

ABC Series

Cable Replacement Kit

for ABP Series Aluminum Boom Poles

Owner's Manual

Introduction

Thank you for choosing Auray.

The Auray ABC series replacement kit provides a replacement cable for the Auray ABP series boom pole. Auray's solderless design provides a fast and easy solution for cable replacement.

The high-quality coiled cable features an XLR connector and an XLR insert connector that provide secure connections and excellent signal transfer. This cable also features Auray's unique strain relief system that absorbs tension, secures the cable, and protects the cable from damage at the edge of the tip exit. The included Allen key and a small slotted screwdriver are the only tools needed for this simple cable replacement procedure that will assure long-lasting and trouble-free operation of your ABP boom pole.

Overview

XLR connector **1**

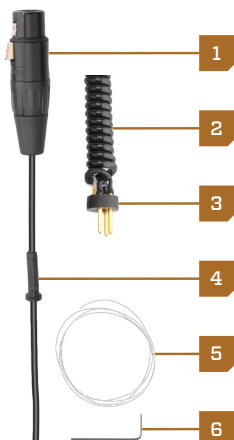

Coiled cable **2**

XLR insert connector **3**

Strain relief **4**

String **5**

1.5 mm Allen key **6**

Tool needed: small slotted screwdriver

Instructions

To replace the cable of the ABP series boom pole, do the following:

Remove the old cable

1. Remove the rubber grip from the bottom housing by peeling it off, and set it aside. **1**
2. Unscrew the bottom housing from the base of the boom pole.
3. Locate the screw hole on the bottom housing. Using a small slotted screwdriver (not included), loosen the locking screw of the XLR insert by turning it clockwise. **2**
4. Remove the XLR insert connector by gently pulling it out of the bottom housing.
5. Use the Allen key to loosen the set screw on the tip by turning it counterclockwise. **3**
6. Remove the tip by unscrewing it. **4**
7. Lift the strain relief out of the tip exit slot. **5**
8. Remove the cable from the boom pole by pulling it out from the top of the pole.

Install the replacement cable

1. Holding the boom pole upright, insert the cable into the top of the boom pole **1** and snake it through the tubing until the XLR insert connector is exposed at the bottom of the pole. **2**

Note: If the cable does not move smoothly through the tubing, use the included string: tie the string to the XLR connector and drop it through the tubing from the top. **3** Pull the string from the bottom of the boom pole to snake the cable through the tubing. Make sure to remove the string before continuing.

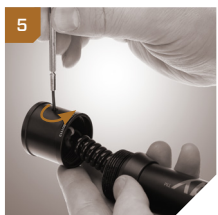

2. Insert the internal XLR connector into the bottom housing by matching the notch on the connector with the slot on the housing. **4**

Note: When properly aligned, the XLR insert connector will easily slide into place. Do not try to force the connector into the mount. Doing so could damage the connector or the mount.

3. Insert the XLR connector far enough so that the locking screw is aligned with the hole on the housing. The screw will be easily visible through the hole.
4. Tighten the screw with a small slotted screwdriver by turning it counterclockwise. **5** Tighten the screw thoroughly so that the connector doesn't move inside the housing.
5. Screw the bottom housing onto the boom pole and replace the rubber grip.
6. Place the strain relief of the cable into the tip exit slot.
7. Replace the tip by screwing it on, and secure it by tightening the set screw with the Allen key.

Warnings

- Please read and follow these instructions, and keep this manual in a safe place.
- Handle the product with care.
- Use only parts provided by the manufacturer.
- Make sure the item is intact and that there are no missing parts.
- Do not attempt to disassemble or repair the equipment—doing so will void the warranty, and Auray will not be responsible for any damage.
- All photos are for illustrative purposes.

One-Year Limited Warranty

This AURAY product is warranted to the original purchaser to be free from defects in materials and workmanship under normal consumer use for a period of one (1) year from the original purchase date or thirty (30) days after replacement, whichever occurs later. The warranty provider's responsibility with respect to this limited warranty shall be limited solely to repair or replacement, at the provider's discretion, of any product that fails during normal use of this product in its intended manner and in its intended environment. Inoperability of the product or part(s) shall be determined by the warranty provider. If the product has been discontinued, the warranty provider reserves the right to replace it with a model of equivalent quality and function.

This warranty does not cover damage or defect caused by misuse, neglect, accident, alteration, abuse, improper installation or maintenance. EXCEPT AS PROVIDED HEREIN, THE WARRANTY PROVIDER MAKES NEITHER ANY EXPRESS WARRANTIES NOR ANY IMPLIED WARRANTIES, INCLUDING BUT NOT LIMITED TO ANY IMPLIED WARRANTY OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE. This warranty provides you with specific legal rights, and you may also have additional rights that vary from state to state.

To obtain warranty coverage, contact the Auray Customer Service Department to obtain a return merchandise authorization ("RMA") number, and return the defective product to Auray along with the RMA number and proof of purchase. Shipment of the defective product is at the purchaser's own risk and expense.

For more information or to arrange service, visit www.aurayaudio.com or call Customer Service at 212-594-2353.
