Folding Camera Gimbal Setup

- Properly open the Folding camera Gimbal Head as shown in the image.

NOTE: The gimbal head folds up into a compact and manageable size, making storage and transit super easy.

- Now, properly tighten the Folding Gimbal Head with the help of the knob.

NOTE: There is also a spirit level at the base of the gimbal head for extra precision, as well as numbered scales to facilitate repeat setting on the gimbal head.

- Loosen the knob of the Folding Gimbal Head and mount it onto the Tripod Stand (**Not Included**).

- The Folding Gimbal Head has been properly mounted on the tripod stand.

NOTE: The gimbal head is easily mounted on a tripod via a 3/8"-16 threaded hole at the bottom of the base.

Assembling of L-Bracket

- Open the L-Bracket by pressing its push pin.

- Loosen the top knob of the Folding Gimbal Head and attach the L-bracket to it.

- Then properly tighten it with the help of the knob, as shown in the image.

Assembling of Quick Release Plate

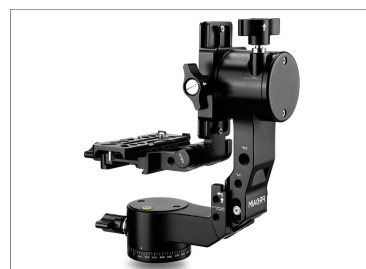

- Loosen the adjustment knob of the L-Bracket and slide the Quick Release Camera Plate onto the L-Bracket.

- After sliding the camera plate, tighten the adjustment knob properly.

NOTE: The Gimbal Head has a camera plate with 1/4"-20 and 3/8"-16 mounting screws fastened by the platform adjustment knob.

360° Rotation of Folding Gimbal Head

- Rotate the Gimbal head by loosening its knob.

- After rotating the Gimbal Head, tighten the knob again.

NOTE: The head pans 360° while keeping the horizon straight using the bubble level at the base of the head. Head has a 360° panoramic scale that allows easy pan adjustments.

360° Rotation of L-Bracket

- Loosen the top knob of the folding Gimbal Head and tilt the L-Bracket by 360°.

NOTE: The swing arm tilt horizontally and gives you extreme tilt angles to achieve a multi-dimensional shot as shown in the image.

- Again, properly tighten with the help of the knob.

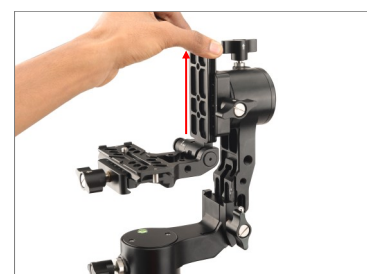

NOTE: Then tilting axis is locked independently using the tilt friction knob.

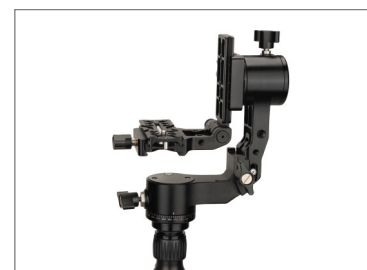

NOTE: The head pans and tilts a full 360°, facilitating extreme angles and smooth, balanced shots. The tilting axis are locked independently using the pan and tilt friction knobs.

- Loosen the side knob of the Folding Gimbal Head and increase the height of the L-Bracket. Then securely tighten with the knob again.

NOTE: You can increase the height of L-Bracket according to your requirement by sliding the L-bracket along the Arca-Swiss clamp.

■ Camera Setup

- Mount the Ball Head (**Not Included**) onto the Stand.

NOTE: The ball head offers smooth & accurate swivel rotation to your cameras, allowing you to achieve different angles .

- Loosen the locking knob of the Ball Head and slide the L-Bracket onto the Ball Head.

- After sliding the L-Bracket, properly tighten the locking knob.

- Now attach the camera (**Not Included**) to the camera plate by properly matching the threads and tighten with the help of a screwdriver.

- Loosen the knob of the Ball Head and slide the camera onto it.

NOTE: There are multiple 1/4"-20 and 3/8"-16 threaded accessory sockets over the gimbal head for mounting LED panels, monitors and microphones, etc.

L-Bracket Setup

- Open the L-Bracket by pressing its push pin, as shown in the image.

NOTE: The adjustment knob allows you to set the position of the camera (**Not Included**) as needed.

- Set the camera position according to your requirement and tighten the knob again.

NOTE: The complete kit comes in a foam based carrying bag with a padded strap for added protection and comfort.
