install the supplied carrying handle to the unit, using the supplied four screws.

---

CAUTION

- For safety, do not connect the connector for peripheral device wiring that might have excessive voltage to this port. Follow the instructions for this port.
- When you connect the LAN cable of the unit to peripheral device, use a shielded-type cable to prevent malfunction due to radiation noise.
- The connection speed may be affected by the network system. This unit does not guarantee the communication speed or quality of 10BASE-T/100BASE-TX.

6 HDMI input connector
Input connector for HDMI signals.
HDMI (High-Definition Multimedia Interface) is an interface that supports both video and audio on a single digital connection, allowing you to enjoy high quality digital picture and sound. The HDMI specification supports HDCP (High-bandwidth Digital Content Protection), a copy protection technology that incorporates coding technology for digital video signals.

Note
Use HDMI compliant cable (optional) with HDMI logo.

7 EJECT button
While sliding this button, remove the AC adaptor.

8 Tripod socket hole (1/4-20UNC, 3/8-16UNC)
When using a tripod, secure it to the monitor with this hole.

9 AC adaptor attachment
The monitor can also be operated with AC power by attaching the AC adaptor.

CAUTION
For safety, use only the Sony AC adaptor listed below.
- AC power using the AC-941W AC Adaptor

10 (DC IN) connector
Connects the DC 12V external power source to use the monitor.

CAUTION
Be sure to connect to a power supply of the specified voltage value.
Installing the Arm Mount Bracket

You can install the supplied arm mount bracket, using the supplied four screws.

Installing to the Rack (Using MB-531)

You can attach up to two monitors to the rack by using the optional MB-531 Mounting Bracket.

1. Attach the mounting bracket to the monitor.

   For details on attaching the mounting bracket, refer to the Mounting Instructions of the MB-531.

2. Attach the unit to the rack with four screws.

   Note

   The screws are not supplied. Prepare screws according to the rack.
Power Supply

Attaching the AC Adaptor

Attaching

![Attaching the AC Adaptor]

Removing

![Removing the AC Adaptor]

CAUTION

- The AC adaptor can be used only with products specified by the manufacturer.
- To remove the AC adaptor, first unplug the AC power cord and then remove the AC adaptor.
- Do not carry the monitor by holding the AC adaptor.

Connecting the AC Power Cord

Attach the AC adaptor to the monitor, and then connect the supplied AC power cord.

![Connecting the AC Power Cord]

AC power cord (supplied)

</table>

1 Press the (standby) switch.

The unit is turned on and the SELECT SETTING screen appears.

2 Turn the menu selection control to select the area where you intend to use the unit and press the menu selection control.

   If you select either 1, 3 or 5

The confirmation screen is displayed. Confirm the selected area. When the setting is wrong, press the RETURN button to return to the previous screen.

   If you select either 2 or 4

One of the following screens appears. Turn the menu selection control to narrow the area further and then press the menu selection control.

The confirmation screen is displayed. Confirm the selected area.

If the setting is wrong, press the RETURN button to return to the previous screen.
Selecting the Menu Language

You can select one of seven languages (English, French, German, Spanish, Italian, Japanese, Chinese) for displaying the menu and other on-screen displays. “ENGLISH (English)” is selected in the default setting. The current settings are displayed in place of the ■ marks on the illustrations of the menu screen.

1. Press the menu selection control.
   The SELECT SETTING screen disappears and the menu item settings suitable for the selected area are applied.

   Note
   When you have selected the wrong area, set the following items using the menu.
   - COLOR TEMP (on page 21)
   - NTSC SETUP (on page 23)
   - COLOR SPACE (on page 23)
   See “The default setting values for each area” (page 16) on the setting value.

   1. Turn on the unit.
   2. Press the MENU button.
      The menu appears.
      The menu presently selected is shown in yellow.

   3. Turn the menu selection control to select SYSTEM SETTING of the USER CONFIG (user configuration) menu, then press the menu selection control.
The setting items (icons) in the selected menu are displayed in yellow.

4 Turn the menu selection control to select “LANGUAGE”, then press the menu selection control.

The selected item is displayed in yellow.

5 Turn the menu selection control to select a language, then press the menu selection control.

The menu changes to the selected language.

To clear the menu
Press the MENU button.
The menu disappears automatically if a button is not pressed for one minute.

Using the Menu

The unit is equipped with an on-screen menu for making various adjustments and settings such as picture control, input setting, set setting change, etc. You can also change the menu language displayed in the on-screen menu.

To change the menu language, see “Selecting the Menu Language” on page 17.

The current settings are displayed in place of the marks on the illustrations of the menu screen.
The menu icon presently selected is shown in yellow and setting items are displayed.

3 Select an item.

Turn the menu selection control to select the item, then press the menu selection control. The item to be changed is displayed in yellow. If the menu consists of multiple pages, turn the menu selection control to go to the desired menu page.

4 Make the setting or adjustment on an item.

**When changing the adjustment level:**
To increase the number, turn the menu selection control right. To decrease the number, turn the menu selection control left. Press the menu selection control to confirm the number, then restore the original screen.

**When changing the setting:**
Turn the menu selection control to change the setting, then press the menu selection control to confirm the setting.

**When returning the adjustment or setting to the previous value:**
Press the RETURN button before pressing the menu selection control.

**Notes**
- An item displayed in black cannot be accessed. You can access the item if it is displayed in white.
- If the key inhibit has been turned on, all items are displayed in black. To change any of the items, turn the key inhibit to OFF first.

*For details on the key inhibit, see page 32.*

**To return the display to the previous screen**
Press the RETURN button.

**To clear the menu**
Press the MENU button.

---

**About the memory of the settings**
The settings are automatically stored in the monitor memory.

- Model name and serial number

COLOR TEMP/SPACE menu

The COLOR TEMP/SPACE menu is used for adjusting the picture white balance or color space. You need to use the measurement instrument to adjust the white balance.

Recommended: Konica Minolta color analyzer CA-210/CA-310

<table>
<thead>
<tr>
<th>Submenu</th>
<th>Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>COLOR TEMP</td>
<td>Selects the color temperature from among D65, D93 and USER setting.</td>
</tr>
<tr>
<td>MANUAL ADJUSTMENT</td>
<td>If you set the COLOR TEMP to USER setting, the item displayed is changed from black to white, which means you can adjust the color temperature. The set values are memorized.</td>
</tr>
<tr>
<td></td>
<td>• ADJUST GAIN: Adjusts the color balance (GAIN).</td>
</tr>
<tr>
<td></td>
<td>• ADJUST BIAS: Adjusts the color balance (BIAS).</td>
</tr>
<tr>
<td></td>
<td>• COPY FROM: If you select D65 or D93, the white balance data for the selected color temperature will be copied in the USER setting.</td>
</tr>
<tr>
<td>COLOR SPACE</td>
<td>Selects the color space from among EBU, SMPTE-C, ITU-709 and OFF. OFF sets the color space to the original color reproduction of the panel.</td>
</tr>
</tbody>
</table>

USER CONTROL menu

The USER CONTROL menu is used for adjusting the picture. Items that cannot be adjusted depending on the input signal are displayed in black.

For details of input signal and adjustable / setting items, see page 11.
 Adjustment Using the Menus

**SUB CONTROL** Adjusts finely the adjustment range of the function buttons which CONTRAST, BRIGHTNESS, CHROMA and PHASE are assigned.

- **CONTRAST**: Adjusts the picture contrast.
- **BRIGHTNESS**: Adjusts the picture brightness.
- **CHROMA**: Adjusts color intensity. The higher the setting, the greater the intensity. The lower the setting, the lower the intensity.
- **PHASE**: Adjusts color tones. The higher the setting, the more greenish the picture. The lower the setting, the more purplish the picture.
- **APERTURE**: Adjusts the picture sharpness. The higher the setting, the sharper the picture. The lower the setting, the softer the picture. APERTURE does not work when the camera focus function is activated.
- **BACKLIGHT**: Adjusts the backlight. When the setting is changed, the brightness of the backlight is changed.
- **VOLUME**: Adjusts the volume.

**AUTO CHROMA/PHASE**

- **AUTO ADJ VALUE**: Selects ON or OFF of the auto adjustment. When you set to OFF, this parameter is reset to the factory setting. When you set to ON, the automatically adjusted value is enabled.
- **START**: The auto adjustment starts when you display the color bar signals (Full/ SMPTE/EIA) on the screen and press the menu selection control. After adjusting the color intensity, press the MENU button to clear the adjustment screen. After the adjustment is done correctly, the AUTO ADJ VALUE is automatically set to ON.

**PICTURE CONTROL**

- **ACC (Auto Color Control)**: Sets ACC circuit on or off. To check the fine adjustment, select OFF. Normally select ON.
- **CTI (Chroma Transient Improvement)**: When a low color resolution signal is input, a crisp image can be displayed. When the setting is higher, the picture becomes even more crisp.
- **V SHARPNESS**: A crisp image can be displayed. When the setting is higher, the picture becomes even more crisp.

**INPUT SETTING**

- **SHIFT H**: Adjusts the position of the picture. As the setting increases, the picture moves to the right, and as the setting decreases, the picture moves to the left.
- **SHIFT V**: Adjusts the position of the picture. As the setting increases, the picture moves up, and as the setting decreases, the picture moves down.
 USER CONFIG menu
The USER CONFIG menu is used for setting the system, marker, T/C display, WFM/ALM/VECTOR, focus, function button, closed caption, and audio.

### MARKER SETTING

**USER CONFIG – MARKER SETTING**

<table>
<thead>
<tr>
<th>Submenu</th>
<th>Setting</th>
</tr>
</thead>
</table>
| SD PIXEL MAPPING | Selects SD picture size (pixels) according to the input signal format from the COMPOSITE IN connector.  
When picture signals in the size of 720 × 576 (50i) (or 720 × 487 (60i)) are input  
Select 720 × 576 (or 720 × 487). This is the default setting.  
When 702 × 576 (or 712 × 483) is selected, all sides of the input picture are cut off by several pixels.  
When picture signals in the size of 702 × 576 (50i) (or 712 × 483 (60i)) or equivalent are input  
Select 702 × 576 (or 712 × 483).  
When 720 × 576 (or 720 × 487) is selected, a black border (of several pixels wide) appears around the input picture. |
| MARKER ENABLE | Selects ON to display the marker and OFF not to display.  
**Note**  
When NATIVE is selected in the SCAN setting, the marker is not displayed.  
To display the marker, select a setting other than NATIVE. |
| MARKER SELECT | Selects the aspect ratio according to the film, when the frame of the film is displayed on the screen.  
When 16:9 aspect ratio is selected with the button which the aspect function is assigned  
You can select from among 4:3, 15:9, 14:9, 13:9, 1.85:1, 2.35:1, 1.85:1 & 4:3 and OFF.  
When 4:3 aspect ratio is selected with the button which the aspect function is assigned  
You can select 16:9 or OFF. |
| CENTER MARKER | Selects ON to display the center mark of the picture and OFF not to display. |
| SAFETY AREA | Selects the safe area size for the aspect ratio determined by the button to which the aspect function is assigned. You can select from OFF, 80%, 85%, 88%, 90% and 93%. When the marker is displayed, the safe area for the marker is displayed. |
| MARKER LEVEL | Sets the luminance to display the MARKER SELECT, CENTER MARKER and SAFETY AREA. You can select 1, 2 or 3. When the setting is low, the marker appears dark. |
| MARKER MAT | Selects whether you put mat on the outside of the marker display.  
• OFF: No mat is put.  
• HALF: Gray mat is put.  
• BLACK: Black mat is put. |

### T/C (time code) DISPLAY SETTING

**USER CONFIG – T/C DISPLAY SETTING**

<table>
<thead>
<tr>
<th>Submenu</th>
<th>Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>T/C</td>
<td>Selects ON to display the time code display and OFF not to display.</td>
</tr>
</tbody>
</table>
| FORMAT | Sets the time code format.  
• VITC: To display the time code in VITC format.  
• LTC: To display the time code in LTC format. |
| POSITION | Sets the position of the time code display. You can select between 1 and 2.  
• 1: Top  
• 2: Bottom |
| TRANSPARENCY | Selects BLACK or HALF (transparent) for the background of T/C display.  
• BLACK: The background becomes black. Displayed image is hidden behind the background.  
• HALF: The background becomes transparent. Displayed image appears under the T/C display. |
IMD (in-monitor display) SETTING

The monitor supports “TSL UMD Protocol - V5.00” provided by Television System LTD. Tally 1 and tally 2 lamp colors, text colors and text display brightness can be set in the setting menu.

Notes

- Set values to “0x0000” in SCREEN and INDEX of TSL protocol setting before displaying IMD.
- The monitor displays English alphabet, numbers, symbolic codes and Japanese letters (i.e. Hiragana and Katakana). Certain symbols cannot be displayed.
- Up to 16 characters are displayed in English and Japanese. A voiced sound mark in Japanese is counted as one character.

| WFM/ALM/VECTOR | Sets the display settings for WFM/ALM/VECTOR.  
  - **WFM**: Displays the waveform monitor.  
  - **ALM**: Displays the audio level meter.  
  - **VECTOR**: Displays the vectorscope. When WFM is selected, the waveform and audio level are displayed. When ALM is selected, the audio level is displayed in eight channels. When VECTOR is selected, the color component of the image signal and the audio levels are displayed. When SDI signal is input, the audio levels for channels selected in SDI AUDIO SETTING are displayed. Each display type is illustrated below. (The waveform percentage and audio level units/values do not appear on the display.) |

### When WFM is selected

**Waveform**

</tbody>
</table>
| **FOCUS SETTING** | **POSITION** | Sets the position of the WFM/ALM/VECTOR display. You can select from among 1 to 4.  
- **1**: Bottom left  
- **2**: Bottom right  
- **3**: Top right  
- **4**: Top left |
| | **TRANSPARENCY** | Selects from black and half (transparent) for the background of the WFM/ALM/VECTOR display.  
- **BLACK**: The background is black. Displayed image is hidden behind the background.  
- **HALF**: The background is transparent. Displayed image can be seen indistinctly behind the WFM/ALM/VECTOR display. |
| | **COLOR** | Selects the displayed line color from white (W), red (R), green (G), blue (B), and yellow (YL), when WFM is selected. |
| | **INTENSITY** | Sets the brightness of the waveform, etc. The larger the value, the brighter the waveform. |
| | **ZOOM** | When ON is set, 0-20 IRE areas will be zoomed when WFM is selected, or black areas will be zoomed when VECTOR is selected. |
| | **LINE SELECT** | Select ON to display the wave form of the line assigned in LINE POSITION below, when WFM is selected. |
| | **LINE POSITION** | Sets the line position when WFM is selected. When the numerical value is increased, the line will move down; when decreased, the line will move up. |

**USER CONFIG – FOCUS SETTING**

| **FOCUS MODE** | Switches the focus mode.  
- **STD**: An image with sharpened edges is displayed.  
- **COLOR**: Displays the intensified areas of images with color selected in COLOR below.  
- **OFF**: FOCUS MODE is deactivated. |
| **COLOR** | Selects the displayed intensified color from white (W), red (R), green (G), blue (B), and yellow (YL). |
| **FREQUENCY** | Sets the center frequency of the edge sharpening signal. You can select from L, M, MH, H. |
| **RANGE** | Sets the amount by which the level of edge sharpening may vary. You can set from 1 to 3. |
| **GAIN** | Sets the level of edge sharpening. You can select from 0 to 100. |

About the function assigned to the function button

**SCAN**
Press the button to change the scan size of the picture. With every press of the button, the picture switches in the sequence NORMAL scan → OVER scan → NATIVE (see “Scan mode image” on page 29).

**ASPECT**
Press the button to set the aspect ratio of the picture, 4:3 or 16:9.

**BLUE ONLY**
Press the button to eliminate the red and green signals. Only blue signal is displayed as an apparent monochrome picture on the screen. This facilitates “chroma” and “phase” adjustments and observation of signal noise.

**MONO**
Press the button to display a monochrome picture. When the buttons is pressed again, the monitor switches automatically to color mode.

**MARKER**
Press the button to display the marker. Set the aspect marker in the MARKER SETTING menu (see page 24).

**H/V DELAY**
Press the button to observe the horizontal and vertical sync signals at the same time.

**CLOSED CAP.**
Press the button to display the closed caption. Set the closed caption setting in the CLOSED CAPTION SETTING menu (see page 29).

**WFM/ALM/VS (WFM/ALM/VECTOR)**
Press the button to display the WFM/ALM/vectorscope display. Set the WFM/ALM/vectorscope display setting in the WFM/ALM/VECTOR SETTING menu (see page 26).

When LINE SELECT is set to ON and WFM is selected, each time you press the button, the settings change in the sequence WFM display activated → Line position setting → WFM display deactivated. Turn the menu selection control to move the line, when the line position is selected.

When LINE SELECT is set to OFF, the WFM display switches between activated and deactivated.

**ZOOM**
Press the button to zoom in the WFM/ALM/vectorscope display. Set the ZOOM setting in the WFM/ALM/VECTOR SETTING menu (see page 27).

**BRIGHTNESS**
Press the button to adjust the picture brightness. Press the button to display the adjustment screen and adjust the picture brightness. Press again to hide the adjustment screen. However, the picture brightness remains adjustable. Turn the menu selection control right to increase the brightness and turn left to decrease it.

**CONTRAST**
Press the button to adjust the picture contrast. Press the button to display the adjustment screen and adjust the picture contrast. Press again to hide the adjustment screen. However, the picture contrast remains adjustable. Turn the menu selection control right to increase the contrast and turn left to decrease it.

**CHROMA**
Press the button to adjust the color intensity. Press the button to display the adjustment screen and adjust the color intensity. Press again to hide the adjustment screen. However, the color intensity remains adjustable. Turn the menu selection control right to increase the intensity and turn left to decrease it.

**VOLUME**
Press the button to adjust the volume. Press the button to display the adjustment screen and adjust the volume. Press again to hide the adjustment screen. However, the volume remains adjustable. Turn the menu selection control right to increase the volume and turn left to decrease it.

**I/P MODE**
Press the button to set the delay by the picture processing to the minimum level when interlace signal is input. The mode switches in the sequence INTER-FIELD → FIELD MERGE → LINE DOUBLER → INTRA-FIELD with every press of the button (see “I/P MODE” on page 23).

**PHASE**
Press the button to adjust the color tones. Press the button to display the adjustment screen and adjust the color tones. Press again to hide the adjustment screen. However, the color tones remain adjustable. Turn the

### Submenu Setting

<table>
<thead>
<tr>
<th>Submenu</th>
<th>Setting</th>
</tr>
</thead>
<tbody>
<tr>
<td>F1 BUTTON to F7</td>

</tbody>
</table>
menu selection control right to increase the green tone and turn left to increase the purple tone.

**APERTURE**
Press the button to adjust the picture sharpness. Press the button to display the adjustment screen and adjust the picture sharpness. Press again to hide the adjustment screen. However, the picture sharpness remains adjustable. Turn the menu selection control right to make the picture sharper and turn left to make the picture softer.

**FOCUS**
Press the button to confirm the camera focus. An image with sharpened edges is displayed.

**T/C**
Press the button to display the time code display. Adjust the settings for the time code display in T/C DISPLAY SETTING (see page 24).

**IMD**
Press the button to display IMD. Adjust the settings for the IMD display in IMD SETTING (see page 25).

**SILENT MODE**
Press the button to stop the built-in cooling fan.

**Note**
Stopping the fan will result in a temperature increase inside the unit, possibly shortening the life of the unit. When you use SILENT MODE, the display may become dark to protect the interior circuit, and the Input select button LED may flash. This is not a malfunction.

To display in 4:3 aspect ratio, images are adjusted horizontally with scale handling.
**Adjustment Using the Menus**

**AUDIO SETTING**

**TYPE**
Sets the closed caption display type.
- **AUTO1**: Select this to display automatically 608(VBI)*3 when SD-SDI signal is input, or to display automatically 708*1 when HD-SDI signal is input.
- **AUTO2**: Select this to display automatically 608(VBI)*3 when SD-SDI signal is input, or to display automatically 608(708)*2 when HD-SDI signal is input.
- **708**: Select this to display 708*1 when HD-SDI signal is input.
- **608(708)**: Select this to display 608(708)*2 when HD-SDI signal is input.
- **608(VBI)**: Select this to display 608(VBI)*3 when SD-SDI signal is input.

*1 708 is a closed caption signal conforming to the EIA/CEA-708 standard.
*2 608(708) is a closed caption signal conforming to the EIA/CEA-608 standard, and which is transmitted as EIA/CEA-708 standard.
*3 608(VBI) is a closed caption signal conforming to the EIA/CEA-608 standards, and which is transmitted as Line 21.

**708**
Sets the closed caption type for 708. Select from SERVICE1 to SERVICE6.

**608**
Sets the closed caption type for 608(708) and 608(VBI). Select from CC1, CC2, CC3, CC4, TEXT1, TEXT2, TEXT3 and TEXT4.

**CAPTION LEVEL**
Sets the luminance of the displayed characters. Select LOW or HIGH.

**708**
Sets the closed caption type for 708. Select from SERVICE1 to SERVICE6.

**608**
Sets the closed caption type for 608(708) and 608(VBI). Select from CC1, CC2, CC3, CC4, TEXT1, TEXT2, TEXT3 and TEXT4.

**Note**
You can change the setting only when SDI signal is input.

**SUBMENU**

<table>
<thead>
<tr>

<td>Sets the luminance of the displayed characters. Select LOW or HIGH.</td>
</tr>
</tbody>
</table>

**SDI AUDIO SETTING**
Sets the audio channel when SDI signal is input.
- **3G/HD/SD**: Selects from among channels CH1 to CH16, odd channel + even channel (CH1+CH2, CH3+CH4...CH15+CH16) and OFF.
  You can display the L/R audio levels of the selected channels. (see “WFM/ALM/VECTOR (waveform monitor, audio level meter, and vectorscope) SETTING” on page 26).
- **SPEAKER OUTPUT**: Select an audio format to output from speakers, headphone jack, and AUDIO OUT connector.
  - **EMBEDDED**: Outputs an audio signal embedded in SDI.
  - **ANALOG**: Outputs an audio signal that comes from the AUDIO IN connector.

**Note**
The SDI audio signal is compatible only with 24 bit.

**REMOTE menu**

**REMOTE**

<table>
<thead>
<tr>
<th>PARALLEL REMOTE</th>
</tr>
</thead>
<tbody>
<tr>
<td>SERIAL REMOTE:</td>
</tr>
</tbody>
</table>

</tr>
<tr>
<td>FORCED TALLY:</td>
</tr>
</tbody>
</table>
Submenu | Setting
--- | ---
PARALLEL REMOTE | Selects the PARALLEL REMOTE connector pins for which you want to change the function. You can assign various functions to 1 to 4 pins and 6 to 8 pins. The following lists the functions you can assign to the pins.
- - - - (“- - - -”: No function is assigned.)
- COMPOSITE
- HDMI
- SDI 1
- SDI 2
- WFM/ALM/VS
- OVERSCAN
- NORMAL
- NATIVE
- 4:3
- 16:9
- TALLY R
- TALLY G
- BLUE ONLY
- MONO
- H/V DELAY
- 16:9 MARKER
- 15:9 MARKER
- 14:9 MARKER
- 13:9 MARKER
- 1.85:1 MARKER
- 2.35:1 MARKER
- 1.85:1 & 4:3 MARKER
- 4:3 MARKER
- CENTER MARKER
- MARKER MAT HALF
- MARKER MAT BLACK
- SAFE AREA 80%
- SAFE AREA 85%
- SAFE AREA 88%
- SAFE AREA 90%
- SAFE AREA 93%

**Notes**
- If you use the PARALLEL REMOTE function, you need to connect cables. For more details, see page 34.
- Set MARKER ENABLE (page 24) to ON to control the aspect marker and center marker.

Submenu | Setting
--- | ---
FORCED TALLY | The tally lamp function is forcibly assigned to 7 pin and 8 pin of the PARALLEL REMOTE connector. Selecting ON assigns tally lamp green to 7 pin and tally lamp red to 8 pin.
- ON: Forcibly assigns the tally lamp function.
- OFF: The tally lamp function is not forcibly assigned.

**Note**
When OFF is selected, any listed functions can be assigned to 7 and 8 pins. Selecting ON with any function other than the tally lamp assigned to 7 and 8 pins will ignore this setting, and the tally lamp is forcibly assigned to 7 and 8 pins instead.

SERIAL REMOTE | Selects the mode to be used.
- OFF: SERIAL REMOTE does not function.
- ETHERNET: The monitor is controlled by the command of Ethernet.
- BKM-15R/16R: Sets BKM-15R or BKM-16R.

MONITOR | Sets the monitor setting.
- MONITOR ID: Sets the ID of the monitor.
- GROUP ID: Sets the group ID of the monitor.
- IP ADDRESS: Sets the IP address.
- SUBNET MASK: Sets the subnet mask.
  (255.255.255.000)
- DEFAULT GATEWAY: Sets the default gateway on or off.
- ADDRESS: Sets the default gateway.
- CANCEL: Selects to cancel the setting.
- CONFIRM: Selects to save the setting.

CONTROLLER | Sets the address of the remote controller.
- IP ADDRESS: Sets the IP address.
- SUBNET MASK: Sets the subnet mask.
  (255.255.255.000)
- DEFAULT GATEWAY: Sets the default gateway on or off.
- ADDRESS: Sets the default gateway.
- CANCEL: Selects to cancel the setting.
- CONFIRM: Selects to save the setting.
Troubleshooting

This section may help you isolate the cause of a problem and as a result, eliminate the need to contact technical support.

- **The unit cannot be operated** → The key protection function works. Set the KEY INHIBIT setting to OFF in the KEY INHIBIT menu. Or, a function that does not work is assigned. Press the RETURN button to check the assigned functions.
- **The black bars appear at the upper and lower positions of the display** → When the signal aspect ratio is different from that of the panel, the black bars appear. This is not a failure of the unit.
- **Adjustments and settings cannot be made** → Adjustments and settings may not be possible depending on the input signals and the status of the unit. See “Input Signals and Adjustable/Setting Items” (page 11).

### KEY INHIBIT menu

You can lock the setting so that they cannot be changed by an unauthorized user.
Select OFF or ON.
If you set to ON, all items are displayed in black, indicating the items are locked.

<table>

</tbody>
</table>

### CONNECTION submenu

Sets the connection of the monitor and the controller.

- **PEER TO PEER**: for one to one connection
- **LAN**: for connection via a network
Specifications

Picture performance
Panel: a-Si TFT Active Matrix LCD
Picture size (diagonal): 228.0 mm (9 inches)
Effective picture size (H × V): 198.7 × 111.8 mm (7 7/8 × 4 1/2 inches)
Resolution (H × V): 1920 × 1080 pixels
Aspect: 16:9
Pixel efficiency: 99.99%
Viewing angle (Panel specification): 89º/89º/89º/89º (up/down/left/right, contrast > 10:1)
Normal scan: 0%
Over scan: 5%

Input
Composite input (NTSC/PAL): BNC type (× 1)
SDI input: BNC type (× 2)
HDMI input: HDMI (× 1) (HDCP correspondence)
Audio input: Stereo mini jack (× 1)
Parallel remote: Modular connector 8-pin (× 1) (Pin assignable)
Serial remote (LAN): RJ-45 (× 1) (Ethernet, 10BASE-T/100BASE-TX)
DC IN: XLR-type 4-pin (male) (× 1), 12 V DC (output impedance 0.05 ohms or less)

Output
Composite output: BNC type (× 1)
SDI (3G/HD/SD) output: BNC type (× 1)
Audio monitor output: Stereo mini jack (× 1)
Built-in speaker output: 0.5 W Monaural
Headphones output connector: Stereo mini jack (× 1)

General
Power: 100 V to 240 V AC, 0.7 A to 0.4 A, 50/60 Hz
12 V DC, 2.5 A
Power consumption: Approx. 36 W (max.)
Inrush current:
(1) Maximum possible inrush current at initial switch-on (Voltage changes caused by manual switching):
51 A peak, 7 A r.m.s. (240V AC)
(2) Inrush current after a mains interruption of five seconds (Voltage changes caused at zero-crossing):
17 A peak, 2 A r.m.s. (240V AC)

Operating conditions
Temperature:
0 °C to 40 °C (32 °F to 104 °F)
Recommended temperature: 20 °C to 30 °C (68 °F to 86 °F)
Humidity: 30% to 85% (no condensation)
Pressure: 700 hPa to 1060 hPa

Storage and transport conditions
Temperature: −20 °C to +60 °C (−4 °F to +140 °F)
Humidity: 0% to 90%
Pressure: 700 hPa to 1060 hPa

Accessories supplied
AC power cord (1)
AC plug holder (1)
AC adaptor (1)
Handle (1)
Arm mount bracket (1)
Screws (4)
Operating Instructions (1)
CD-ROM (1)
Using the CD-ROM Manual (1)

Optional accessories
Mounting bracket MB-531
Mounting panel MB-532
Monitor ENG kit VF-510

Design and specifications are subject to change without notice.
Note
Always verify that the unit is operating properly before use. SONY WILL NOT BE LIABLE FOR DAMAGES OF ANY KIND INCLUDING, BUT NOT LIMITED TO, COMPENSATION OR REIMBURSEMENT ON ACCOUNT OF THE LOSS OF PRESENT OR PROSPECTIVE PROFITS DUE TO FAILURE OF THIS UNIT, EITHER DURING THE WARRANTY PERIOD OR AFTER EXPIRATION OF THE WARRANTY, OR FOR ANY OTHER REASON WHATSOEVER.

You can allocate functions using the REMOTE menu (see page 30).

Note
Switching functions continuously allows at least 200 msec to do so. Otherwise, it may not switch correctly.

Wiring required to use the Remote Control
Connect the function you want to use with a Remote Control to the Ground (Pin 5).

Available signal formats
The unit is applicable to the following signal formats.
